The structure of the Plan Summary Layout is a predefined \_\_\_\_\_.

- A. Supply Demand Workbench
- B. Set of Exceptions
- C. Group of Reports
- D. Material Plan view
- E. Set of Infotiles

Answer: E

Explanation:

In Oracle Planning and Collaboration Cloud, the Plan Summary Layout serves as a predefined set of infotiles.

These infotiles are customizable and provide users with a visual summary of critical planning metrics, such as supply, demand, exceptions, and resource utilization. The purpose of these infotiles is to give planners an at-a-glance overview of key performance indicators (KPIs) within the planning process, allowing them to quickly assess areas that may need attention or adjustment.

The Plan Summary Layout is an integral part of the Planning Central feature, which enables the display of aggregated data in an organized format. This helps to streamline decision-making by summarizing complex data in a visually intuitive manner. Each infotile can be further drilled down to display more detailed information, supporting planners in making informed decisions based on comprehensive data.

Referencing official Oracle documentation, the Plan Summary Layout and its associated infotiles are fundamental components of the Planning Central module in Oracle Planning and Collaboration Cloud, facilitating efficient planning and collaboration across supply chain processes.
