Free PDF Scrum Marvelous PSPO-I Useful Dumps

The prime objective of our Scrum PSPO-I PDF is to improve your knowledge and skills to the level that you get attain success easily without facing any difficulty. For this purpose, ActualVCE hired the services of the best industry experts for developing exam dumps and hence you have preparatory content that is unique in style and filled with information. Each ActualVCE brain dump, included in the PSPO-I Brain Dumps PDF is significant and may also is the part of the actual exam paper.

Scrum Professional Scrum Product Owner I Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which of the following are criteria to order Product Backlog items?
(choose all that apply)

- A. Dependencies to other products.
- B. All of the above.
- C. Dependencies between Product Backlog items.
- D. The availability of the Scrum Master.
- E. Value of Product Backlog items.

Answer: A,C,E

Explanation:

The Product Owner orders the Product Backlog items according to various criteria, such as:

* The value of Product Backlog items. The Product Owner aims to maximize the value of the product and the work of the Scrum Team. Therefore, they prioritize the items that deliver the most value to the stakeholders and the users, considering factors such as customer satisfaction, market share, revenue, social impact, etc.

* The dependencies between Product Backlog items. The Product Owner tries to minimize the dependencies between items, as they may create complexity, uncertainty, and risk. Therefore, they order the items in a way that reduces or eliminates the dependencies,

or resolves them as early as possible.

* The dependencies to other products. The Product Owner also considers the dependencies that the product has to other products, such as platforms, frameworks, libraries, services, etc. Therefore, they order the items in a way that aligns with the availability and compatibility of those products.

References:

Scrum Guide 2020, page 11: "The Product Owner is accountable for effective Product Backlog management, which includes ... ordering Product Backlog items; and, ensuring that the Product Backlog is transparent, visible and understood." Scrum Guide 2020, page 11: "The ordering of the items in the Product Backlog is the sole responsibility of the Product Owner. They order Product Backlog items to best achieve goals and missions." Scrum Guide 2020, page 11: "Higher ordered Product Backlog items are clearer and more refined than lower ordered ones."

NEW QUESTION # 21

When multiple teams are working on the same product, their Sprints must start and end at the same time.

- A. False
- B. True

Answer: A

NEW QUESTION # 22

Only in the Daily Scrum, the Developers are allowed to adjust their plan for the Sprint.

- A. FALSE
- B. TRUE

Answer: A

NEW QUESTION # 23

A Scrum Team is required to deliver a done Increment by the end of a Sprint. Select two statements that explain what done means. (choose the best two answers)

- A. All work the Developers are willing to do.
- B. Ready to be released to end users.
- C. Whatever the Product Owner defines as quality.
- D. Ready for integration.
- E. No work is left to meet the Definition of Done.

Answer: B,E

Explanation:

A Scrum Team is required to deliver a done Increment by the end of a Sprint. Done means:

* No work is left to meet the Definition of Done. The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. It is a shared understanding among the Scrum Team and the stakeholders of what it means for work to be complete.

It may include criteria such as coding standards, testing, documentation, security, performance, etc. If a Product Backlog item or an Increment does not meet the Definition of Done, it cannot be released or presented at the Sprint Review.

* Ready to be released to end users. The Increment is a concrete output of the Sprint that adds value to the product. It is a potentially releasable functionality that adheres to the Scrum Team's current Definition of Done. It is not necessarily released at the end of each Sprint, but it must be in a state that allows for immediate release if the Product Owner decides so. The Increment should also align with the Sprint Goal and the Product Goal, and satisfy the needs and expectations of the customers and stakeholders.

References:

Scrum Guide 2020, page 10: "The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product." Scrum Guide 2020, page 10: "The moment a Product Backlog item meets the Definition of Done, an Increment is born." Scrum Guide 2020, page 14: "The purpose of each Sprint is to deliver Increments of potentially releasable functionality that adhere to the Scrum Team's current Definition of Done."

There are 5 Pillars of Scrum and 3 Scrum Values.

- Answer: A**
