So our AD0-E117 learning questions will be your indispensable practice materials during your way to success.

Adobe Experience Manager Architect Master Sample Questions (Q61-Q66):

NEW QUESTION # 61

An organization is transitioning its digital platform to AEMaaS. The lead architect is overseeing the transition and ensuring that the platform remains robust and offers a consistent user experience. The team has already performed general functionality tests. As the launch date approaches, the team is focusing on potential real-world challenges, such as the platform's behavior under high-user

traffic and communicating with third- party services.

Which two types of testing should the architect prioritize next to ensure a seamless transition to AEMaaS?
(Choose two.)

- **A. Integration Testing**
- B. Unit Testing
- **C. Load Testing**
- D. Usability Testing

Answer: A,C

NEW QUESTION # 62

A customer has an international presence and a strong brand image. The customer considers the exceptional quality images used for both print and on the website to be essential for its business. The customer uses AEM 6.5 managed services with a configuration of 2 dispatchers, 2 publishers, and 1 author.

The original images can weigh up to 500Mb with videos weighing even more. Renditions are generated after files are uploaded to AEM DAM by the Design team so the Authoring team can use them on the website.

The teams report issues with platform stability and slowness. Visitors report that images look pixelated on some screens and pages are very slow to load.

Which two actions should the Architect take to resolve these issues? (Choose two.)

- **A. Optimize renditions for the different viewports used by the visitors**
- B. Allocate more memory to ImageMagick and FFmpeg
- **C. Split AEM Assets and Sites in two different stacks and use Connected Assets**
- D. Add more dispatchers and publishers to the AEM configuration
- E. Train the design team to upload smaller assets and save the originals elsewhere

Answer: A,C

Explanation:

"optimizing renditions for different viewports can improve the image quality and page load speed for visitors. Splitting AEM Assets and Sites in two different stacks and using Connected Assets can reduce the load on the author server and improve platform stability".

NEW QUESTION # 63

A large retail customer is building their ecommerce platform on AEM. Several third-party vendors sell products through their site. Those vendors need to review and verify the content close to production before the content goes live and the customer wants to provide them a restricted environment.

Which approach should the Architect recommend?

- A. Use the Preview Capabilities of AEM Author Server
- B. Give third-party vendors access to the Author Server
- **C. Add a Publish (preview) Server and provide access**
- D. Export content as PDF and share with the vendors

Answer: C

Explanation:

According to Adobe Experience Manager documentation¹, a publish (preview) server is a publish instance that is used for previewing content before it goes live on the production server. This can be useful for verifying content with third-party vendors or other stakeholders who need restricted access.

NEW QUESTION # 64

An enterprise client is on-boarding an AEM Desktop application to provide authors with the ability to load the AEM repository virtually on the file system. The desktop application is unable to connect to the AEM Author, which has SSL enabled. The intermediate certificate is installed on Apache.

How should an Architect resolve this issue?

- A. Install the certificate chain to the AEM truststore
- B. Install the certificate chain to the keystore of the AEM ssl-service user
- **C. Install the Root certificate to the AEM truststore**
- D. Install the certificate chain to the keystore of the AEM authentication service user

Answer: C

NEW QUESTION # 65

A client is using AEM and wants to make sure they are managing their configurations correctly. Refer to the following requirements: The client has multiple brands that they will be hosting on a single AEM implementation. The client wants to reuse as much between brands as possible. Each brand needs to be able to override the default values for items like contact us information. The client plans to support multiple languages in multiple regions for each brand. Each brand/language/region combination will have its own set of content approvers used as part of a custom workflow. Which approach should an Architect recommend to manage the client's configurations for AEM?

- A. Use Context-aware configurations to manage configuration overrides and approval group by brand/language/region combination.
- B. Use the OOTB Configuration Browser to set configuration defaults and approval group by brand/language/region combination.
- **C. Use OSGi to manage approval group and provide default contact us information by runmode.**
- D. Use OSGi Configuration to handle configuration overrides by brand. Create a new workflow for each brand/language/region combination for content approval.

Answer: C

NEW QUESTION # 66

.....

As an old saying goes: Practice makes perfect. Facts prove that learning through practice is more beneficial for you to learn and test at the same time as well as find self-ability shortage in AD0-E117 test prep. The PC test engine of our AD0-E117 exam torrent is designed for such kind of condition, when the system of the AD0-E117 Exam Torrent has renovation of production techniques by actually simulating the test environment. Until then, you will have more practical experience and get improvement rapidly through our AD0-E117 quiz guide.
