New Salesforce PDII-JPN Cram Materials & Excellect PDII-JPN Pass Rate

Once you submit your practice, the system of our PDII-JPN exam quiz will automatically generate a report. The system is highly flexible, which has short reaction time. So you will quickly get a feedback about your exercises of the PDII-JPN preparation questions. For example, it will note that how much time you have used to finish the PDII-JPN Study Guide, and how much marks you got for your practice as well as what kind of the questions and answers you are wrong with.

Salesforce Sample Questions (Q143-Q148):

NEW QUESTION # 143

Salesforce 管理者と Cloud Kicks は、米国内のすべての郵便番号とその郵便番号が属する Cloud Kicks 販売地域を保存するために、Region_c というカスタム オブジェクトを作成しました。

Cloud Kicks は、リードの郵便番号に基づいてリージョンを設定するためのリード上のトリガーを必要としています。

この要求を満たす最も効率的な方法はどのコード セグメントですか？

- A.
- B.
- C.
- D.

Answer: C

Explanation:

The most efficient way to populate the Region field on the Lead based on the zip code is to use a Map to store the Region_c records keyed by the Zip_Code_c field. This way, the developer can avoid querying the Region_c object for each Lead record, which would cause a SOQL limit exception. Instead, the developer can query the Region_c object once and store the results in the Map. Then, the developer can loop through the Lead records and use the Map to get the corresponding Region_c record based on the Zip_Code_c field. This approach reduces the number of SOQL queries and improves the performance of the trigger.

NEW QUESTION # 144

開発者は、「監査人」という名前のカスタムプロファイルに割り当てられたユーザーが、アカウント オブジェクトに関連するタスクに対して検索を実行できるようにする、履歴タスク レポート機能を実装する必要があります。

開発者は、検索で 12 ~ 24 か月前のタスクを返すことができるることを確認する必要があります。削除されたタスクは除外し、アーカイブされているかどうかに関係なくタスクを含める必要があります。

次のコードの場合、L2 から 24 か月までの範囲のタスクを取得する有効な方法として、プレースホルダーにどの select ステートメントを挿入する必要がありますか？

- A.
- B.
- C.
- D.

Answer: D

Explanation:

To retrieve Tasks that are between 12 and 24 months old, we need to use a SOQL query that filters based on the CreatedDate. The query must exclude deleted records and include both active and archived tasks. Since Tasks can be archived after a certain period (typically 12 months), we must ensure the query includes these as well.

* Option C is correct because it uses ALL ROWS in the SOQL query, which includes both active and archived (soft-deleted) records. The query also correctly uses a range for CreatedDate to ensure it selects Tasks created between 12 to 24 months ago.

* Option A is incorrect because it does not include the ALL ROWS keyword, which is necessary to include archived Tasks in the results.

* Option B is incorrect because it only retrieves Tasks created in the last 12 months, not between 12 to 24 months ago.

* Option D is incorrect because it does not filter Tasks based on their creation date correctly to include only those that are between 12 and 24 months old.

NEW QUESTION # 145

ユニバーサルコンテナーズは、顧客サポートケースの管理にカスタム Salesforce アプリケーションを使用しています。サポートチームは、特定のケースを解決するために外部パートナーと連携する必要があります。しかし、外部パートナーと共有するケースの可視性とアクセスを制御したいと考えています。この要件を満たすのに役立つ Salesforce の機能はどれでしょうか？

- A. ロール階層 25
- B. 基準に基づく共有ルール 26
- C. Apex 管理共有 23
- D. 共有セット 24

Answer: D

Explanation:

28

When dealing with External Users (Community/Experience Cloud users), standard sharing mechanisms like Role Hierarchies often do not apply, especially for high-volume Customer Community licenses which do not use the Role Hierarchy at all.

Sharing Sets (Option B) are specifically designed to grant external users access to records associated with their Account or Contact. A Sharing Set allows an administrator to define a simple mapping: for example,

"Grant access to Cases where the Case's Account matches the User's Account." This is the most efficient and scalable way to provide external partners visibility into records relevant to them without using complex Apex code.

While Apex managed sharing (Option A) could technically work, it is much more complex to maintain and is only available for "Customer Community Plus" or "Partner" licenses. Criteria-based sharing rules (Option D) are typically used for internal users or broad groups, not for granular, account-specific access for individual external partners. Sharing Sets provide a high-performance, declarative solution for controlling external record visibility.

NEW QUESTION # 146

テストクラスで Vizualforce ページを初期化するベストプラクティスは何ですか?

- A. コントローラーを使用します。現在のページ。setPage (MyTastfage);
- B. テストを使用します。setCurrentPage MyTestPags;
- C. テストを使用します。currantPage .getParamatars put (MyTaestPaga);
- D. テストを使用します。setCurrentPage (Page.MyTeatPage);

Answer: D

Explanation:

Test.setCurrentPage(Page.MyTestPage) is used to set the context to a Visualforce page in tests, allowing you to simulate a page request in a test method. References: Apex Developer Guide - Testing Custom Controllers and Controller Extensions

NEW QUESTION # 147

開発者は、取引先の最近連絡した 5 人の取引先責任者を表示する取引先レコードページの Lightning Web コンポーネントを作成しました。Apex メソッド Contacts は連絡先のリストを返し、コンポーネントのプロパティに関連付けられます。

□ Apex メソッドを接続できるようにするには、上記のコードのどの 2 行を変更する必要があります?
2 つの答えを選択してください

- A. 04行目に public を追加します。
- B. @AuraEnabled {cacheable=true} を 08 行目に追加します。
- C. 09 行目から private を削除します。
- D. @AuraEnabled {cacheable=true} を行 03 に追加します。

Answer: B,C

Explanation:

To make an Apex method callable from a Lightning Web Component, you need to annotate the method with @AuraEnabled and mark it as cacheable if it's only retrieving data without modifying it. Additionally, the method must be public to be accessible from the component.

Line 04: Needs @AuraEnabled(cacheable=true) to allow the method to be called from the Lightning Web Component and indicate that the method doesn't modify any data, making it suitable for caching.

Line 09: The method getFiveMostRecent should not be private because private methods cannot be called from a Lightning Web Component. Changing it to public (or default, which is equivalent to public within the same namespace) is required.
