NOTE: Each correct selection is worth one point.

Required secrets:

Certificate
Personal access token
Shared Access Authorization token
Username and password

Storage location:

Azure Data Lake
Azure Key Vault
Azure Storage with HTTP access
Azure Storage with HTTPS access

Answer:

Required secrets:

Certificate
Personal access token
Shared Access Authorization token
Username and password

Storage location:

Azure Data Lake
Azure Key Vault
Azure Storage with HTTP access
Azure Storage with HTTPS access

Explanation:

Every request made against a storage service must be authorized, unless the request is for a blob or container resource that has been made available for public or signed access. One option for authorizing a request is by using Shared Key.

Scenario: The mobile applications must be able to call the share pricing service of the existing retirement fund management system. Until the system is upgraded, the service will only support basic authentication over HTTPS.

The investment planning applications suite will include one multi-tier web application and two iOS mobile application. One mobile application will be used by employees; the other will be used by customers.

To pass the SAP C-BW4H-2505 exam on the first try, candidates need SAP Certified Associate - Data Engineer - SAP BW/4HANA updated practice material. Preparing with real C-BW4H-2505 exam questions is one of the finest strategies for cracking the exam in one go. Students who study with SAP C-BW4H-2505 Real Questions are more prepared for the exam, increasing their chances of succeeding. Finding original and latest C-BW4H-2505 exam questions however, is a difficult process. Candidates require assistance finding the C-BW4H-2505 updated questions.

We know that it is hard to stay and study for the SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) exam dumps in one place for a long time. Therefore, you have the option to use SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) PDF questions anywhere and anytime. DumpsTorrent SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) dumps are designed according to the SAP C-BW4H-2505 certification exam standard and have hundreds of questions similar to the actual SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) exam.

## C-BW4H-2505 Latest Exam Review, C-BW4H-2505 New Dumps

The policy of "small profits" adopted by our company has enabled us to win the trust of all of our C-BW4H-2505 customers, because we aim to achieve win-win situation between all of our customers and our company. And that is why even though our

company has become the industry leader in this field of C-BW4H-2505 Exam Questions for so many years and our C-BW4H-2505 exam materials have enjoyed such a quick sale all around the world we still keep an affordable price on our C-BW4H-2505 study guide for all of our customers and never want to take advantage of our famous brand.

## SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Which SAP BW/4HANA objects can be used as sources of a data transfer process (DTP)? Note: There are 2 correct answers to this question.

- A. InfoSource
- B. CompositeProvider
- C. Open ODS view
- D. DataStore Object (advanced)

**Answer: A,D**

Explanation:

In SAP BW/4HANA, a Data Transfer Process (DTP) is used to transfer data between source and target objects.

The source objects for a DTP must be compatible with the DTP's functionality, which includes extracting, transforming, and loading data. Below is an explanation of the correct answers:

A). DataStore Object (advanced) A DataStore Object (advanced) is a flexible and powerful object in SAP BW/4HANA that stores detailed data for reporting and analysis. It can serve as a source for a DTP because it supports both inbound and outbound data flows. Data from a DataStore Object (advanced) can be extracted, transformed, and loaded into other objects such as another DataStore Object, InfoCube, or Composite Provider.

\* The SAP BW/4HANA Modeling Guide confirms that DataStore Objects (advanced) are fully supported as sources for DTPs, enabling seamless data integration.

C). InfoSource An InfoSource acts as an intermediate layer between data sources and targets in SAP BW/4HANA. It consolidates data from multiple sources and provides a unified structure for data transfer.

InfoSources can be used as sources for DTPs, especially when data needs to be transformed or enriched before being loaded into a target object.

Reference: The SAP BW/4HANA Data Modeling Guide highlights that InfoSources are commonly used as sources for DTPs to facilitate data transformation and consolidation.

Incorrect Options B. Open ODS view An Open ODS view is designed to provide direct access to data stored in SAP HANA tables or external sources. While Open ODS views are useful for real-time reporting and analytics, they cannot serve as direct sources for DTPs. Instead, they are typically consumed by queries or Composite Providers.

Reference: The SAP BW/4HANA Modeling Guide explicitly states that Open ODS views are not supported as sources for DTPs.

D). CompositeProvider A Composite Provider combines data from multiple sources (e.g., InfoProviders, Open ODS views, or HANA tables) into a unified structure for reporting. However, Composite Providers are not designed to act as sources for DTPs. They are primarily used for querying and reporting purposes.

Reference: The SAP BW/4HANA Query Design Guide confirms that Composite Providers are not supported as sources for DTPs.

### NEW QUESTION # 71

What are the possible ways to fill a pre-calculated value set (bucket)? Note: There are 3 correct answers to this question.

- A. By accessing an SAP HANA HDI Calculation View of data category Dimension
- B. By entering the values manually
- C. By using a BW query (update value set by query)
- D. By using a transformation data transfer process (DTP)
- E. By referencing a table

**Answer: B,C,E**

### NEW QUESTION # 72

You open an SAP Analysis for Microsoft Office workbook. On which Design Panel tabs can you verify the filter values? Note: There are 2 correct answers to this question.

- A. Information
- B. Design Rules
- C. Components
- D. Analysis

**Answer: A,C**

#### NEW QUESTION # 73

What are the prerequisites for deleting business partner attribute master data in SAP BW/4HANA? Note:  
There are 2 correct answers to this question.

- A. In SAP BW/4HANA there must be no hierarchy data related to business partner values that should be deleted.
- B. There must be no BW query as InfoProvider in SAP BW/4HANA that uses business partner as a free characteristic.
- C. In SAP BW/4HANA there must be no analysis authorizations related to business partner values that should be deleted
- D. There must be no transaction data in a DataStore Object (advanced) referring to business partner values that should be deleted.

**Answer: C,D**

Explanation:

Deleting master data in SAP BW/4HANA requires careful consideration of dependencies to ensure data integrity and system stability. Below is a detailed explanation of the prerequisites for deleting business partner attribute master data:

\* Explanation: While it is important to ensure that queries do not rely on specific master data values, this is not a strict prerequisite for deleting master data. Queries using business partner as a free characteristic will not prevent the deletion of master data, as long as there are no active dependencies such as transaction data or authorizations tied to those values.

\* SAP BW/4HANA allows master data deletion even if queries reference the characteristic, provided there are no underlying dependencies like transaction data or authorizations.

Option B: In SAP BW/4HANA there must be no hierarchy data related to business partner values that should be deleted  
Explanation: While hierarchy data can be associated with master data, the presence of hierarchies does not directly prevent the deletion of master data. Hierarchies can be adjusted or removed independently of the master data deletion process. Therefore, this is not a prerequisite.

Reference: SAP documentation does not list hierarchy data as a blocking factor for master data deletion unless the hierarchy itself has active dependencies.

Option C: There must be no transaction data in a DataStore Object (advanced) referring to business partner values that should be deleted  
Explanation: Transaction data in a DataStore Object (advanced) creates a dependency on the master data. If transaction data references specific business partner values, those values cannot be deleted until the transaction data is either archived or removed. This ensures data consistency and prevents orphaned records.

Reference: SAP BW/4HANA enforces this rule to maintain referential integrity between master data and transactional data. Deleting master data without addressing transaction data would lead to inconsistencies.

Option D: In SAP BW/4HANA there must be no analysis authorizations related to business partner values that should be deleted  
Explanation: Analysis authorizations define access restrictions based on master data values. If analysis authorizations are configured to restrict access using specific business partner values, those values cannot be deleted until the authorizations are updated or removed. This ensures that security settings remain valid and consistent.

Reference: SAP BW/4HANA checks for dependencies in analysis authorizations before allowing master data deletion. Failing to address these dependencies can result in authorization errors.

#### NEW QUESTION # 74

For InfoObject ADDRESS, the High Cardinality flag has been set. However, ADDRESS has an attribute CITY without the High Cardinality flag. What is the effect on SID values in this scenario?

- A. SID values are generated when InfoObject CITY is activated.
- B. SID values are not stored for InfoObject ADDRESS.
- C. SID values are generated when data for InfoObject ADDRESS is loaded.
- D. SID values are generated when InfoObject ADDRESS is activated.

**Answer: C**

## NEW QUESTION # 75

.....

Are you worrying about how to pass SAP C-BW4H-2505 test? Now don't need to worry about the problem. DumpsTorrent that committed to the study of SAP C-BW4H-2505 certification exam for years has a wealth of experience and strong exam dumps to help you effectively pass your exam. Whether to pass the exam successfully, it consists not in how many materials you have seen, but in if you find the right method. DumpsTorrent is the right method which can help you sail through SAP C-BW4H-2505 Certification Exam.

**C-BW4H-2505 Latest Exam Review:** <https://www.dumpstorrent.com/C-BW4H-2505-exam-dumps-torrent.html>

Since there is such a high rate of return, why hesitate to buy the C-BW4H-2505 exam questions, SAP C-BW4H-2505 Latest Braindumps Files It will add more colors to your life, And DumpsTorrent C-BW4H-2505 Latest Exam Review provides 365 days updates, As you know the registration fee for the SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) certification exam is itself very high, varying between 100\$ and 1000\$, And you can also use the SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) PDF on smart devices like smartphones, laptops, and tablets.

Not only is it common for a single person to wear all the C-BW4H-2505 hats in the production process, but also the animated projects can be anything from traditional to experimental.

right.jpg Understanding confidentiality models such as Bell-LaPadula, Since there is such a high rate of return, why hesitate to buy the C-BW4H-2505 Exam Questions?

## 100% Pass Quiz SAP - C-BW4H-2505 Latest Braindumps Files
