

# Latest Palo Alto Networks CloudSec-Pro Dumps Questions & CloudSec-Pro Guide

BONUS!!! Download part of RealExamFree CloudSec-Pro dumps for free: <https://drive.google.com/open?id=1ddxVgLOLJ-4ULoRrfs0EgzHIDH4Vu3lc>

One of the top features of Palo Alto Networks CloudSec-Pro exam dumps is the CloudSec-Pro exam passing a money-back guarantee. In other words, your investments with RealExamFree Links to an external site. Palo Alto Networks Palo Alto Networks Cloud Security Professional exam questions are secured with the 100 Palo Alto Networks Cloud Security Professional CloudSec-Pro Exam passing a money-back guarantee. Due to any reason, if you did not succeed in the final CloudSec-Pro exam despite using RealExamFree CloudSec-Pro pdf questions and practice tests, we will return your whole payment without any deduction.

## Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI</li> <li>ML and threat intelligence support incident response, categorization, and prioritization.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Application Security:</b> This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI</li> <li>• CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Cortex Fundamentals:</b> This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Cloud Runtime Security:</b> This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Cloud Posture Security:</b> This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.</li> </ul>

## CloudSec-Pro Guide & CloudSec-Pro Key Concepts

Our Palo Alto Networks CloudSec-Pro test braindump materials is popular based on that too. As we all know the passing rate for exams is low, the wise choice for candidates will select valid Palo Alto Networks CloudSec-Pro test braindump materials to make you pass exam surely and fast. Our Palo Alto Networks CloudSec-Pro test simulations will help you twice the result with half the effort.

## Palo Alto Networks Cloud Security Professional Sample Questions (Q192-Q197):

### NEW QUESTION # 192

Which three fields are mandatory when authenticating the Prisma Cloud plugin in the IntelliJ application?  
(Choose three.)

- A. Prisma Cloud API URL
- B. Access Key
- C. Secret Key
- D. Tags
- E. Asset Name

**Answer: A,B,C**

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-devops-security/use-the-prisma-cloud-plugin-for-intellij.html> When authenticating the Prisma Cloud plugin in the IntelliJ application, the mandatory fields are the Secret Key, Prisma Cloud API URL, and Access Key. These credentials are required to securely authenticate and enable the plugin to communicate with the Prisma Cloud API, ensuring that the plugin can perform its intended functions within the development environment.

### NEW QUESTION # 193

Given the following RQL:

```
event from cloud.audit_logs where operation IN ('CreateCryptoKey', 'DestroyCryptoKeyVersion', 'v1.compute.disks.createSnapshot')
```

Which audit event snippet is identified?

- A.

```
"request": { "resource": "604173093072", "@type": "type.googleapis.com/google.iam.v1.SetIamPolicyRequest", "policy": { "bindings": [
```

- B.

```
{ "Statement": [ { "Action": "*", "Effect": "Allow", "Resource": "*" } ], "Version": "2012-10-17"
```

- C.

```
"payload": { "requestMetadata": { "callerSuppliedUserAgent": "Terraform/0.14.0 (+https://www.terraform.io) Terraform-Plugin-SDK/2.1.0 Terraform-provider-google/3.50.0,gzip(gfe)", "callerIp": "34.265.226.252" }, "request": { "@type": "type.googleapis.com/compute.v1.alpha.CreateSnapshotRequest" },
```

**Answer: C**

Explanation:

<https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-rql-reference/rql-reference/event-query/event-query-examples>

### NEW QUESTION # 194

Which command should be used in the Prisma Cloud twistcli tool to scan the nginx:latest image for vulnerabilities and compliance issues?

- A)
- B)

```
$ twistcli images scan
--address <COMPUTE_CONSOLE>
--username <COMPUTE_CONSOLE_USER>
--password <COMPUTE_CONSOLE_PASSWD>
--details
nginx:latest
```

- C)

```
$ twistcli images scan
--address <COMPUTE_CONSOLE>
--user <COMPUTE_CONSOLE_USER>
--password <COMPUTE_CONSOLE_PASSWD>
--details
nginx:lat
```

- D)

- A. Option C
- B. Option D
- C. Option B
- D. Option A

**Answer: B**

Explanation:

The correct command to scan the nginx:latest image for vulnerabilities and compliance issues using the Prisma Cloud twistcli tool is shown in Option D. This command uses twistcli images scan with specified parameters for the console address, username, and password, and it outputs the results to a file named scan- results.json. This allows for the scanning results to be saved and reviewed in a structured format, which aids in further analysis and tracking of vulnerabilities and compliance issues.

### NEW QUESTION # 195

A customer wants to harden its environment from misconfiguration.

Prisma Cloud Compute Compliance enforcement for hosts covers which three options? (Choose three.)

- A. Hosts without Defender agents
- B. Host cloud provider tags
- C. Docker daemon configuration
- D. Host configuration
- E. Docker daemon configuration files

**Answer: C,D,E**

Explanation:

Prisma Cloud Compute Compliance enforcement for hosts covers several aspects to ensure a secure and compliant host environment, particularly within containerized environments. These include:

\* Docker daemon configuration files: Ensuring that Docker daemon configuration files are set up according to best security practices is crucial. These files contain various settings that control the behavior of the Docker daemon, and misconfigurations can lead to security vulnerabilities.

\* Docker daemon configuration: Beyond just the configuration files, the overall configuration of the Docker daemon itself is critical. This encompasses runtime settings and command-line options that determine how Docker containers are executed and managed on the host.

\* Host configuration: The security of the underlying host on which Docker and other container runtimes are installed is paramount. This includes the configuration of the host's operating system, network settings, file permissions, and other system-level settings that can impact the security of the containerized applications running on top.

By focusing on these areas, Prisma Cloud ensures that not just the containers but also the environment they run in is secure, adhering to compliance standards and best practices to mitigate risks associated with containerized deployments.

### NEW QUESTION # 196

Which Defender type performs registry scanning?

- A. Serverless
- B. RASP
- C. Container
- D. Host

**Answer: C**

Explanation:

In Prisma Cloud, the Defender type responsible for performing registry scanning is the Container Defender.

Registry scanning is crucial for ensuring that container images stored in registries are free from vulnerabilities and compliance issues before they are deployed. Container Defenders scan images within container registries, identifying security risks and ensuring that only secure container images are used in deployment, thereby maintaining the integrity and security of containerized applications.

### NEW QUESTION # 197

.....

If you choose to sign up to participate in Palo Alto Networks certification CloudSec-Pro exams, you should choose a good learning material or training course to prepare for the examination right now. Because Palo Alto Networks Certification CloudSec-Pro Exam is difficult to pass. If you want to pass the exam, you must have a good preparation for the exam.
