The Prep4SureReview is a trusted and reliable platform that has been offering real, valid, and verified AAPC-CPC exam questions. These Prep4SureReview AAPC-CPC exam questions are designed and checked by the Medical Tests subject matter experts. They check each Prep4SureReview AAPC-CPC Exam Practice question thoroughly and ensure the top standard of Prep4SureReview AAPC-CPC exam questions all the time.

Medical Tests American Academy of Professional Coders: Certified Professional Coder Sample Questions (Q15-Q20):

NEW QUESTION # 15

A complete pulmonary function test using a body plethysmograph is performed on a patient in conjunction with spirometry. After reviewing the results, a provider suspects the presence of an obstructive disease and administers a bronchodilating medicine just prior to repeating the test to reevaluate the expiratory flow rate. Which code(s) should be reported?

- A. 99212-25, 94726, 94010-51, 94060-51
- **B. 94726, 94060**
- C. 99212-25, 94726, 94060-76
- D. 94726, 94060-51

Answer: B

Explanation:

Answers A and B can be eliminated because the complete pulmonary function test includes interpretation of the test results; therefore, the review of this would not be considered separately identifiable. The CPT code 94060 includes spirometry before and after a bronchodilator has been administered, so a separate spirometry code (94010) would be inappropriate. Last, a modifier is not needed because the procedures are routinely done in conjunction with each other.

NEW QUESTION # 16

A patient undergoes surgery with anesthesia and is arousable with painful stimulation. What is the level of sedation the patient MOST likely received?

- A. Moderate sedation
- **B. Deep sedation**
- C. General anesthesia
- D. Minimal sedation

Answer: B

Explanation:

Minimal, moderate, and deep sedation all allow the patient to undergo a procedure without pain and without being completely unconscious. If a patient receives minimal sedation, they are responsive after receiving verbal stimulation. Moderate sedation causes a patient to respond only after tactile stimulation. General anesthesia causes the patient to be completely unarousable, even with painful stimulation.

NEW QUESTION # 17

What is the main role of the tonsils?

- A. Filter lymph and form lymphocytes
- B. Trigger the formation of antibodies
- C. Secrete antibodies to destroy ingested microbes
- **D. Remove bacteria that enter the body through the nose and/or mouth**

Answer: D

Explanation:

The primary role of the tonsils is to remove bacteria that enter through the oral and nasal cavity. Antigens are molecules located on the surface of pathogens and trigger the formation of antibodies. Lymph nodes filter lymph and form lymphocytes. B cells secrete antibodies that assist in destroying bacterium causing disease.

NEW QUESTION # 18

What would be considered a sequela to an injury?

- A. Prescription drug management
- B. Foreign body removal from a laceration
- **C. Chronic pain persisting after an injury has healed**
- D. Removal of an external fixation device

Answer: C

Explanation:

Per ICD-IO-CM, a sequela describes "complications or conditions that arise as a direct result of a condition." In this case, the chronic pain would be a condition that resulted from a prior injury.

Removal of a foreign body is active treatment of a laceration. Removal of a fixation device and prescription drug management are both considered routine and subsequent care.

NEW QUESTION # 19

A diaphragm resection and repair are done using a biologic mesh to reduce the formation of adhesions. Which procedure code should be reported?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

A diaphragm resection is reported with CPT codes 39560-39561. The use of a biologic mesh makes the repair complex, whereas a simple repair would implement only internal sutures.

NEW QUESTION # 20

.....

Learning with our AAPC-CPC learning guide is quite a simple thing, but some problems might emerge during your process of AAPC-CPC exam materials or buying. Considering that our customers are from different countries, there is a time difference between us, but we still provide the most thoughtful online after-sale service on AAPC-CPC training guide twenty four hours a day, seven days a week, so just feel free to contact with us through email anywhere at any time.
