FCP_FWB_AD-7.4 Practice Engine - FCP_FWB_AD-7.4 Latest Exam Book

With the intense competition in labor market, it has become a trend that a lot of people, including many students, workers and so on, are trying their best to get a FCP_FWB_AD-7.4 certification in a short time. They all long to own the useful certification that they can have an opportunity to change their present state, including get a better job, have a higher salary, and get a higher station in life and so on, but they also understand that it is not easy for them to get a FCP_FWB_AD-7.4 Certification in a short time. If you are the one of the people who wants to get a certificate, we are willing to help you solve your problem.

Fortinet FCP_FWB_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Encryption, Authentication, and Compliance: This section of the exam assesses the expertise of Security Analysts in mitigating web application vulnerabilities through encryption and authentication mechanisms. Candidates must configure various access control methods, track user authentication, and prevent attacks targeting authentication systems. They must also implement SSL inspection and offloading techniques to enhance security and troubleshoot encryption or authentication-related issues effectively.
Topic 2	<ul style="list-style-type: none"> • Web Application Security: This domain evaluates the ability of Cybersecurity Specialists to implement advanced threat mitigation strategies using FortiWeb. Candidates must configure the system to block known attacks, ensure comprehensive web application protection, and troubleshoot threat detection or mitigation-related issues. Additionally, they are expected to set up API protection mechanisms to secure web-based interactions from potential threats.

Topic 3	<ul style="list-style-type: none"> • Deployment and Configuration: This section of the exam measures the skills of Network Security Engineers and covers the ability to identify FortiWeb deployment requirements and configure essential system settings. Candidates are expected to set up server pools, security policies, and protected hostnames to ensure seamless deployment. To maintain operational efficiency, they must also configure FortiWeb high availability (HA) for fault tolerance and troubleshoot deployment or system-related issues.
Topic 4	<ul style="list-style-type: none"> • Machine Learning (ML): This section tests the skills of Application Security Engineers in leveraging machine learning to enhance web application security. Candidates will configure machine learning algorithms to detect anomalies, mitigate bot-based threats, and secure APIs through AI-driven analysis. Understanding how to fine-tune these ML-based security measures is crucial for ensuring robust application protection against evolving cyber threats.

Fortinet FCP - FortiWeb 7.4 Administrator Sample Questions (Q139-Q144):

NEW QUESTION # 139

What must you do with your FortiWeb logs to ensure PCI DSS compliance?

- A. Store in an off-site location
- B. Erase them every two weeks
- C. Enable masking of sensitive data
- D. Compress them into a .zip file format

Answer: C

NEW QUESTION # 140

You are using HTTP content routing on FortiWeb. You want requests for web application A to be forwarded to a cluster of web servers, which all host the same web application. You want requests for web application B to be forwarded to a different, single web server.

Which statement regarding this solution is true?

- A. The server policy always applies the same web protection profile to both web application A and web application B.
- B. You must create static routes on the FortiWeb to allow these requests.
- C. You must chain policies so that all requests go to the virtual server for policy A first, and then redirect requests for web application B to go to the virtual server for policy B
- D. You must put the single web server for application B into a server pool and use it with HTTP content routing.

Answer: D

Explanation:

To forward requests for web application B to a single web server, you would configure FortiWeb to use HTTP content routing and create a server pool specifically for web application B. In FortiWeb, server pools are used to group servers together based on application requirements, and you can configure the pool to contain only a single web server for application B.

NEW QUESTION # 141

Under what circumstances would you want to use the temporary uncompress feature of FortiWeb?

- A. In the case of the file being an .MP4 video
- B. In the case of compression being done on the web server, to inspect the content of the compressed file.
- C. In the case of compression being done on the FortiWeb, to inspect the content of the compressed file
- D. In the case of the file being a .MP3 music file

Answer: B

NEW QUESTION # 142

Which of the following is a common challenge when implementing bot mitigation techniques?

- A. Incompatibility with web browsers
- B. Increased server response times
- C. Lack of support for mobile devices
- D. Difficulty in distinguishing between legitimate and malicious bots

Answer: D

NEW QUESTION # 143

FortiWeb offers the same load balancing algorithms as FortiGate.

Which two Layer 7 switch methods does FortiWeb also offer? (Choose two.)

- A. Round robin
- B. HTTP user-based round robin
- C. HTTP session-based round robin
- D. HTTP content routes

Answer: A,D

NEW QUESTION # 144

.....

How can our FCP_FWB_AD-7.4 study questions are so famous and become the leader in the market? Because our FCP_FWB_AD-7.4 learning braindumps comprise the most significant questions and answers that have every possibility to be the part of the real exam. As you study with our FCP_FWB_AD-7.4 Practice Guide, you will find the feeling that you are doing the real exam. Especially if you choose the Software version of our FCP_FWB_AD-7.4 training engine, which can simulate the real exam.
