P.S. Free 2026 Microsoft SC-401 dumps are available on Google Drive shared by TorrentExam: https://drive.google.com/open?id=1BTZGTUihPjJfP-2fPeDD__FsqMso10

TorrentExam is a website engaged in the providing customer SC-401 VCE Dumps and makes sure every candidates passing actual test easily and quickly. We have a team of IT workers who have rich experience in the study of Microsoft dumps torrent and they check the updating of Microsoft top questions everyday to ensure the accuracy of exam collection.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 2	<ul style="list-style-type: none">• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Topic 3	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 4	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.

SC-401 Practice Exams Free, SC-401 New Dumps Sheet

Our dumps bundle is available at an affordable rate. This bundle includes SC-401 PDF questions, Microsoft SC-401 desktop practice test software and a web-based practice test. Below are features of these three formats of our Microsoft SC-401 practice material. The Microsoft SC-401 practice test of TorrentExam is beneficial to not only kill Administering Information Security in Microsoft 365 exam anxiety but also to overcoming mistakes in your preparation.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q156-Q161):

NEW QUESTION # 156

You have a Microsoft 365 E5 subscription.

You need to implement a compliance solution that meets the following requirements:

Captures clips of key security-related user activities, such as the exfiltration of sensitive company data.

Integrates data loss prevention (DLP) capabilities with insider risk management.

What should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Captures clips of key security-related user activities:

Adaptive scopes
 Classifiers
 Forensic evidence
 Search

Integrates DLP capabilities with insider risk management:

Adaptive Protection
 eDiscovery (Premium)
 Records management
 Trainable classifiers

Answer:

Explanation:

Answer Area

Captures clips of key security-related user activities:

- Adaptive scopes
- Classifiers
- Forensic evidence
- Search

Integrates DLP capabilities with insider risk management:

- Adaptive Protection
- eDiscovery (Premium)
- Records management
- Trainable classifiers

Explanation:

Answer Area

Captures clips of key security-related user activities:

- Adaptive scopes
- Classifiers
- Forensic evidence
- Search

Integrates DLP capabilities with insider risk management:

- Adaptive Protection
- eDiscovery (Premium)
- Records management
- Trainable classifiers

Captures clips of key security-related user activities

This requirement refers to recording and surfacing evidence of risky user behavior (e.g., copying sensitive files to USB, uploading to cloud storage, or exfiltrating data).

In Microsoft Purview Insider Risk Management, this is achieved through Forensic evidence, which allows capturing screenshots/clips of user activities on endpoints when a policy is triggered.

Ref: Microsoft Learn - Insider risk forensic evidence

Integrates DLP capabilities with insider risk management

Microsoft introduced Adaptive Protection as part of Purview Insider Risk.

Adaptive Protection uses insider risk signals and DLP together, dynamically adjusting DLP controls (block, restrict, monitor) based on the user's risk level.

This integration reduces false positives and ensures risky users are monitored more strictly while low-risk users are less impacted.

Ref: Microsoft Learn - Adaptive Protection in Microsoft Purview

Other options ruled out:

Adaptive scopes: Used for defining policy targeting groups dynamically, not capturing activities.

Classifiers/Trainable classifiers: Used for content classification, not exfiltration capture or DLP integration.

eDiscovery (Premium): For legal investigations, not insider risk + DLP integration.

Records management: Lifecycle retention, not related to insider risk.

NEW QUESTION # 157

You have a Microsoft 365 E5 tenant that contains a sensitivity label named label1.

You plan to enable co-authoring for encrypted files.
You need to ensure that files that have label1 applied support co-authoring.
Which two settings should you modify? To answer, select the settings in the answer area.
NOTE: Each correct selection is worth one point.

Access control

Use encryption capabilities to control who can access labeled items. Depending on the scope you specified, items can include emails, Office, Fabric and Power BI files, and meeting invites. [Learn more about access control settings](#)

Remove access control settings if already applied to items

Configure access control settings

Turn on co-authoring for Office desktop apps so multiple users can simultaneously edit labeled documents that have access control settings applied. [Learn more about this setting](#)

[Go to co-authoring setting](#)

Assign permissions now or let users decide?

The settings you choose will be automatically enforced when the label is applied to email and Office files.

User access to content expires ⓘ

Access expires this many days after the label is applied

Allow offline access ⓘ

Assign permissions to specific users and groups * ⓘ

0 items

Users and groups	Permissions	Edit	Delete
------------------	-------------	------	--------

No data available

Use dynamic watermarking ⓘ

[Customize text \(optional\)](#)

Use Double Key Encryption ⓘ

Answer:

Explanation:

Access control

Use encryption capabilities to control who can access labeled items. Depending on the scope you specified, items can include emails, Office, Fabric and Power BI files, and meeting invites. [Learn more about access control settings](#)

NEW QUESTION # 158

Hotspot Question

You have a Microsoft 365 ES subscription that contains a user named User1. The subscription contains an Endpoint data loss prevention (Endpoint DLP) policy as shown in the Actions exhibit. (Click the Actions tab.)

^ Actions

Use actions to protect content when the conditions are met.

^ Audit or restrict activities on devices

When specific activities are detected on devices with protected files containing sensitive information you can choose whether to only audit the activity, block it entirely, or block it and allow users to override the restriction.

[Learn more restricting device activity](#)

Service domain and browser activities

Detects when protected files are blocked or allowed to be uploaded to cloud service domains based on the 'Allow/Block cloud service domains' list in endpoint DLP settings.

Upload to a restricted cloud service domain or access from an unallowed browsers ⓘ Audit only ▾

Sensitive service domain group restriction(s) configured. [Edit](#)

Paste to supported browsers ⓘ Audit only ▾

Sensitive service domain group restriction(s) configured. [Edit](#)

You configure the Upload to a restricted cloud service domain or access from an unallowed browsers settings as shown in the Upload restrictions exhibit. (Click the Upload restrictions tab.)

Sensitive service domain restrictions

Enforce different restrictions for sensitive service domains that are defined by the sensitive service domain groups set up in endpoint DLP settings.

+ Add group ↑↓ Reorder ▾ ✕ Clear selection

Group	Priority	Action	
<input type="checkbox"/> Mail Services	1	Block with ov... ▾	
<input type="checkbox"/> File Services	2	Block ▾	
<input type="checkbox"/> Generative AI Websites	3	Block ▾	

You configure the Paste to supported browsers settings as shown in the Paste restrictions exhibit. (Click the Paste restrictions tab.)

Sensitive service domain restrictions

Enforce different restrictions for sensitive service domains that are defined by the sensitive service domain groups set up in endpoint DLP settings.

+ Add group ↑↓ Reorder × Clear selection

Group	Priority	Action
<input type="checkbox"/> Mail Services	1	Block
<input type="checkbox"/> Generative AI Websites	2	Block with ov...

When User1 pastes content into ChatGPT, the user receives the error message shown in the Error exhibit. (Click the Error tab.)

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Statements	Yes	No
	User1 can paste sensitive data from an email to ChatGPT after selecting Dismiss .	<input type="radio"/>	<input type="radio"/>
	User1 can upload emails that contain sensitive data to ChatGPT after selecting Dismiss .	<input type="radio"/>	<input type="radio"/>
	User1 can paste sensitive data from a Microsoft Word document to ChatGPT after selecting Dismiss .	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 can paste sensitive data from an email to ChatGPT after selecting Dismiss .	<input checked="" type="radio"/>	<input type="radio"/>
User1 can upload emails that contain sensitive data to ChatGPT after selecting Dismiss .	<input type="radio"/>	<input checked="" type="radio"/>
User1 can paste sensitive data from a Microsoft Word document to ChatGPT after selecting Dismiss .	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Box 1: Yes

We see:

Paste restrictions, Sensitive service domain restrictions, Generate AI Websites: Action: Block with ov..[Block with override]. User1 can override the block.

Box 2: No

We see:

Upload restrictions, Sensitive service domain restrictions, Generate AI Websites: Action: Block User1 will be blocked.

Box 3: Yes

We see:

Paste restrictions, Sensitive service domain restrictions, Generate AI Websites: Action: Block with ov..[Block with override]. User1 can override the block.

NEW QUESTION # 159

You have a Microsoft SharePoint Online site named Site1 that has the users shown in the following table.

Name	Role
User1	Owner
User2	Member

You create the retention labels shown in the following table.

Name	Retention period	Retention action	Based on
Retention1	4 years	Retain only	When a file was labeled
Retention2	2 years	Retain and delete	When a file was labeled

You publish the retention labels to Site1.

On March 1, 2023, you assign the retention labels to the files shown in the following table.

Name	Modified by	Retention label
File1	User1	Retention1
File2	User1	Retention2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
User1 can delete File1 on March 10, 2023.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can delete File1 on March 10, 2027.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can edit File2 on March 15, 2025.	<input type="radio"/>	<input checked="" type="radio"/>

User1 can delete File1 on March 10, 2023.

No - File1 has Retention1 applied, which retains it for 4 years with a "Retain only" action. This means it cannot be deleted during the retention period, which ends on March 1, 2027.

User2 can delete File1 on March 10, 2027.

No - User2 is a Member and does not have the Owner role, which is required to delete files under retention policies during the retention period. Additionally, the "Retain only" action prevents deletion until the retention period ends on March 1, 2027.

User2 can edit File2 on March 15, 2025.

No - File2 has Retention2 applied, which retains it for 2 years with a "Retain and delete" action. This means the file is protected from edits or deletions during the retention period, which ends on March 1, 2025. Since March 15, 2025, is after the retention period, the file would be eligible for deletion, but the question specifies editing, which is restricted during the retention period.

NEW QUESTION # 160

You have a Microsoft 365 subscription that contains the devices shown in the following table.

Name	Platform	Microsoft Purview	Microsoft Purview client
Device1	Windows 11	Not onboarded	Installed
Device2	Windows 10	Onboarded	Installed
Device3	macOS	Onboarded	Not installed

From which devices can Microsoft Purview Insider Risk Management capture forensic evidence?

- A. Device1, Device2 and Device3
- B. Device only

- C. Device2 and Device3 only
- **D. Device2 only**
- E. Device1 and Device2 only

Answer: D

Explanation:

Forensic evidence in Microsoft Purview Insider Risk Management allows capturing screenshots/clips of user activity on endpoints.

Requirements for forensic evidence capture:

The device must be onboarded to Microsoft Purview (via Defender for Endpoint).

The Microsoft Purview client must be installed.

Supported platforms: Windows 10 and Windows 11 (macOS is not supported for forensic evidence).

Now check each device:

Device1 (Windows 11) # Client installed, but not onboarded ## Not eligible.

Device2 (Windows 10) # Onboarded and client installed ## Eligible.

Device3 (macOS) # Onboarded, but client not installed and macOS is not supported ## Not eligible.

Therefore, only Device2 qualifies.

NEW QUESTION # 161

.....

With the intense competition in labor market, it has become a trend that a lot of people, including many students, workers and so on, are trying their best to get a SC-401 certification in a short time. They all long to own the useful certification that they can have an opportunity to change their present state, including get a better job, have a higher salary, and get a higher station in life and so on, but they also understand that it is not easy for them to get a SC-401 Certification in a short time. If you are the one of the people who wants to get a certificate, we are willing to help you solve your problem.
