If you have other exam to be taken, we can free replace it for you.

NCLEX-RN exam is an important step in the process of becoming a registered nurse. After completing a nursing program, candidates must apply to their state board of nursing to take the exam. Once they pass the exam and meet other licensure requirements, they can practice as a registered nurse. NCLEX-RN exam is designed to ensure that only qualified individuals are licensed to practice nursing, which helps to protect the public and maintain the integrity of the nursing profession.

NCLEX-RN (National Council Licensure Examination for Registered Nurses) is a standardized exam that assesses the competency of nursing graduates to become licensed registered nurses. NCLEX-RN Exam is developed and administered by the National Council of State Boards of Nursing (NCSBN) and is used by state licensing boards to determine whether a candidate is qualified to practice nursing. Passing the NCLEX-RN is a requirement for licensure as a registered nurse in the United States and Canada.

## NCLEX National Council Licensure Examination(NCLEX-RN) Sample Questions (Q671-Q676):

### NEW QUESTION # 671

The nurse and prenatal client discuss the effects of cigarette smoking on pregnancy. It would be correct for the nurse to explain that with cigarette smoking there is increased risk that the baby will have:

- A. A low birth weight
- B. Anemia
- C. A birth defect
- D. Nicotine withdrawal

**Answer: A**

Explanation:

Section: Questions Set F

Explanation:

(A) Women who smoke during pregnancy are at increased risk for miscarriage, preterm labor, and IUGR in the fetus. (B) Although smoking produces harmful effects on the maternal vascular system and the developing fetus, it has not been directly linked to fetal anomalies. (C) Smoking during pregnancy has not been directly linked to anemia in the fetus. (D) Smoking during pregnancy has not been linked to nicotine withdrawal symptoms in the newborn.

### NEW QUESTION # 672

A 40-year-old client has been admitted to the hospital with severe substernal chest pain radiating down his left arm. The nurse caring for the client establishes the following priority nursing diagnosis-Alteration in comfort, pain related to:

- A. Decreased secretion of catecholamines secondary to anxiety
- B. Increased excretion of lactic acid due to myocardial hypoxia
- C. Decreased stimulation of the sympathetic nervous system
- D. Increased blood flow through the coronary arteries

**Answer: B**

Explanation:

Explanation

(A) Anaerobic metabolism results because the decreased blood supply to the myocardium causes a release of lactic acid. Lactic acid is an irritant to the myocardial neural receptors, producing chest pain. (B) Chest pain is caused by a decrease in the O<sub>2</sub> supply to the myocardial cells. Treatment modalities for chest pain are aimed toward increasing the blood flow through coronary arteries. (C) Chest pain causes an increase in the stimulation of the sympathetic nervous system. This stimulation increases the heart rate and blood pressure, causing an increase in myocardial workload aggravating the chest pain. (D) Chest pain and anxiety cause increased secretion of catecholamines by stimulating the sympathetic nervous system. This stimulation increases chest pain by increasing the workload of the heart.

### NEW QUESTION # 673

A male client tells his nurse that he has had an ulcer in the past and is afraid it is "flaring up again." The nurse begins to ask him specific questions about his symptoms. The nurse knows that a symptom that might indicate a serious complication of an ulcer is:

- **A. Melena**
- B. Pain in the middle of the night
- C. A bowel movement every 3-5 days
- D. Episodes of nausea and vomiting

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

(A) Clients with ulcers generally experience abdominal pain. It is common to have pain in the early morning hours with an ulcer. (B) Constipation is not a symptom associated with ulcers and would indicate a need to look at other factors. (C) Melena is blood in the stools. This could indicate a slow bleeding ulcer, which could result in significant amounts of blood loss over time. (D) Nausea and vomiting may be present as a result of the ulcer, especially if it is a gastric ulcer. This does not indicate an immediate life-threatening complication.

#### **NEW QUESTION # 674**

A client is admitted to the hospital with diabetic ketoacidosis.

The emergency room nurse should anticipate the administration of:

- A. Humulin L
- **B. Humulin R**
- C. Humulin N
- D. Humulin U

**Answer: B**

Explanation:

(A) Intermediate-acting insulin is not indicated in an emergency. (B) Regular insulin is rapid acting and indicated in an emergency situation. (C) Long-acting insulin is not indicated in an emergency situation. (D) Intermediate-acting insulin is not indicated in an emergency situation.

#### **NEW QUESTION # 675**

A client admitted with a diagnosis of possible myocardial infarction is admitted to the unit from the emergency room. The nurse's first action when admitting the client will be to:

- **A. Connect the client to the cardiac monitor**
- B. Obtain vital signs
- C. Ask the client if he is still having chest pain
- D. Complete the history profile

**Answer: A**

Explanation:

Explanation

(A) Obtaining vital signs is important after connecting the client to the monitor because vital signs should be stable before the client is discharged from the emergency room. (B) All are important, but the first priority is to monitor the client's rhythm. (C) If the client is in severe pain, pain medication should be given after connecting him to the monitor and obtaining vital signs. (D) Completion of the history profile is the least important of the nursing actions.

#### **NEW QUESTION # 676**

.....

Our NCLEX-RN Exam Dumps with the highest quality which consists of all of the key points required for the NCLEX-RN exam can really be considered as the royal road to learning. TrainingQuiz has already become a famous brand all over the world in this

field since we have engaged in compiling the NCLEX-RN practice materials for more than ten years and have got a fruitful outcome. You are welcome to download the free demos to have a general idea about our NCLEX-RN training materials.
