## Salesforce Certified Advanced Administrator Sample Questions (Q35-Q40):

### NEW QUESTION # 35

An administrator has been tasked with sending an email notification to all project team members when project status is changed to Allocated. Project teams contain users from different departments and different roles.

How should an administrator ensure the proper users will receive the email?

- A. Move the project users to the same role and send the email alert to everyone in the role.
- B. Create public groups for each project team and send the email alert to the project group.
- C. Configure a queue for the project team and have members view the queue's list view.

- D. Use sharing rules to automatically share with the individual users in the project team.

**Answer: B**

Explanation:

Public groups let you share records with a set of users defined by criteria such as role, profile, or individual users. You can use public groups as recipients for email alerts in workflow rules or process builder.

### NEW QUESTION # 36

AW Computing created new multi-tier service plans. The primary difference between the packages is the length of the term. The company wants to capture start and end dates for each service plan sold, which can differ from the contract dates of the subscription. How should an administrator ensure the data is captured properly?

- A. Build a validation rule on the Opportunity object to require custom date fields based on the product(s) selected.
- B. Configure formula fields to reflect the close date of the opportunity.
- **C. Make a validation rule on the Opportunity Product object to require custom date fields based on the product family.**
- D. Create a new price book for service plans with term lengths.

**Answer: C**

Explanation:

Make a validation rule on the Opportunity Product object to require custom date fields based on the product family is how the administrator should ensure the data is captured properly. A validation rule is a way to enforce data quality and integrity.
