We all know both exercises and skills are important to pass the exam while our CASPO-001 Torrent prep contain the both aspects well.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q25-Q30):

NEW QUESTION # 25

The Sprint Goal is a result of Sprint Planning, as is the Sprint Backlog. True or False?

- A. False
- B. True

Answer: B

Explanation:

The Sprint Goal and the Sprint Backlog are both outcomes of Sprint Planning, making this statement true.

According to the Scrum Guide, Sprint Planning is an event where the Scrum Team collaborates to define the work to be performed during the Sprint. The Sprint Goal is a single objective set for the Sprint, providing focus and coherence to the work selected. It is crafted collaboratively by the Product Owner, Developers, and Scrum Master during Sprint Planning. Simultaneously, the Sprint Backlog is created, consisting of the Product Backlog items selected for the Sprint plus a plan to deliver them, aligned with the Sprint Goal. The Scrum Guide states: "Sprint Planning initiates the Sprint by laying out the work to be performed... This resulting plan is

created by the collaborative work of the entire Scrum Team." Thus, both the Sprint Goal and Sprint Backlog emerge from this event, confirming option A as correct.

NEW QUESTION # 26

There are five teams working on a product. How many Product Owners would there be? (Choose the best answer)

- A. 0
- **B. 1**
- C. Let the team decide
- D. It depends

Answer: B

Explanation:

A single product has one Product Owner, regardless of the number of teams. The Scrum Guide states: "The Product Owner is one person, not a committee... Multiple Scrum Teams often work together on the same product. One Product Backlog is used to describe the upcoming work on the product."

* A: Multiple Product Owners fragment accountability.

* B: Correct—one Product Owner for one product.

NEW QUESTION # 27

True or False: Scrum is a methodology that tells in detail how to build software incrementally.

- **A. False**
- B. True

Answer: A

Explanation:

The Scrum Guide defines Scrum as "a lightweight framework that helps people, teams, and organizations generate value through adaptive solutions for complex problems." It provides roles, events, and artifacts but intentionally avoids prescribing detailed "how-to" processes for building software (e.g., coding practices, tools). This distinguishes it from a methodology, which offers specific steps. Scrum focuses on "what" (e.g., deliver an Increment) and leaves "how" to the team's discretion, making the statement false. Thus, B is correct.

NEW QUESTION # 28

What happens if the customer no longer wants the feature that the Sprint Goal intended to meet? (Choose the best answer)

- **A. The Product Owner should cancel the Sprint**
- B. The executive stakeholders should determine if the Sprint should continue
- C. The Scrum Master should cancel the Sprint

Answer: A

Explanation:

If the Sprint Goal becomes obsolete (e.g., a feature is no longer needed), the Product Owner can cancel the Sprint. The Scrum Guide states: "A Sprint can be cancelled if the Sprint Goal becomes obsolete. Only the Product Owner has the authority to cancel the Sprint."

* A: Correct—the Product Owner decides.

* B: Stakeholders advise, but don't decide.

NEW QUESTION # 29

True or False: Scrum mandates the use of burndown charts.

- **A. False**
- B. True

Answer: A

Explanation:

Scrum does not mandate specific tools like burndown charts; it focuses on outcomes (e.g., a "Done" Increment) rather than prescriptive practices. The Scrum Guide mentions progress tracking as optional:

"Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows. While proven useful, these do not replace the importance of empiricism."

* A:False-burndown charts are optional.

NEW QUESTION # 30
