

Test CrowdStrike IDP Dumps Pdf - IDP Sure Pass

DOWNLOAD the newest ActualCollection IDP PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1f40z_csxF9wz11ObINr7fxe7vSTP-eZT

In addition to the PDF questions ActualCollection offers desktop CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) practice exam software and web-based CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) practice exam, to help you cope with CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam anxiety. These CrowdStrike IDP Practice Exams simulate the actual CrowdStrike IDP exam conditions and provide you with an accurate assessment of your readiness for the IDP exam.

Nowadays, seldom do the exam banks have such an integrated system to provide you a simulation test. You will gradually be aware of the great importance of stimulating the actual exam after learning about our IDP study tool. Because of this function, you can easily grasp how the IDP practice system operates and be able to get hold of the core knowledge about the IDP Exam. In addition, when you are in the real exam environment, you can learn to control your speed and quality in answering questions and form a good habit of doing exercise, so that you're going to be fine in the IDP exam.

IDP Sure Pass, IDP Test Objectives Pdf

ActualCollection offers up-to-date CrowdStrike IDP practice material consisting of three formats that will prove to be vital for you. You can easily ace the CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam on the first attempt if you prepare with this material. The CrowdStrike IDP Exam Dumps have been made under the expert advice of 90,000 highly experienced CrowdStrike professionals from around the globe. They assure that anyone who prepares from it will get CrowdStrike IDP certified on the first attempt.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which of the following Falcon roles CANNOT enable and disable policy rules?

- A. Identity Protection Administrator

- B. Identity Protection Policy Manager
- **C. Identity Protection Domain Administrator**
- D. Falcon Administrator

Answer: C

Explanation:

Falcon Identity Protection enforces role-based access control (RBAC) to ensure that only authorized users can create, modify, or manage policy rules. Policy rules directly impact identity enforcement actions, making proper role separation critical.

According to the CCIS documentation, the ability to enable and disable policy rules is granted to the Identity Protection Policy Manager and the Falcon Administrator roles. These roles are explicitly designed to manage enforcement logic, triggers, and automated identity controls.

The Identity Protection Domain Administrator role, however, is limited to domain-level visibility and management, such as reviewing domain configurations, monitoring risks, and assessing posture. This role does not have permissions to modify or control policy enforcement behavior.

This separation prevents accidental or unauthorized changes to identity enforcement rules. Therefore, Option A is the correct and verified answer.

NEW QUESTION # 46

Which of the following users would most likely have a HIGH risk score?

- **A. Privileged user with a Compromised Password**
- B. User that has not logged in recently and is marked as Stale
- C. User that recently logged in from a shared endpoint
- D. User that is a member of the Domain Admins group

Answer: A

Explanation:

Falcon Identity Protection calculates user risk scores based on a combination of privilege level, credential exposure, and behavioral indicators. According to the CCIS curriculum, a privileged user with a compromised password represents one of the highest-risk identity scenarios.

Privileged accounts—such as administrators or service accounts with elevated access—already pose increased risk due to their access scope. When Falcon detects that such an account's credentials have been compromised, the risk escalates significantly because attackers can immediately gain high-impact access without further escalation.

The other options do not inherently represent the same level of risk:

- * Logging in from a shared endpoint may increase risk but is context-dependent.
- * Stale users are risky but typically lower risk than active compromised credentials.
- * Domain Admin group membership alone does not imply compromise.

Because credential compromise combined with privileged dramatically increases attack potential, Option B is the correct and verified answer.

NEW QUESTION # 47

How does Identity Protection extend the capabilities of existing multi-factor authentication (MFA)?

- **A. Implementation of a second-layer security control using policy rules as it detects risky or abnormal behaviors**
- B. Identity Protection is not going to detect risky user behavior
- C. Identity Protection does not support on-premises MFA connectors
- D. Identity Protection will replace third-party MFA and trigger as it detects risky or abnormal behaviors

Answer: A

Explanation:

Falcon Identity Protection is designed to extend—not replace—existing MFA solutions. According to the CCIS curriculum, Identity Protection enhances MFA by adding a risk-driven, policy-based enforcement layer that dynamically triggers MFA challenges when risky or abnormal identity behavior is detected.

Rather than applying MFA uniformly, Falcon evaluates authentication context such as behavioral deviation, privilege usage, and anomaly detection. When risk thresholds are exceeded, Policy Rules can enforce MFA through integrated connectors, providing adaptive, Zero Trust-aligned authentication.

The incorrect options misunderstand Falcon's role. Identity Protection does detect risky behavior, does not replace MFA providers, and fully supports both cloud and on-premises MFA connectors. Because Falcon adds intelligence-driven enforcement on top of MFA, Option A is the correct and verified answer.

NEW QUESTION # 48

How does the Falcon sensor for Windows contribute to the enforcement in Falcon Identity Protection?

- A. Enforces strict password complexity rules for user accounts
- B. Manages user access and permissions on domain controllers
- C. Encrypts network traffic to ensure secure communication
- **D. Collects and validates domain authentication events**

Answer: D

Explanation:

The Falcon sensor for Windows plays a critical role in Falcon Identity Protection by collecting and validating domain authentication events directly from domain controllers. According to the CCIS curriculum, the sensor inspects authentication protocols such as Kerberos, NTLM, and LDAP through Authentication Traffic Inspection (ATI).

This telemetry enables Falcon Identity Protection to analyze authentication behavior, build identity baselines, detect anomalies, and generate identity-based detections. The sensor does not enforce password policies, manage permissions, or encrypt network traffic—those functions belong to Active Directory and network infrastructure components.

By providing high-fidelity authentication telemetry without relying on log ingestion, the Falcon sensor enables real-time identity threat detection and Zero Trust enforcement. Therefore, Option D is the correct and verified answer.

NEW QUESTION # 49

Describe the difference between a Human account and a Programmatic account.

- **A. A human account is often used interactively**
- B. A human account is an Administrator
- C. A programmatic account is never authorized for multi-factor authentication
- D. A programmatic account is only used interactively

Answer: A

NEW QUESTION # 50

.....

We provide 24-hour online service for all customers who have purchased IDP test guide. You can send us an email to ask questions at anytime, anywhere. For any questions you may have during the use of IDP exam questions, our customer service staff will be patient to help you to solve them. At the same time, if you have problems with downloading and installing, CrowdStrike Certified Identity Specialist (CCIS) Exam torrent prep also has dedicated staff that can provide you with remote online guidance. In order to allow you to use our products with confidence, IDP Test Guide provide you with a 100% pass rate guarantee. Once you unfortunately fail the exam, we will give you a full refund, and our refund process is very simple.

IDP Sure Pass: <https://www.actualcollection.com/IDP-exam-questions.html>

CrowdStrike Purchasing IDP audio lectures and it has got the amazing tools like BrainDump IDP latest mp3 guide and IDP exam engine to provide you the best services in the best manner, A lot of professional experts concentrate to make our IDP practice materials more perfect, Passing rate.

Quality control checklist, In a three-tier application, you IDP basically backed away from putting all the business logic in stored procedures, CrowdStrike Purchasing IDP audio lectures and it has got the amazing tools like BrainDump IDP latest mp3 guide and IDP Exam Engine to provide you the best services in the best manner.

Real and Updated IDP Exam Questions
