The best way to Prepare Exam With Fortinet FCP_FMGI_{AD}-7.4 Exam

Dumps

In this hustling society, our FCP_FMGM_AD-7.4 practice materials are highly beneficial existence which can not only help you master effective knowledge but pass the exam effectively. They have a prominent role to improve your soft-power of personal capacity and boost your confidence of conquering the exam with efficiency. You will be cast in light of career acceptance and put individual ability to display. When you apply for a job you could have more opportunities than others. What is more, there is no interminable cover charge for our FCP_FMGM_AD-7.4 practice materials priced with reasonable prices for your information. Considering about all benefits mentioned above, you must have huge interest to them.

Fortinet FCP_FMGM_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
Topic 2	<ul style="list-style-type: none">Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
Topic 3	<ul style="list-style-type: none">Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 4	<ul style="list-style-type: none">Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.
Topic 5	<ul style="list-style-type: none">Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q61-Q66):

NEW QUESTION # 61

Exhibit.

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. The FortiManager ADOM workspace mode is set to Normal
- B. FortiManager is in workflow mode.
- C. An administrator can also lock the Local-FortiGate_root policy package.
- D. The FortiManager ADOM is locked by the administrator.

Answer: A,C

NEW QUESTION # 62

Refer to the exhibit. A service provider administrator has assigned a global policy package to a managed customer ADOM named My_ADOM, which has four policy packages. The customer administrator has access only to My_ADOM.

How can the customer or service provider administrators remove the global header policy from the policy package named Shared_Package?

FortiManager policy package

The screenshot shows the FortiManager Policy Package interface. The left sidebar includes options like Normalized Interface, Firewall Objects, Security Profiles, User & Authentication, Security Fabric, Advanced, VPN Manager, and AP Manager. The main area shows a table of Firewall Header Policy entries. One entry is highlighted: "Global_Header" with ID 1. The table columns are: #, Name, From, To, Source, Destination, Schedule, Service, and Action. The "Action" column shows a green padlock icon for "gall" and a red padlock icon for "galways".

- A. The customer administrator can unassign the policy by locking My_ADOM.
- **B. The service provider administrator can unassign the policy from the global ADOM.**
- C. The customer administrator can unassign the global policy from My_ADOM.
- D. The service provider administrator can unassign the global policy from My_ADOM.

Answer: B

NEW QUESTION # 63

What is a characteristic of the FortiManager high availability (HA) feature?

- A. Each cluster member must be upgraded manually, starting with the primary unit.
- **B. The primary unit synchronizes all configuration revision with the secondary units.**
- C. All secondary units must be in the same network as the primary unit.
- D. When a secondary unit is removed, FortiManager updates the managed devices using TCP port 5199.

Answer: B

NEW QUESTION # 64

Exhibit:

The screenshot shows the FortiManager Policy Packages interface. The left sidebar includes options like Dashboard, Device Manager, Policy & Objects, and Policy Packages. The main area shows a list of policy packages: Local-FortiGate_root, Remote-FortiGate, and default. The "Local-FortiGate_root" package has a red padlock icon next to it, indicating it is locked.

Given the configuration shown in the exhibit, which two statements are true? (Choose two.)

- A. An administrator can also lock the Local-FortiGate_root policy package.
- **B. The FortiManager ADOM is locked by the administrator.**
- C. The FortiManager ADOM workspace mode is set to Normal
- **D. FortiManager is in workflow mode.**

Answer: B,D

Explanation:

The provided screenshot from FortiManager shows several key elements that help answer the question:

* The padlock icon next to the "Remote-FortiGate" policy package indicates that this policy package is locked, which means it is currently being edited or has been checked out by an administrator. This is typical behavior when the ADOM (Administrative Domain) workspace mode is in use, and a session is active where an administrator is working on a policy package.

* The absence of a lock icon next to "Local-FortiGate_root" and "default" indicates that these policy packages are not locked and are available for editing.

* Statement B(FortiManager is in workflow mode): This is true. The fact that one of the policy packages is locked suggests that FortiManager is operating in ADOM workflow mode or at least in a state where it enforces locking for editing, typically seen in Normal ADOM modes. In workflow mode, an administrator needs to lock a workspace before making changes.

* Statement C(The FortiManager ADOM is locked by the administrator): This is true. The presence of the padlock on "Remote-

FortiGate" signifies that the ADOM, or more specifically, this policy package within the ADOM, has been locked by the administrator.

* Statement A(An administrator can also lock the Local-FortiGate_root policy package): This is not necessarily true. The administrator can lock the "Local-FortiGate_root" policy package, but as shown in the exhibit, it is currently not locked, so this option is not a certainty in this state.

* Statement D(The FortiManager ADOM workspace mode is set to Normal): This is true, but not the best option compared to B and C, as it can be inferred that the mode is set to Normal due to the locking behavior, but the more direct information is about the ADOM being locked by an administrator.

NEW QUESTION # 65

Push updates are failing on a FortiGate device that is located behind a NAT device.

Which two settings should the administrator check? (Choose two.)

- A. That the external IP address on the NAT device is set to DHCP and configured with the virtual IP
- B. That the NAT device IP address and correct ports are configured on FortiManager
- C. That the virtual IP address and correct ports are set on the NAT device
- D. That the override server IP address is set on FortiManager and the NAT device

Answer: B,C

Explanation:

FMG should contact NAT ip address and NAT device should have VIP correctly configured.

NEW QUESTION # 66

.....

We all know that pass the FCP_FMGM_AD-7.4 exam will bring us many benefits, but it is not easy for every candidate to achieve it. The FCP_FMGM_AD-7.4 guide torrent is a tool that aimed to help every candidate to pass the exam. Our FCP_FMGM_AD-7.4 exam materials can installation and download set no limits for difficulty of the computers and persons. You can use our FCP_FMGM_AD-7.4 Practice Questions directly. We guarantee you that the FCP_FMGM_AD-7.4 study materials we provide to you are useful and can help you pass the test.
