CIPM Exam Study Guide 2023-2024| With Questions & Answers (100%Verified)

Which of the following is not a metric an organization would use? - ANSWER - Minimize security threats

Which of the following is least likely a goal of an organization's privacy program? - ANSWER - Hiring a privacy officer or manager

In which of the following ways can internal audit most likely help a privacy program? - ANSWER - Providing consultancy services

What can be considered to be the essence of an organization's privacy notice communicated to the outside world? - ANSWER - A promise on handling

Which of the following is most true about privacy by design? - ANSWER - Results, partly, in compliance with the General Data Protection Regulation

Which of the following is the best description of an accountable organization? - ANSWER - An organization with the necessary policies and procedures

Which step is likely not part of a privacy program with the goal to protect an organization's brand? - ANSWER - Prevent phishing e-mails using the company logo from being sent

What is "the authority aims to safeguard the balance between the right to privacy and other rights"? - ANSWER - A mission or vision

A manufacturing company has placed computers all around the manufacturing area to help machine operators to relax during their lunch break and check their e-mails or social media. The company is doing so in an attempt to stop the machine operators from being distracted by their phones during their work and all the dangers that come with being distracted in a manufacturing area. All the computers are connected to both the intranet and the internet. This allows an internal news bulletin and all policies and procedures to be displayed easily. There are regular updates, for example on family events, updates of procedures, bonus-related information and news on the employee of the month. In addition to involving employees by sharing company news with them, all procedures are on the intranet. Anything from safe work practice guidelines to social media guidelines can be found on the intranet. To use the computer, no login is needed. All computers are configured to be accessible to anyone, with ease. A downside of this is a shared hard-drive, and the older

CIPM exam is offered by the International Association of Privacy Professionals (IAPP), which is a globally recognized organization that specializes in providing education and training on privacy issues.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q205-Q210):

NEW QUESTION # 205

Under the GDPR, what obligation does a data controller or processor have after appointing a data protection officer (DPO)?

- A. To ensure that the DPO acts as the sole point of contact for individuals' questions about their personal data.
- B. To ensure that the DPO receives sufficient instructions regarding the exercise of their defined tasks.
- C. To submit for approval to the DPO a code of conduct to govern organizational practices and demonstrate compliance with data protection principles.
- **D. To provide resources necessary to carry out the defined tasks of the DPO and to maintain their expert knowledge.**

Answer: D

NEW QUESTION # 206

What is least likely to be achieved by implementing a Data Lifecycle Management (DLM) program?

- **A. Crafting policies which ensure minimal data is collected.**
- B. Increasing awareness of the importance of confidentiality.
- C. Ensuring data is kept for no longer than necessary.
- D. Reducing storage costs.

Answer: A

Explanation:

Explanation

Crafting policies which ensure minimal data is collected is least likely to be achieved by implementing a Data Lifecycle Management (DLM) program, as it is more related to the data collection stage, not the data management stage. A DLM program focuses on how to handle the data after it has been collected, such as how to store, use, share, and dispose of it. The other options are more likely to be achieved by implementing a DLM program, as they help to optimize the data storage costs, comply with the data retention obligations, and protect the data confidentiality. NEW QUESTION # 207

The General Data Protection Regulation (GDPR) specifies fines that may be levied against data controllers for certain infringements. Which of the following will be subject to administrative fines of up to 10 000 000 EUR, or in the case of an undertaking, up to 2% of the total worldwide annual turnover of the preceding financial year?

- A. Failure to process personal information in a manner compatible with its original purpose
- B. Failure to demonstrate that consent was given by the data subject to the processing of their personal data where it is used as the basis for processing
- **C. Failure to implement technical and organizational measures to ensure data protection is enshrined by design and default**
- D. Failure to provide the means for a data subject to rectify inaccuracies in personal data

Answer: C

Explanation:

The GDPR specifies fines that may be levied against data controllers for certain infringements. According to Article 83(4)(a) of the GDPR, failure to implement technical and organizational measures to ensure data protection is enshrined by design and default will

be subject to administrative fines of up to 10 000 000 EUR, or in the case of an undertaking, up to 2% of the total worldwide annual turnover of the preceding financial year, whichever is higher. Data protection by design and default is a principle that requires data controllers to integrate data protection considerations into every stage of the processing activities, from the conception to the execution, and to adopt appropriate measures to safeguard the rights and interests of the data subjects by default, such as minimizing the amount and retention period of personal data, pseudonymizing or encrypting personal data, ensuring transparency and accountability, and enabling data subject rights.

NEW QUESTION # 208

SCENARIO

Please use the following to answer the next QUESTION:

Ben works in the IT department of IgNight, Inc., a company that designs lighting solutions for its clients. Although IgNight's customer base consists primarily of offices in the US, some individuals have been so impressed by the unique aesthetic and energy-saving design of the light fixtures that they have requested IgNight's installations in their homes across the globe.

One Sunday morning, while using his work laptop to purchase tickets for an upcoming music festival, Ben happens to notice some unusual user activity on company files. From a cursory review, all the data still appears to be where it is meant to be but he can't shake off the feeling that something is not right. He knows that it is a possibility that this could be a colleague performing unscheduled maintenance, but he recalls an email from his company's security team reminding employees to be on alert for attacks from a known group of malicious actors specifically targeting the industry.

Ben is a diligent employee and wants to make sure that he protects the company but he does not want to bother his hard-working colleagues on the weekend. He is going to discuss the matter with this manager first thing in the morning but wants to be prepared so he can demonstrate his knowledge in this area and plead his case for a promotion.

Going forward, what is the best way for IgNight to prepare its IT team to manage these kind of security events?

- A. Update its data inventory.
- B. IT security awareness training.
- C. Tabletop exercises.
- D. Share communications relating to scheduled maintenance.

Answer: C

NEW QUESTION # 209

SCENARIO

Please use the following to answer the next QUESTION:

Perhaps Jack Kelly should have stayed in the U.S. He enjoys a formidable reputation inside the company, Special Handling Shipping, for his work in reforming certain "rogue" offices. Last year, news broke that a police sting operation had revealed a drug ring operating in the Providence, Rhode Island office in the United States. Video from the office's video surveillance cameras leaked to news operations showed a drug exchange between Special Handling staff and undercover officers.

In the wake of this incident, Kelly had been sent to Providence to change the "hands off" culture that upper management believed had let the criminal elements conduct their illicit transactions. After a few weeks under Kelly's direction, the office became a model of efficiency and customer service. Kelly monitored his workers' activities using the same cameras that had recorded the illegal conduct of their former co-workers.

Now Kelly has been charged with turning around the office in Cork, Ireland, another trouble spot. The company has received numerous reports of the staff leaving the office unattended. When Kelly arrived, he found that even when present, the staff often spent their days socializing or conducting personal business on their mobile phones. Again, he observed their behaviors using surveillance cameras. He issued written reprimands to six staff members based on the first day of video alone.

Much to Kelly's surprise and chagrin, he and the company are now under investigation by the Data Protection Commissioner of Ireland for allegedly violating the privacy rights of employees. Kelly was told that the company's license for the cameras listed facility security as their main use, but he does not know why this matters. He has pointed out to his superiors that the company's training programs on privacy protection and data collection mention nothing about surveillance video.

You are a privacy protection consultant, hired by the company to assess this incident, report on the legal and compliance issues, and recommend next steps.

What should you advise this company regarding the status of security cameras at their offices in the United States?

- A. Set policies about the purpose and use of the security cameras.
- B. Reduce the number of security cameras located inside the building.
- **C. Restrict access to surveillance video taken by the security cameras and destroy the recordings after a designated period of time.**
- D. Add security cameras at facilities that are now without them.

Answer: C

Explanation:

This answer is the best way to advise this company regarding the status of security cameras at their offices in the United States, as it can help to protect the privacy and security of the employees and visitors who are recorded by the cameras, as well as to comply with any applicable laws and regulations that may limit or regulate the use of surveillance video. Restricting access to surveillance video means that only authorized personnel who have a legitimate business need can view, copy, share or disclose the video, and that they must follow proper procedures and safeguards to prevent unauthorized or unlawful access, use or disclosure. Destroying the recordings after a designated period of time means that the video is not kept longer than necessary for the purpose for which it was collected, and that it is disposed of securely and irreversibly. The designated period of time should be based on the legal, operational and risk factors that may affect the retention of the video, such as potential litigation, investigations, audits or claims.
