### NEW QUESTION # 112

Refer to the exhibit. End users cannot connect to the circular network, and the signal strength is poor. A missing or unknown APN status message is present and the modem status remains in low-power mode.

Which addresses the issue?

- A. Use the device/app-route/statistics vManage resource URI to allow packets reachability to hosts.
- B. Use the device/cellular/status vManage resource URI to ensure sufficient radio signal strength.
- C. Use the device/tools/ping vManage resource URI to allow network device reachability.
- D. Use the system/device/controllers vManage resource URI to set the platform temperature.

**Answer: B**

Explanation:

To resolve the issue of end users not being able to connect to the network and poor signal strength with a missing or unknown APN status message, one should use the device/cellular/status vManage resource URI.

This resource allows for checking the cellular interface's status, including radio signal strength, which is crucial for maintaining a reliable connection. Ensuring that there is sufficient radio signal strength can help resolve connectivity issues and improve network performance. References: Automating Cisco Enterprise Solutions Official Cert Guide
