高質量的C_IBP_2502考試大綱|第一次嘗試輕鬆學習並通過考試&可靠的C_IBP_2502：SAP Certified Associate - SAP IBP for Supply Chain

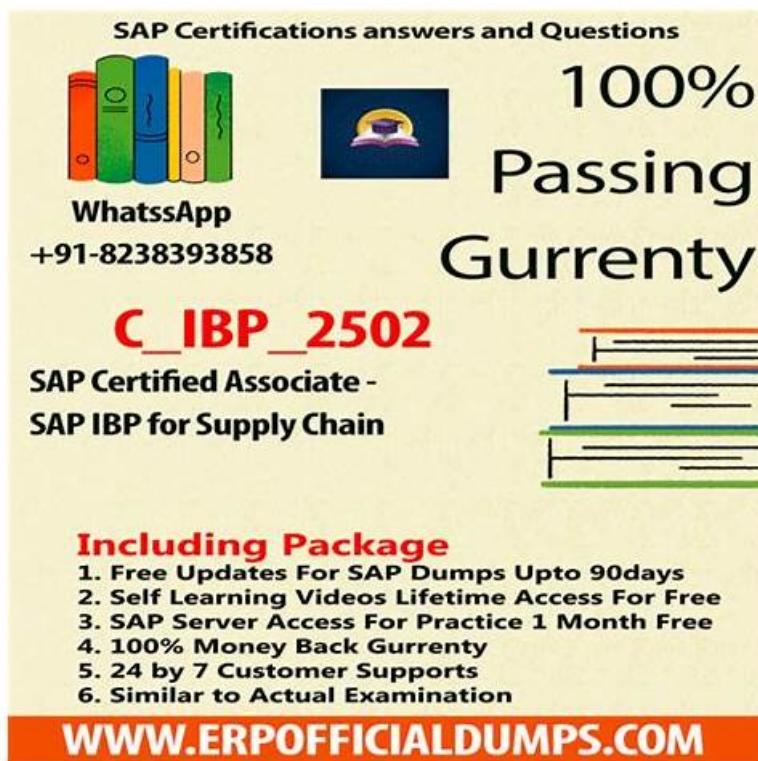

一般的SAP認證考試是C_IBP_2502專家利用專業經驗研究出來的考試題和答案。而Fast2test正好有這些行業專家為你提供這些考試練習題和答案來幫你順利通過考試。我們的Fast2test提供的考試練習題和答案有100%的準確率。購買了Fast2test的產品你就可以很容易地獲得SAP的認證證書，這樣你在SAP行業中又有了個非常大的提升。

SAP C_IBP_2502 考試大綱：

主題	簡介
主題 1	• Demand Planning: This section measures the skills of demand planners and focuses on the core concepts of demand planning. It includes understanding forecasting techniques, demand sensing, and demand propagation. Candidates are tested on their ability to manage demand signals and align planning with business objectives.
主題 2	• Master Data: This section is relevant to master data specialists and focuses on managing essential data for planning activities. It includes an understanding of product, location, and resource master data within SAP. Candidates will be tested on how to maintain accurate and consistent data to support planning functions.
主題 3	• Model Supply Processes: This section assesses the expertise of supply chain planners in designing and managing supply processes. It includes setting up sourcing, inventory management, and supply constraints. Candidates will be evaluated on their ability to model supply networks and optimize resource allocation.
主題 4	• User Interface: This section assesses the knowledge of business users in navigating and utilizing the SAP interface effectively. It covers how to interact with different features, customize views, and leverage UI functionalities for efficient planning and reporting. Candidates are expected to demonstrate proficiency in accessing and interpreting data within the system.

主題 5	• Model Sales & Operations Processes: This section targets operations managers and evaluates knowledge of sales and operations planning. It covers the alignment of supply and demand, scenario planning, and decision-making processes to optimize operational efficiency. Candidates will be assessed on their ability to configure models that support strategic business goals.
主題 6	• Solution Architecture & Data Integration: his exam section is aimed at solution architects who work with SAP data integration. It covers the fundamental concepts of integrating external data sources with SAP, ensuring seamless data flow between systems. Candidates need to understand how to maintain system architecture for optimized performance and reliability.

優秀的C_IBP_2502考試大綱和資格考試中的領導者和可信任的SAP SAP Certified Associate - SAP IBP for Supply Chain

對於為了進入大中型IT公司的畢業生來說，不想花費太多的錢去補習，只能借助於最新的 Fast2test C_IBP_2502 考題准備考試，因為這類考題在網路中的價錢不是很高。我們會持續不斷從世界各地使用者在他們的地區參加 SAP 考試而獲得回饋，輕鬆的了解最新考試資訊，及時的更新 C_IBP_2502 題庫，這使我們的其他用戶可以共用這些考試資訊，參加考試更有信心！這是通過 C_IBP_2502 考試最有效的方法之一。

最新的 SAP Certified Application Associate C_IBP_2502 免費考試真題 (Q49-Q54):

問題 #49
You need to create time periods for the time profile in a planning area. What should you be aware of when running the Create Time Periods application job?

- A. The planning area to which the time profile is assigned must be active
- B. It is mandatory to specify the planning area in the Parameter Section of the application job
- C. A time profile has to be activated so that the application job can proceed
- D. This application job can also be triggered from SAP IBP, add-in for Microsoft Excel

答案：C

解題說明：
The Create Time Periods job in SAP IBP (via the Application Jobs app) generates time periods (e.g., weeks, months) for a time profile, a prerequisite for planning.
* Option A: The planning area to which the time profile is assigned must be activeThis is incorrect.
The planning area doesn't need to be active during time period creation; the job operates on the time profile independently.
* Option B: This application job can also be triggered from SAP IBP, add-in for Microsoft Excel This is incorrect. The job is triggered via the Application Jobs app (Fiori), not the Excel add-in, which focuses on planning views.
* Option C: A time profile has to be activated so that the application job can proceedThis is correct.
The time profile must be activated (i.e., saved and valid) before the job can generate periods, ensuring configuration readiness, per SAP IBP's time profile documentation.
* Option D: It is mandatory to specify the planning area in the Parameter Section of the application jobThis is incorrect. The job requires the time profile ID, not the planning area, as parameters, though the time profile is linked to a planning area.
Thus, C is the key awareness point, per SAP IBP's official job requirements.

問題 #50
Which Maintenance, Repair, and Overhaul (MRO) parts planning processes are included in SAP Integrated Business Planning for Supply Chain? Note: There are 3 correct answers to this question.

- A. Supply Planning
- B. Demand Planning
- C. Demand Driven Replenishment
- D. SAP Intelligent Asset Management

- E. Inventory Optimization

答案：A,B,E

解題說明：
MRO parts planning in SAP IBP supports maintenance operations with demand, supply, and inventory processes, per SAP IBP's supply chain planning scope.
* Option A: Inventory OptimizationThis is correct. Inventory Optimization (e.g., safety stock for MRO parts) ensures availability for maintenance, a key MRO process, per SAP IBP's documentation.
* Option B: Demand Driven ReplenishmentThis is incorrect. Demand Driven Replenishment (DDR) is a specific methodology in SAP IBP, but it's not standard for MRO; it's more for manufacturing/retail.
* Option C: Demand PlanningThis is correct. Demand Planning forecasts MRO parts needs (e.g., based on maintenance schedules), a core process, per SAP IBP's demand module.
* Option D: Supply PlanningThis is correct. Supply Planning ensures MRO parts are sourced and available, using heuristics or optimization, per SAP IBP's supply planning features.
* Option E: SAP Intelligent Asset ManagementThis is incorrect. SAP IAM is a separate solution, not an IBP process, though it can integrate with IBP for MRO planning.
Thus, A, C, and D are MRO processes in SAP IBP, per official documentation.

問題 #51
You are working with inventory key figures. What are some of the business scenarios where you can use the Last Period Aggregation function? Note: There are 2 correct answers to this question.

- A. Calculating the value of inventory on a weekly basis, using static aggregation from the daily level
- B. Calculating the value of inventory on any level from the time profile, ensuring flexibility of calculation
- C. Searching for and returning the last not-null value of the inventory key figure
- D. Calculating how many periods inventory is going to last based on the planned demand

答案：C,D

解題說明：
The Last Period Aggregation function (LASTPERIOD) in SAP IBP retrieves the most recent value in a time horizon for a key figure, useful for inventory analysis. Its applications align with SAP IBP's calculation capabilities.
* Option A: Calculating the value of inventory on a weekly basis, using static aggregation from the daily levelThis is incorrect. Static aggregation (e.g., sum, average) across periods isn't what LASTPERIOD does; it returns the last period's value, not an aggregate.
* Option B: Calculating how many periods inventory is going to last based on the planned demand This is correct. Using the last period's inventory value (via LASTPERIOD) divided by planned demand can estimate inventory duration, a common scenario in inventory planning, per SAP IBP's documentation.
* Option C: Searching for and returning the last not-null value of the inventory key figureThis is correct. LASTPERIOD retrieves the most recent non-null value in the horizon, ideal for tracking current inventory levels, per SAP IBP's calculation guides.
* Option D: Calculating the value of inventory on any level from the time profile, ensuring flexibility of calculationThis is incorrect. LASTPERIOD is time-specific (last period), not flexible across all levels; it's not a general aggregation method.
Thus, B and C are valid scenarios for Last Period Aggregation, per SAP IBP's official use cases.

問題 #52
You configured a stored key figure with an editability setting of "not editable." How can users modify the values of that key figure? Note: There are 2 correct answers to this question.

- A. Managing the master data via the Web UI
- B. Using planning object maintenance with key figure data in Excel UI
- C. Using the key figure calculations in the Web UI
- D. Importing the key figure data files using the Web UI

答案：B,D

解題說明：
In SAP IBP, a stored key figure with "not editable" status means users cannot manually edit it in planning views (e.g., Excel).
However, values can still be updated via system processes, as per SAP IBP's data management rules.
* Option A: Importing the key figure data files using the Web UIThis is correct. Users can import data files (e.g., CSV) via the Data

Integration app in the Web UI, overwriting "not editable" key figure values, a standard method, per SAP IBP's import documentation.
* Option B: Using the key figure calculations in the Web UIThis is incorrect. The Web UI (e.g., Planner Workspaces) doesn't support direct key figure calculations; calculations are configured in the Planning Areas app or executed via jobs, not user-driven in the UI.
* Option C: Using planning object maintenance with key figure data in Excel UIThis is correct. The Excel add-in's "Manage Planning Objects" feature allows users to update key figure values for specific combinations, bypassing the "not editable" restriction, per SAP IBP's Excel capabilities.
* Option D: Managing the master data via the Web UIThis is incorrect. Master data management (e.
g., via Manage Master Data app) updates attributes, not stored key figure values directly.
Thus, A and C are valid methods to modify "not editable" key figures, per SAP IBP's officialfunctionality.

問題 #53
What actions can be performed in the Advanced Dashboards application? Note: There are 3 correct answers to this question.

- A. Rename the charts
- B. Link two analytics charts
- C. Use drill-down functionality
- D. Display all assigned analytics on a single UI
- E. Add process instances

答案：A,C,D

解題說明：
The Advanced Dashboards app in SAP IBP creates customizable dashboards with analytical charts,per SAP IBP's visualization documentation.
* Option A: Use drill-down functionalityThis is correct. Drill-down (e.g., from region to product) is supported in charts, enhancing analysis, per SAP IBP's features.
* Option B: Add process instancesThis is incorrect. Process instances relate to process management (e.
g., Process Automation app), not dashboard actions.
* Option C: Link two analytics chartsThis is incorrect. Linking charts (e.g., synchronized filters) is more a feature of Analytics Stories, not Advanced Dashboards directly.
* Option D: Rename the chartsThis is correct. Users can rename charts in the dashboard for clarity, a standard customization, per SAP IBP's documentation.
* Option E: Display all assigned analytics on a single UIThis is correct. The app consolidates assigned charts into one dashboard UI, a core feature, per SAP IBP's guides.
Thus, A, D, and E are actions, per SAP IBP's official Advanced Dashboards capabilities.

問題 #54
......

如果你正在為如何通過C_IBP_2502考試而煩惱，這是沒有必要，通過最新的考試要點來提供覆蓋率很廣的SAP C_IBP_2502擬真試題，幫助考生做好充足的考前準備。Fast2test的目的在於如何提供可以確保考生通過認證的高品質題庫，我們的C_IBP_2502考試練習題和答案準確性高，問題覆蓋面大，不斷的更新和整編出高通過率的SAP C_IBP_2502題庫，這也是我們對所有的考生提供的保障。
