100% Pass Salesforce - Unparalleled Arch-303 - Salesforce Certified B2C Commerce Architect Exam Details

Allowing for there is a steady and growing demand for our Arch-303 real exam with high quality at moderate prices, we never stop the pace of doing better. All newly supplementary updates of our Arch-303 exam questions will be sent to your mailbox one year long. And we shall appreciate it if you choose any version of our Arch-303 practice materials for exam and related tests in the future.

Salesforce Certified B2C Commerce Architect Sample Questions (Q46-Q51):

NEW QUESTION # 46

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations. Which environment should be used as the ideal environment for this kind of load test?

- A. The Development Instance of a rental Realm
- **B. The Development Instance of the existing Realm**
- C. The Production Instance of a rental Realm
- D. The Production instance of the existing Realm

Answer: B

Explanation:

For conducting load testing of new integrations with a payment provider and Order Management System, it is recommended to use the Development Instance of the existing Realm (Option B). This approach ensures that any issues found during testing do not affect the live production environment, while still allowing tests to be conducted in an environment that mirrors the production setup as closely as possible. This minimizes the risk of disruptive downtime or customer-facing errors when the integration goes live.

NEW QUESTION # 47

During code review, the Architect found that there is a service call on every visit of the product detail woe (PDP). What best practices should the Architect ensure are followed for the service configuration?

Choose 2 answers

- A. Service logging is disabled.
- B. Service timeout is set.
- C. Circuit breaker is enabled.
- **D. Service mock up call is configured.**

Answer: D

Explanation:

For logging practices in a complex LINK cartridge integration, the recommendation is:

* Get logger for cartridge-specific category (C): This practice allows for more precise and relevant logging by focusing on the specific cartridge, making troubleshooting more efficient.

* Report debug level message for the back-end asynchronous communication: This ensures that all detailed interactions are logged, providing valuable data for diagnosing issues.

* Report all errors at error level message: This categorizes all critical issues under error logs, which is essential for quick identification and resolution of problems affecting the system's operations.

This structured logging strategy enhances the ability to monitor and troubleshoot the system effectively, especially in complex integrations where multiple components interact asynchronously.

NEW QUESTION # 48

The Client is planning to switch to a new Payment Service Provider (PSP). They have approached an Architect to understand the time and effort to integrate the new PSP. The PSP offers a LINK cartridge compatible with SiteGenesis Pipelines, but the Client's website is built on Controllers.

Which two options should the Architect take into consideration before starting analysis? Choose 2 answers

- A. Produce a proof of concept converting the most essential pipelines into controllers and integrate the cartridge.
- **B. Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers.**
- C. Look for a different PSP that supports controllers and would not require conversion efforts.
- **D. Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development**

Answer: B,D

Explanation:

When integrating a new Payment Service Provider (PSP) LINK cartridge designed for SiteGenesis Pipelines into a site built on Controllers, consider these options:

* Option A (Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers): Assessing the effort involved in converting the cartridge provides insight into the project scope, helping to manage risk and allocate resources effectively.

* Option B (Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development): This can potentially save significant development time and resources if a compatible version is already planned or in progress.

These approaches help in making an informed decision on integration strategies, balancing between customization efforts and leveraging existing solutions.

NEW QUESTION # 49

A developer is remotely fetching the reviews for a product.

Assume that it's an HTTP GET request and caching needs to be implemented, what consideration should the developer keep in mind for building the caching strategy?

- A. Remote include with caching only the reviews
- B. Cache the HTTP service request
- C. Use custom cache
- **D. Cached remote include with cache of the HTTP service**

Answer: D

Explanation:

For efficient caching of HTTP GET requests used to fetch product reviews, the best practice is to use a cached remote include combined with caching of the HTTP service itself (Answer D). This method involves caching the output of the remote service call at

the service layer and reusing it for subsequent requests. This approach minimizes the number of calls to the remote service, reduces load times, and ensures that the displayed reviews are up-to-date as per the cache's freshness settings. It optimally balances the performance benefits of caching with the need to keep content like reviews current.

NEW QUESTION # 50

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by *total time" column. The following come as the top Ave items:

Controller Name	Function	Hits	Total Time	Average Time	Minimum Time	Maximum Time
Product	Detail	38,880	23,608,640	607	39	2,311
Search	Show	32,400	15,630,360	464	107	1,143
Home	IncludeHeaderMenu	5,184	10,776,564	2,079	2,056	2,200
Product	HitTile	239,760	7,944,480	33	10	245
Product	ShowInCategory	38,880	2,663,280	69	33	100

Which controller should the Architect focus on to further investigate the performance issue?

- A. Search Show as this Is one of the key controllers that the customer uses
- B. Product-HitTile as it has the highest hits during the load test.
- **C. Product-Detail as It has the highest total time and highest maximum time.**
- D. Home-IncludeHeaderMenu as It has highest average time.

Answer: C

Explanation:

Focusing on the 'Product-Detail' controller is prudent given that it has the highest total time and the highest maximum time (Answer C), suggesting that it significantly contributes to the overall load and potential slowdowns on the site. By analyzing and optimizing this controller, the architect can potentially achieve the most substantial improvement in performance. Efforts might include optimizing database queries, caching frequently requested data, or simplifying complex logic in the Product-Detail page's processing.

NEW QUESTION # 51

.....

Our Salesforce Arch-303 Practice Materials are compiled by first-rank experts and Arch-303 Study Guide offer whole package of considerate services and accessible content. Furthermore, Salesforce Certified B2C Commerce Architect Arch-303 Actual Test improves our efficiency in different aspects. Having a good command of professional knowledge will do a great help to your life.

Arch-303 Testdump: <https://www.exams4collection.com/Arch-303-latest-braindumps.html>

Salesforce Arch-303 Exam Details The demo questions are part of the complete dumps, For Software Version materials, it is offered to give the candidates simulate the Arch-303 exam in a real environment, Confronting obstacles or bottleneck during your process of reviewing, our Arch-303 practice materials will fix all problems of the exam and increase your possibility of getting dream opportunities dramatically, And we can assure you that you will get the latest version of our Arch-303 training materials for free from our company in the whole year after payment on Arch-303 practice quiz.

To help you keep your digital images organized, Photogene allows you to view and edit metadata associated with each edited image, Good news comes that the Arch-303 actual braindumps of our company can do away with the agony that you suffer from by working out all your problems and making the learning go smoothly and efficiently, in that way which ensures your success of the Arch-303 test and fulfills your dream of the ideal occupation.
