

Standard NS0-185 Answers & Exam NS0-185 Tests

Our NS0-185 real dumps has received popular acceptance worldwide with tens of thousands of regular exam candidates who trust our proficiency. Up to now, the passing rate is 98 to 100 percent. What made our NS0-185 study guide so amazing? The answer that we only supply the latest and valid NS0-185 Exam Braindumps for our customers and first-class after-sales services come after the first-class NS0-185 learning engine. We're also widely praised by our perfect services.

If you want to pass the shortest time to pass you exam, just find us. Our NS0-185 Training Materials will have the collective of the questions and answers, it will help you to have a good command of the knowledge point, therefore make it possible for you to pass the exam. Besides money back guarantee if you fail to pass it, or we can change another exam dumps for you for free. All we do is just want to serve you better. Choose us and you will never regret.

Pass Guaranteed Quiz NS0-185 - NetApp Storage Installation Engineer, ONTAP Professional Exam Marvelous Standard Answers

After a short time's studying and practicing with our NS0-185 exam questions, you will easily pass the examination. We can claim that if you study with our NS0-185 learning quiz for 20 to 30 hours, then you will be confident to attend the exam. God helps those who help themselves. If you choose our NS0-185 Study Materials, you will find God just by your side. The only thing you have to do is just to make your choice and study. Isn't it very easy? So know more about our NS0-185 practice guide right now!

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

Exhibit.

You are installing a FAS2254 and a DS2246 disk shelf at a customer's site. The controller and disk shelf must be racked in separate rows in the data center due to available space.

The customer wants you to use two of the 20-meter copper SAS cables to make connections. Referring to the exhibit, which statement is correct?

- A. You will need to contact sales to obtain an Ethernet adapter.
- B. You will need to contact sales to obtain a wireless adapter.
- **C. The controller and disk shelf must be closer together if copper cables are to be used.**
- D. You will need to contact sales to obtain the 20 meter copper cables.

Answer: C

Explanation:

This question tests installation cabling constraints and supported cabling media for SAS connectivity. The key issue is distance: the customer wants to use 20-meter copper SAS cables between a controller and a shelf that are installed in separate rows.

NetApp hardware cabling guidance indicates that when long distance SAS connectivity is required, the supported approach is to use SAS optical cabling (for applicable platforms and shelf/IOM combinations). The ONTAP hardware systems documentation describes "mini-SAS HD SAS optical cable rules," noting that optical AOC SAS cables are available in lengths up to 50 meters for controller-to-stack and shelf-to-shelf connections in supported configurations. This highlights a critical installation principle: long SAS runs are addressed with optical, not copper.

The documentation also establishes that SAS cabling within a stack must be consistent (all copper or all optical) and that mixed approaches have specific constraints. While the excerpt emphasizes optical rules (because optical is the mechanism for long distance), it implicitly reinforces that copper has practical distance limitations and is not the long-distance solution.

Therefore, if the customer insists on copper SAS, the correct guidance is that the controller and disk shelf must be closer together to remain within supported copper SAS distance limits and to ensure signal integrity and supported operation. Option B is incorrect because simply "obtaining" 20-meter copper SAS cables does not make the configuration supported. Option D is incorrect because Ethernet adapters do not replace SAS for shelf connectivity. Option A is nonsensical in this context because SAS shelf connectivity cannot be replaced by a "wireless adapter" as a supported installation practice.

Thus, the correct answer is C: if copper cables are to be used, the devices must be closer together; otherwise the supported solution is to use a supported SAS optical approach.

NEW QUESTION # 12

Poppy Pet Care Kennels is developing a website system. The following are potential actors:

- A) Poppy Pet Care Kennels
- B) Kennel assistants
- C) The managing director
- D) Customers
- E) Quality manager

Which of these would be drawn as actors on the use case diagram?

- A. A, B and C
- B. B, C and E
- C. A, D and E
- **D. B, D and E**

Answer: D

Explanation:

Actors are external users interacting with the system. Kennel assistants, customers, and the quality manager directly interact with the system. The organization itself and managing director are stakeholders, not actors.

NEW QUESTION # 13

Before installing FASTPATH and an RCF on a NetApp CN16xx switch, which condition must exist?

- **A. The cluster must be fully functioning**
- B. Updates can only occur offline
- C. Port configuration must be reset individually
- D. ISLs must be moved

Answer: A

NEW QUESTION # 14

Which tool is used to compare or check the dependencies of individual software and hardware components?

- A. Net2
- B. FMC_DC
- **C. Interoperability Matrix Tool (IMT)**
- D. Solution Builder

Answer: C

NEW QUESTION # 15

You want to enable secure communication with the SP or BMC using CA-signed certificates. Which two certificate types must be installed? (Choose two.)

- A. cluster certificate
- B. ONTAP certificate
- **C. root CA certificate**
- **D. server certificate**

Answer: C,D

NEW QUESTION # 16

.....

As one of the leading brand in the market, our NS0-185 exam materials can be obtained on our website within five minutes. As long as you pay for our NS0-185 study guide successfully, then you will receive it quickly. That is the expression of our efficiency. The amazing quality of our NS0-185 learning questions can totally catch eyes of exam candidates with passing rate up to 98 to 100 percent.
