Perhaps you still have doubts about our C_ACDET_2506 study tool. You can contact other buyers to confirm. Our company always regards quality as the most important things. The pursuit of quantity is meaningless. Our company positively accepts annual official quality inspection. All of our C_ACDET_2506 real exam dumps have passed the official inspection every year. Our study materials are completely reliable and responsible for all customers. The development process of our study materials is strict. We will never carry out the C_ACDET_2506 Real Exam dumps that are under researching. All C_ACDET_2506 study tool that can be sold to customers are mature products. We are not chasing for enormous economic benefits. As for a company, we are willing to assume more social responsibility.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Topic 3	<ul style="list-style-type: none"> • Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Reliable C_ACDET_2506 Exam Prep - New C_ACDET_2506 Study Notes

We are well-known for our wonderful performance on pushing more and more candidates to pass their C_ACDET_2506 exams and achieve their dreaming certifications. There is no exaggeration to say that with our C_ACDET_2506 study materials for 20 to 30 hours, you will be ready to pass your C_ACDET_2506 Exam. Since our C_ACDET_2506 exam torrent is designed on the purpose to be understood by our customers all over the world, it is compiled into the simplest language to save time and efforts.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q42-Q47):

NEW QUESTION # 42

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. New templates that successfully migrated to the production site are in Draft state.
- B. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. Draft templates on the source site are skipped.

Answer: A,D

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 43

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields. What is the recommended way to handle this scenario?

- A. Suggest the customer put a Word document on the template and capture all information in that document.
- B. Create a Microsoft Form from the Actions menu for managing all the requirements.
- C. Configure as many custom fields as possible for data capture purposes.
- D. Create a dynamic form (dform) where common data can be synced with the project header through customization.

Answer: C

Explanation:

The recommended approach is to configure custom fields for capturing non-standard data in sourcing projects or contracts. Custom fields allow structured data capture directly within SAP Ariba, which can then be fully included in reporting and analytics. Documents like Word files (A) are unstructured and not reportable. Dynamic forms synced with project headers (B) are not supported as standard functionality. External tools like Microsoft Forms (C) do not integrate with SAP Ariba's reporting capabilities. Custom fields can include picklists, validation rules, translations, and help tips, enabling flexible, maintainable data collection aligned with reporting and compliance needs.

NEW QUESTION # 44

A French translation of a custom field label needs to be updated. Where do you update it?

- A. AML & Translations Upload
- B. Field Configuration + Label
- C. Customization Manager - Views
- D. Layout tab

Answer: A

Explanation:

SAP Ariba handles translations for custom field labels, help tips, and validation messages through the AML & Translations Upload mechanism. Administrators export the translation JSON or spreadsheet file, update the French (or other language) entries, and then re-import the updated file to apply translations.

Field Configuration + Label (C) sets the base language label but does not manage translations for other languages. The Customization Manager Views and Layout tabs are unrelated to translation management.

This method centralizes translation management and supports multiple languages consistently across the application.

NEW QUESTION # 45

How can you set the order of your custom Contract Workspace fields? Note: There are 2 correct answers to this question.

- A. Select Field Configuration and under the advanced tab select property Sequence. Fields are sorted by this field in the UL. Once all changes are performed, publish all changes via Customizing Publish.
- B. Navigate to the UI where the class is presented, select Customize in the banner, select Edit, and drag and drop the fields in the order they should be presented. Once all changes are performed, publish all changes via Customizing → Publish
- C. Select Field Configuration, find the class, and select the Layout tab. Here you can drag and drop the order of the fields. Once all changes are performed, publish all changes via Customizing Publish.
- D. The fields are presented in alphabetical order of the field label. By carefully choosing the

Answer: B,C

NEW QUESTION # 46

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Solution Design Matrix
- B. Enablement workbook
- C. Delivery Engagement Readiness Checklist
- D. Deployment Overview

Answer: C

NEW QUESTION # 47

.....
