try. It is well known that getting certified by AZ-140 real exam is a guaranteed way to succeed with IT careers. We are here to provide you the high quality AZ-140 Braindumps Pdf for the preparation of the actual test and ensure you get maximum results with less effort.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q247-Q252):

NEW QUESTION # 247

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains session hosts that run a line-of-business (LOB) app named App1.

You have an Azure Compute Gallery that contains the following image:

* Image definition: Image1

* Image version: 1.1.1

Image version 1.1.1 was used to deploy all the current session hosts.

You plan to deploy a new virtual machine named VM1 as a source for a new image version that will contain an update for App1.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

Answer:

Explanation:

□

Explanation:

□

NEW QUESTION # 248

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-enable-azure-mfa>

NEW QUESTION # 249

You have an Azure subscription that contains an Azure Virtual Desktop deployment, a standard Azure Firewall instance named FW1, and the virtual networks shown in the following table.

□

You need to configure VNet2 to route all outbound traffic via FW1. The solution must minimize the impact on the Azure Virtual Desktop deployment.

What should you do first?

- A. For FW1, enable DNS Proxy.
- **B. Deploy Azure Route Server to VNet2.**
- C. Upgrade FW1 to the Premium SKU
- D. Deploy Azure NAT Gateway to VNet1.

Answer: B

NEW QUESTION # 250

You have a Azure Virtual Desktop host pool named Pool1 that contains three session hosts. The session hosts are configured to use FSLogtx profile containers. You need to configure Cloud Cache on the session hosts.

What should you do?

- A. Configure FSLogtx Office Container.
- B. Add VHDlocations entries to the Windows registry.

- C. Remove VHDlocations entries from the Windows registry.
- D. Uninstall the FSLogix agent

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/fslogix/configure-cloud-cache-tutorial>

NEW QUESTION # 251

You plan to deploy Azure Virtual Desktop.

You are deploying Storage Spaces Direct to a cluster that will store FSLogix profile containers.

The cluster will NOT use Cloud witness.

What is the minimum number of virtual machines required for the cluster?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

A typical cluster quorum configuration in this setup (automatic failover SLA) gives each node a vote. One extra vote is given to the quorum witness to allow cluster to keep running even if either one of the datacenter experiences a power outage. The math is simple - there are 5 total votes and you need 3 votes for the cluster to keep it running.
