We stick to the principle "Credit management first and first class service". While purchasing our 4A0-D01 exam questions, not only you have no need to worry about the quality of our 4A0-D01 exam materials quality but also our service is satisfying on the 4A0-D01 study guide. We promise buyers "Pass Guaranteed" and we only offer the latest 4A0-D01 Training Materials. If you would like to choose safely high passing rate of 4A0-D01 exam torrent materials, our 4A0-D01 learning guide will be the first choice for you.

Nokia 4A0-D01 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> SR Linux User and System Management: This section of the exam measures skills of a Network Automation Specialist and includes managing user roles, TLS configurations for secure communication, and automation features like Zero-Touch Provisioning (ZTP). It covers ZTP setup, configuration processes, and common issues that may arise during deployment.
Topic 2	<ul style="list-style-type: none"> Module 5 – EDA (Event Driven Automation) Introduction
Topic 3	<ul style="list-style-type: none"> SR Linux Logging, Monitoring, and Filtering: This section of the exam measures skills of a Data Center Network Engineer and addresses how to implement logging, monitoring, and traffic filtering in SR Linux. It explains log file usage, ACL types, CPM filtering, and packet capture filters. Configuration tasks involve applying ACLs and monitoring network activity using capture tools.
Topic 4	<ul style="list-style-type: none"> SR Linux Configuration and Routing: This section of the exam measures skills of a Network Automation Specialist and focuses on configuring and managing SR Linux systems. It examines the YANG-driven CLI, JSON output, environment variables, and static and dynamic routing. Learners also explore BGP, ECMP, IP-VRF, MAC-VRF, and the use of VXLAN with EVPN to implement both Layer 2 and Layer 3 overlays, including symmetric and asymmetric models.
Topic 5	<ul style="list-style-type: none"> Nokia DC Fabric Solution: This section of the exam measures skills of a Data Center Network Engineer and covers the architecture and benefits of modern Layer 3 data center networks. It includes an overview of BGP-based routing, VXLAN and EVPN overlays for multi-tenant environments, and key features of the SR Linux operating system. The section also explains how APIs are used for external configuration and introduces the Fabric Services System's management capabilities.

Latest 4A0-D01 Dumps | 4A0-D01 Test Cram Review

The 4A0-D01 dumps of Pass4Test include valid Nokia Data Center Fabric Fundamentals Exam (4A0-D01) questions PDF and customizable 4A0-D01 practice tests. Our 24/7 customer support provides assistance to help 4A0-D01 Dumps users solve their technical hitches during their test preparation. The 4A0-D01 exam questions of Pass4Test come with up to 365 days of free updates and a free demo.

Nokia Data Center Fabric Fundamentals Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which of the following is NOT a function of Nokia's SR Linux application manager?

- A. It translates the application's YANG model into protobufs for the IDB.
- B. It manages the SR Linux and customer-defined applications.
- C. It reads the application's configuration information and starts each application.
- D. It monitors the health of all applications.

Answer: A

Explanation:

The SR Linux application manager does not perform the function of translating an application's YANG model into protobufs for the Interface DataBase (IDB). Its primary roles are managing applications, reading their configuration, and monitoring their health.

NEW QUESTION # 33

Which of the following statements about Nokia's Fabric Services System is FALSE?

- A. Telemetry data is provided in a context that is relevant to the fabric intent.
- B. Digital sandbox provides notification of performance issues in the data center fabric.
- C. Cloud-native design enables easy integration with the customer's environment.
- D. Data center fabric configuration is represented as the fabric intent in a declarative YAML format.

Answer: B

Explanation:

The Digital Sandbox in Nokia's Fabric Services System is primarily used for simulation and validation of fabric intent, not for providing notifications of performance issues.

NEW QUESTION # 34

Which of the following statements about next-hop groups is TRUE?

- A. Multiple static routes can use the same next-hop-group.
- B. CMP destination unreachable message is always sent when blackhole is specified in the next-hop-group.
- C. The next-hop for a next-hop-group must be a local IP address.
- D. A next-hop-group can only specify one next-hop for forwarding

Answer: A

Explanation:

Multiple static routes can share the same next-hop group, enabling efficient reuse of next-hop definitions for load balancing or redundancy.

NEW QUESTION # 35

Which of the following is NOT one of the characteristics of Nokia's SR Linux?

- A. It uses mature and stable SNMP protocol to access the command line interface.
- B. It uses an unmodified Linux kernel that simplifies the use of third party applications.
- C. It uses a modular, state-driven architecture that gives applications efficient access to system information.
- D. It includes a NetOgs development kit that supports the integration of third-party applications.

Answer: A

Explanation:

Nokia's SR Linux does not rely on the SNMP protocol for accessing the command line interface; instead, it uses modern, programmable interfaces aligned with its modular architecture.

NEW QUESTION # 36

Which of the following statements about the YANG model used in Nokia's SR Linux is FALSE?

- A. The YANG model provides a standardized way for applications to retrieve SR Linux configuration and state information.
- B. All configuration and state information is defined as a YANG model.
- C. The YANG model uses a tree structure with "leafs" as the branches and "containers" as the data components.
- D. The YANG model can be converted into other formats such as JSON or XML.

Answer: C

Explanation:

In YANG models, "leafs" are the data nodes (not branches), and "containers" group related data nodes. The statement incorrectly reverses their roles by calling leafs branches and containers data components.

NEW QUESTION # 37

.....

If you are a child's mother, with 4A0-D01 test answers, you will have more time to stay with your if you are a student, with 4A0-D01 exam torrent, you will have more time to travel to comprehend the wonders of the world. In the other worlds, with 4A0-D01 guide tests, learning will no longer be a burden in your life. You can save much time and money to do other things what meaningful. You will no longer feel tired because of your studies, if you decide to choose and practice our 4A0-D01 Test Answers. Your life will be even more exciting.
