SAP C-OCM-2503 認定試験の出題範囲：

トピック	出題範囲
トピック 1	変革の有効性：このセクションでは、パフォーマンスアナリストと変革アナリストのスキルを測定し、変革管理戦略がどの程度効果的に実行されているかを評価します。これには、主要業績評価指標（KPI）の評価、フィードバックの収集、そしてデータに基づく改善の実施などが含まれており、組織変革の取り組みの長期的な有効性を高めます。
トピック 2	変革支援：この試験セクションでは、トレーニングおよび開発マネージャーのスキルを評価し、従業員が新しいシステムやプロセスに適応するために必要な知識とスキルを身に付けられるようにすることに重点を置いています。SAPソリューションのスムーズな導入を支援するためのユーザートレーニングプログラム、コーチング戦略、サポートメカニズムなどが含まれます。
トピック 3	組織変更管理の構築：この試験セクションでは、変更管理コンサルタントのスキルを評価し、組織変更管理フレームワークの構築における基礎的な側面を網羅します。変更管理の原則の定義、ビジネス目標との整合性確保、そしてSAP環境における変革イニシアチブに向けてすべての関係者が準備を整えていることの確認などが含まれます。

あなたは今SAPのC-OCM-2503試験のために準備していますか。そうであれば、あなたは夢がある人だと思います。我々Topexamはあなたのような人に夢を叶えさせるという目標を持っています。我々の開発するSAPのC-OCM-2503ソフトは最新で最も豊富な問題集を含めています。あなたは我々の商品を購入したら、一年間の無料更新サービスを得られています。我々のソフトを利用してSAPのC-OCM-2503試験に合格するのは全然問題ないです。

SAP Certified Associate - Organizational Change Management 認定 C-OCM-2503 試験問題 (Q23-Q28):

質問 # 23

What are typical topics covered by a change story for a cloud implementation? Note: There are 3 correct answers to this question.

- A. Non-targets
- **B. Risks and issues**
- **C. Key facts and figures**
- D. Training and enablement offerings
- **E. Benefits and investments**

正解: B、C、E

質問 # 24

The project lead initiates a series of info sessions in some teams as a reaction to resistance towards the upcoming implementation of a new cloud solution. Unfortunately, these info sessions do not reduce the level of resistance. What is the probable root cause?

- A. Lacking commitment of the top management regarding the info sessions
- **B. Lacking analysis of the underlying reasons for resistance towards the new cloud solution**
- C. Lacking involvement of the change manager in the planning and conduction of the info sessions
- D. Lacking options for the users to raise questions during the info sessions

正解: B

解説:

Resistance in SAP cloud projects (e.g., to S/4HANA standardization) often persists if root causes aren't addressed, and info sessions alone may fail. Option B is correct because without analyzing why users resist- e.g., fear of losing control (cloud hosting), process mismatch (standardization), or skill gaps (new UI)- sessions become generic, missing the mark. For instance, if resistance stems from data security concerns, a session on "project benefits" won't help without tackling that fear directly; analysis (e.g., via surveys) could reveal this, enabling targeted messaging.

Option A is incorrect-while Q&A options improve engagement, their absence doesn't inherently sustain resistance; content relevance does. Option C is incorrect; the change manager's involvement enhances execution, but the project lead can run sessions-lack of analysis, not personnel, is key. Option D is incorrect-top management commitment boosts credibility, but resistance persists if underlying issues remain unaddressed. SAP OCM stresses understanding resistance drivers for effective intervention.

"Resistance persists without analyzing its root causes; info sessions must address specific concerns identified through stakeholder feedback to be effective" (SAP OCM Framework, Resistance Management).

質問 # 25

How are users impacted by the implementation of an SAP cloud solution? Note: There are 2 correct answers to this question.

- **A. They must get accustomed to ongoing change**
- **B. They must adopt the new best-practice processes**
- C. They must customize the solution according to their specific needs
- D. They must prepare for a long implementation process

正解: A、B

解説:

SAP cloud solutions (e.g., S/4HANA Cloud) reshape user experience. Option A is correct-users must adopt best-practice processes (e.g., standardized procurement) over custom legacy ways, a core shift requiring adaptation-e.g., learning a new UI instead of old shortcuts. Option C is correct as ongoing change-e.g., quarterly releases with new features-demands continuous adjustment, unlike static on-premise systems, impacting daily work patterns.

Option B is incorrect-implementation length affects project teams, not users directly; their impact is post-go-live. Option D is incorrect-users don't customize cloud solutions (a technical task); they adapt to pre-configured standards. SAP OCM focuses on process and change adaptation.

"Users are impacted by adopting best-practice processes and adjusting to ongoing changes from cloud solution updates" (SAP Activate, User Impact Overview).

質問 # 26

What should you do as a change manager to ensure a good start to change management in an SAP cloud project? Note: There are 3 correct answers to this question.

- A. Manage expectations towards change management.
- B. Collect as many ideas for change management as possible.
- C. Develop a detailed plan for change management.
- D. Identify and assign resources and define responsibilities.
- E. Conduct a thorough as-is analysis.

正解: A、D、E

解説:

A strong start in SAP OCM (typically in the Prepare phase) requires readiness assessment and alignment.

Option B is correct because an as-is analysis (e.g., change culture, capabilities) establishes a baseline. Option D is correct as managing expectations ensures stakeholders understand OCM's scope and limits, preventing misalignment. Option E is correct because identifying resources and roles (e.g., change agents) ensures execution capacity. Option A is incorrect-collecting ideas is unstructured and not a priority early on. Option C is incorrect; a detailed plan evolves later (Explore phase), not at the start.

Extract from SAP OCM Concepts: SAP Activate's Prepare phase emphasizes readiness analysis, expectation management, and resource assignment (SAP OCM Framework).

質問 # 27

Which communication assets are usually developed at an early stage of an SAP cloud project? Note: There are 2 correct answers to this question.

- A. A glossary explaining typical SAP and business terms used in the cloud context
- B. An FAQ list describing the key change impacts for different user groups
- C. A modular overview presentation providing generic project information
- D. A cheat sheet giving hands-on advice about how to use the new cloud system

正解: A、C

解説:

Early-stage communication assets in SAP OCM (Prepare/Explore phases) aim to build awareness and understanding. Option B is correct because a modular overview presentation (e.g., slides on project goals, timeline, benefits) provides generic, reusable information for initial stakeholder briefings, such as kick-off meetings. Its modularity allows customization for different audiences (e.g., executives vs. users). Option C is correct as a glossary of SAP terms (e.g., "fit-to-standard," "S/4HANA") and business jargon clarifies terminology, reducing confusion in a cloud context where new concepts abound.

Option A is incorrect-an FAQ on change impacts requires detailed CIA insights, which come later (Explore/Realize). Option D is incorrect; a cheat sheet with system usage tips is an enablement tool developed closer to go-live (Realize/Deploy), not early on. SAP OCM prioritizes foundational assets to set the stage for later specifics.

"Early communication assets include a modular project overview presentation and a glossary of SAP and business terms to establish clarity and awareness" (SAP Activate, Early Communication Deliverables).
