우리 Pass4Test 에는 최신의Oracle 1z0-1073-25학습가이드가 있습니다. Pass4Test의 부지런한 IT전문가들이 자기만의 지식과 끊임없는 노력과 경험으로 최고의Oracle 1z0-1073-25합습자료로Oracle 1z0-1073-25인증시험을 응시하실 수 있습니다.Oracle 1z0-1073-25인증시험은 IT업계에서의 비중은 아주 큼니다. 시험신청하시는분들도 많아지고 또 많은 분들이 우리Pass4Test의Oracle 1z0-1073-25자료로 시험을 패스했습니다. 이미 패스한 분들의 리뷰로 우리 Pass4Test의 제품의 중요함과 정확함을 증명하였습니다.

그렇게 많은 IT인증덤프공부자료를 제공하는 사이트중Pass4Test의 인지도가 제일 높은 원인은 무엇일까요?그건 Pass4Test의 제품이 가장 좋다는 것을 의미합니다. Pass4Test에서 제공해드리는 Oracle인증 1z0-1073-25덤프공부자료는Oracle인증 1z0-1073-25실제시험문제에 초점을 맞추어 시험커버율이 거의 100%입니다. 이 덤프만 공부하시면 Oracle인증 1z0-1073-25시험패스에 자신을 느끼게 됩니다.

1z0-1073-25인기덤프공부, 1z0-1073-25시험대비 덤프데모문제 다운

Pass4Test는Oracle인증1z0-1073-25시험에 대하여 가이드를 해줄 수 있는 사이트입니다. Pass4Test는 여러분의 전업 지식을 업그레이드시켜줄 수 있고 또한 한번에Oracle인증1z0-1073-25시험을 패스하도록 도와주는 사이트입니다. Pass4Test제공하는 자료들은 모두 IT업계전문가들이 자신의 지식과 끈임없는 경험등으로 만들어낸 퍼펙트 자료들입니다. 품질은 정확도 모두 보장되는 문제집입니다.Oracle인증1z0-1073-25시험은 여러분이 IT지식을 한층 업할수 있는 시험이며 우리 또한 일년무료 업데이트서비스를 제공합니다.

최신 Inventory Management Cloud 1z0-1073-25 무료샘플문제 (Q50-Q55):

질문 # 50

Which two statements are true about project-driven supply chain?

- A. Exclusion can be set for project cost collection by project type.
- B. Common inventory cannot be used for project-specific picks.
- C. Project and task details are not available on the Manage Item Quantities page.
- D. Project and task details can be removed from a referenced return.

정답: A,D

질문 # 51

In your shipment integration between inventory cloud and the 3PL system, some shipment confirmation messages have errored. How do you manage these pending transactions?

- A. Use the Manage Shipping Transaction Corrections in Spreadsheet task.
- B. Use the Manage Pending Transactions Corrections task.
- C. Use the Manage Shipment Message Interface task.

정답: A

질문 # 52

SIMULATION

Back-to-Back Supply Creation Make Flow

The supply document for a back-to-back make flow is a work order. As soon as the work order is created in Oracle Fusion Cloud Manufacturing, it's tied to the back-to-back sales order in the form of a reservation in inventory. The work order goes through the regular production process and the work order completion transaction issues finished goods to inventory.

Note: Back-to-back flow is currently supported for only discrete manufacturing.

The following figure shows the back-to-back supply creation make flow.

Back-to-Back Supply Creation Transfer Flow

The supply document for a back-to-back transfer flow is a transfer order. The transfer order is created in inventory and reserved against the back-to-back sales order. When the transfer order is ready to be fulfilled, an interorganization shipment moves goods from the source organization to the destination organization. An interorganization receipt in the destination organization (which is also the fulfillment warehouse on the back-to-back sales order) creates on hand to fulfill the sales order. The following figure shows the back-to-back supply creation transfer flow.

Explanation:

Back-to-Back Supply Creation Flows: Make & Transfer in Oracle Cloud

1. Overview of Back-to-Back Supply Creation Flows

Back-to-back (B2B) supply creation flows in Oracle Fusion Cloud allow businesses to generate supply only when a sales order is placed. The system creates supply documents dynamically based on sourcing rules and executes supply fulfillment through Manufacturing (Make Flow) or Inventory Transfer (Transfer Flow).

Each flow follows these key steps:

Sales Order Entry & Scheduling - A customer places an order that requires supply creation.

Supply Order Generation - The system determines whether to manufacture or transfer stock.

Supply Execution - The supply is produced (Make Flow) or transferred from another warehouse (Transfer Flow).

Receiving & Reservation - The supply is received and linked to the sales order.

Order Fulfillment - The sales order is shipped to the customer.

2. Back-to-Back Supply Creation: Make Flow (Manufacturing-Based Fulfillment) The Make Flow is used when the item must be manufactured in-house because it is not available in stock or through procurement. The system creates a Work Order (WO) in Oracle Manufacturing Cloud and ties it to the sales order.

Step-by-Step Make Flow Process

Below is the step-by-step breakdown of the Back-to-Back Make Flow using Oracle Fusion Cloud applications.

Step 1: Enter & Schedule Sales Order

The customer places an order in Oracle Order Management.

The system checks stock availability in Oracle Inventory Cloud.

Since no stock is available, Oracle Supply Chain Orchestration (SCO) triggers a supply request.

Oracle Global Order Promising (GOP) determines that the item must be manufactured.

The sales order is scheduled for back-to-back fulfillment.

□ System Action: The system marks the sales order for manufacturing and creates a supply order.

Step 2: Create & Request Work Order

Oracle Supply Chain Orchestration (SCO) generates a Supply Order.

The system determines that a Work Order (WO) is needed.

A Work Order (WO) is created in Oracle Manufacturing Cloud.

The Work Order is tied to the sales order to ensure the finished goods are allocated for this order only.

□ System Action: The system creates a Work Order (WO) in Oracle Manufacturing.

Step 3: Execute Manufacturing Process

The Work Order goes through the standard production process.

Raw materials are issued from inventory.

Production activities are completed.

The final product is reported as complete in Oracle Manufacturing Cloud.

The Work Order is completed, and the finished goods are transferred to Oracle Inventory Cloud.

□ System Action: The system marks the Work Order as complete and updates inventory.

Step 4: Reserve & Ship the Sales Order

The system reserves the manufactured stock against the sales order.

The order is picked, packed, and shipped from the warehouse.

Oracle Shipping Execution updates the order status.

An invoice is generated in Oracle Receivables.

The sales order is closed.

□ Final Action: The system completes the order and ships it to the customer.

Oracle Fusion Cloud Modules Involved in Make Flow

Oracle Cloud Module	Function in Back-to-Back Make Flow
Oracle Order Management	Captures and processes customer orders
Oracle Supply Chain Orchestration	Coordinates supply execution
Oracle Global Order Promising	Determines the best sourcing method
Oracle Manufacturing Cloud	Creates and manages work orders
Oracle Inventory Cloud	Updates inventory levels and reserves supply
Oracle Shipping Execution	Handles shipment to the customer

질문 # 53

What are the inventory reservation levels available for an item?

- A. Subinventory, Locator, Lot, and Serial only
- **B. Subinventory, Locator, Revision, Lot, Serial, Project, and Task only**
- C. Subinventory, Locator, Revision, Lot, and Serial only

정답: B

질문 # 54

Which statement is true when you use kit items on a transfer order?

- A. Only component-level picking is possible.
- B. Shipment Set Behavior is not applicable for kit items.
- **C. Component-level picking, shipping, and receiving are possible.**

정답: C
