Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In SAP Cloud ALM
- C. In the Business Driven Configuration Questionnaire
- D. In the Digital Discovery Assessment

**Answer: D**

Explanation:

Documenting the initial list of known integrations is a key step in planning the SAP S/4HANA Cloud Public Edition implementation. The correct tool or process must be identified to ensure accurate capture of integration needs.

\* Option A: In SAP Cloud ALM Incorrect. SAP Cloud ALM is used to manage implementation tasks and requirements but is not the primary tool for initially documenting integration requirements. The SAP Cloud ALM Documentation states, "SAP Cloud ALM

supports requirement management, but initial integration lists are typically captured in earlier discovery tools."

\* Option B: In the Digital Discovery AssessmentCorrect. The Digital Discovery Assessment, conducted during the Discover phase, is designed to capture the initial list of known integration requirements. TheSAP S/4HANA Cloud Implementation Guideconfirms, "The Digital Discovery Assessment includes sections to document known integration requirements, ensuring that all necessary interfaces are identified early in the project."

\* Option C: In the Business Driven Configuration QuestionnaireIncorrect. The Business Driven Configuration Questionnaire (BDCQ) is used to gather configuration values and validate solution fit during the Explore phase, not to document initial integration requirements. TheSAP Activate Methodology Guidenotes, "BDCQs focus on configuration details, not high-level integration planning."

\* Option D: In the Fit-to-Standard WorkshopsIncorrect. Fit-to-Standard workshops, conducted in the Explore phase, refine integration requirements but do not serve as the initial documentation point. The SAP S/4HANA Cloud Study Guideexplains, "Integration requirements are validated and detailed in Fit- to-Standard workshops, building on the initial list from the DDA." Extract from Official Documentation:

\* SAP S/4HANA Cloud Implementation Guide(<https://help.sap.com>): "The Digital Discovery Assessment is the first step in identifying integration requirements, capturing a preliminary list of systems and interfaces that will connect with SAP S/4HANA Cloud."

\* SAP Activate Methodology Guide: "The Discover phase uses the Digital Discovery Assessment to document initial integration needs, which are later refined in the Explore phase." Additional Context:

The DDA's role in capturing integration requirements ensures that the project team has a clear understanding of the system landscape early on, facilitating effective planning and resource allocation.
