## 100% Pass-Rate Study CCSE-204 Demo & Useful Reliable CCSE-204 Exam Bootcamp & Correct New CCSE-204 Test Labs

We guarantee you that our top-rated CrowdStrike CCSE-204 practice exam will enable you to pass the CrowdStrike CCSE-204 certification exam on the very first go. The authority of CrowdStrike Certified SIEM Engineer CCSE-204 Exam Questions rests on its being high-quality and prepared according to the latest pattern.

### CrowdStrike Certified SIEM Engineer Sample Questions (Q11-Q16):

#### NEW QUESTION # 11

You want a Next-Gen SIEM dashboard to update automatically when new data is available. Which action would you take?

- A. Change the "Relative Time Range" interval to 1 millisecond ago
- **B. Toggle the "Live" button to on**
- C. Change the "Start Time" interval to 1 hour
- D. Change the "Fixed Time Range" to the current date

**Answer: B**

Explanation:

The correct answer is A . CrowdStrike LogScale documentation says the Live checkbox controls whether dashboard widget queries run as live or static queries. When enabled, the dashboard continuously updates with real-time data , which is exactly what the question asks for.

#### NEW QUESTION # 12

When deploying the Falcon Log Collector using the commands in the CrowdStrike Fleet Management interface, what is the correct service name?

- A. flc-collector
- B. flc-api
- C. humio-collector
- **D. logscale-collector**

**Answer: D**

Explanation:

The correct answer is C. logscale-collector .

CrowdStrike's Falcon LogScale Collector installation documentation states that the service name varies by installation method. It explicitly says that for Full Installation the service is called logscale-collector , while Custom Installation uses humio-log-collector . Since the question specifically refers to deployment using the Fleet Management interface commands , that aligns with the Full Installation workflow, so the correct service name is logscale-collector .

#### NEW QUESTION # 13

Which combination of scope and permissions must be configured to create an API token that allows you to create and get the results of a query job in Next-Gen SIEM?

- A. NGSiem with write permissions only
- **B. NGSiem with both read and write permissions**
- C. NGSiem with read permissions only
- D. NGSiem with both write and execute permissions

**Answer: B**

Explanation:

The correct answer is C. NGSiem with both read and write permissions .

CrowdStrike integration guidance for querying Next-Gen SIEM event data states that the API client needs the NGSiem scope with both Read and Write permissions . The documentation explains why: Write is required to create the search/query job, and Read is required to retrieve the query results.

Why the other options are incorrect:

A is incorrect because the documented requirement is Read + Write ; there is no documented "execute" permission in the cited guidance. B is incorrect because read-only access would let you read results but not create the query job. D is incorrect because write-only access would let you submit the job but not read the results back.

#### NEW QUESTION # 14

You are creating a correlation rule in Next-Gen SIEM to trigger alerts based on when the event occurred, regardless of when the event was ingested.

Which event timestamp should you select?

- A. @ingesttimestamp
- **B. @timestamp**
- C. @localtimestamp
- D. @systemtimestamp

**Answer: B**

Explanation:

The correct answer is A. `@timestamp` .

CrowdStrike LogScale documentation explains that `@timestamp` is the event timestamp, meaning when the event actually happened, while `@ingesttimestamp` is when the event arrived in LogScale. If you want the rule to fire based on when the event occurred, regardless of ingestion delay, you should use `@timestamp` .

Why the other options are incorrect:

D). `@ingesttimestamp` is specifically the ingest time, not the original event time.

B and C are not the standard event-time fields documented for this use. CrowdStrike's event field documentation centers this distinction on `@timestamp` versus `@ingesttimestamp`.

### NEW QUESTION # 15

Which two tags are compliant with the CrowdStrike Parsing Standard (CPS)?

- A. `#observer.type` and `#vendor.name`
- B. `#observer.type` and `#event.kind`
- C. `#event.type` and `#event.kind`
- D. `#vendor.name` and `#event.type`

**Answer: B**

Explanation:

The correct answer is C. `#observer.type` and `#event.kind` .

CrowdStrike's CPS migration documentation lists the CPS-compliant parser tags, including `#event.dataset` , `#event.kind` , `#event.module` , and `#observer.type` . Since both `#observer.type` and `#event.kind` are explicitly listed, option C is the correct pair.

Why the other options are incorrect:

The documentation lists `#Vendor` as a tag, not `#vendor.name` , and it does not list `#event.type` among the CPS parser tags in the tag list. That makes options A, B, and D incorrect.

### NEW QUESTION # 16

.....

The Actualtests4sure offers latest CrowdStrike Certified SIEM Engineer CCSE-204 exam questions and answers, with CrowdStrike CCSE-204 exam practice test questions you can ace your CrowdStrike CCSE-204 exam preparation simply and quickly and pass the final CCSE-204 Exam easily. The CrowdStrike CCSE-204 exam practice test questions will assist you in CrowdStrike CCSE-204 exam preparation.

**Reliable CCSE-204 Exam Bootcamp:** <https://www.actualtests4sure.com/CCSE-204-test-questions.html>

CrowdStrike Study CCSE-204 Demo So you don't need to wait for a long time and worry about the delivery time or any delay, At the same time, our customer service center will receive the feedbacks and the deal with the problem which our users of CCSE-204 VCE dumps questions put forward, There is an undoubted improvement in technology and knowledge, and we also improve our CCSE-204 exam questions with more versions in the future, so if can choose us with confidence and you will not regretful, It is universally accepted that the pass rate is the most convincing evidence about how useful and effective the CCSE-204 test torrent materials are, and our training materials can assert themselves with the highest pass rate in the field.

In order to remember this I use the rule that if the trust is described **Study CCSE-204 Demo** as outgoing then it is coming from a trusting network, whereas if the trust is incoming it is from a trusted network.

## Boost Your Confidence with Online CrowdStrike CCSE-204 Practice Test Engine

While they are not as of this writing) explicitly supported by the ``java.io`` and `Reliable CCSE-204 Exam Bootcamp `java.net`` classes, enough of the ingredients are provided to allow construction of designs that can attain good performance in these kinds of situations.

So you don't need to wait for a long time and **Study CCSE-204 Demo** worry about the delivery time or any delay, At the same time, our customer service center will receive the feedbacks and the deal with the problem which our users of CCSE-204 VCE Dumps questions put forward.
