Experts have prepared the CTAL_TM_001 desktop-based exam simulation software. There are CTAL_TM_001 actual questions in the practice test to give you an exact impression of the ISTQB Certified Tester Advanced Level - Test Manager CTAL_TM_001 original test. This type of ISTQB Certified Tester Advanced Level - Test Manager CTAL_TM_001 actual exam simulations helps to calm your anxiety.

The benefit in Obtaining the CTAL-TM Exam Certification

- **CTAL-TM exam** certified evaluators earn 20% more salary than CTAL-TM non-certified evaluators
- Establish your experience in software development and/or testing
- Increase your distinctness and convert a more valuable constituent of your organization
- Infiltrate best practices in software development and/or testing and increase the success rate of your projects.

How to study the CTAL-TM Exam

There are two main types of resources for preparation of CTAL-TM certification exams first there are the study guides and books that are detailed and suitable for building knowledge from ground up then there are video tutorials and lectures that can somehow ease the pain of through study and are comparatively less boring for some candidates yet these demand time and concentration from the learner. Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study guides to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams. Practice exams are built to make students comfortable with the real exam environment. Statistics have shown that most students fail not due to that preparation but due to exam anxiety the fear of the unknown. ActualPDF expert team recommends you to prepare some notes on these topics along with it don't forget to practice **CTAL-TM exam dumps** which had been written by our expert team, Both these will help you a lot to clear this exam with good marks.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q69-Q74):

NEW QUESTION # 69

Which one of the following will allow phase containment to be assessed within a testing project? SELECT ONE OPTION

- A. Using the phases of defect introduction and detection data for all phases of the project.
- B. Using defect removal data for the testing phases of the project.
- C. Using defect introduction and removal data for the project as a whole.
- D. Using the phases of defect introduction, detection and removal data on a phase by phase basis.

Answer: A

NEW QUESTION # 70

Refer to SCENARIO 2 - Which two of the following are test strategies that would need to be implemented to meet the objectives defined in the Safe as Houses' test policy?

- a. Analytical strategy
- b. Reactive strategy
- c. Methodical strategy
- d. Regression averse strategy
- e. Process compliant strategy

- A. b and d
- B. d and e.
- C. a and b.
- D. c and d.

Answer: C

NEW QUESTION # 71

Relying only on the information provided in the scenario, select the TWO items and/or features for which sufficient information is available to proceed with test design. 2 credits

- A. Valid and invalid advances
- B. Response time
- C. Usability
- D. Language localization
- E. All supported credit cards

Answer: A,E

NEW QUESTION # 72

Your test team is in the process of completing final regression testing one week before the release date. One of your staff has just uncovered a critical defect that causes data corruption.

What should you do? [2]

- A. Write a high priority defect and call the business stakeholders to warn them about it
- B. Write a high priority defect and follow the escalation communication plan as defined in your test plan
- C. Update the risks in your test plan to cover data corruption issues and update your test cases to be sure you test for this in the future
- D. Update the weekly status charts and change the project status to red

Answer: B

Explanation:

The best action that you should take in this situation is to write a high priority defect and follow the escalation communication plan as defined in your test plan. This is because a critical defect that causes data corruption is a serious issue that can affect the quality, functionality, and reliability of the system, and it needs to be reported and resolved as soon as possible. By writing a high priority defect, you can document the details and the impact of the defect, and alert the development team and the project manager about it. By following the escalation communication plan, you can ensure that the defect is communicated to the appropriate stakeholders, such as the business sponsors, the customers, or the senior management, in a timely and effective manner, and that the necessary

actions are taken to address the defect. Defect Reporting - ISTQB not-for-profit association References: Certified Tester Advanced Level Test Manager (CTAL-TM) - ISTQB not-for-profit association, ISTQB Test Manager Certification - ISTQB Exams Worldwide - ISTQB Official Registration, Defect Reporting - ISTQB not-for-profit association

NEW QUESTION # 73

When summarising test planning, which of the following statements is TRUE?

- A. Test planning is best started after the requirements have been identified, so the testing scope can be clearly understood and documented.
- B. It is not necessary for all stakeholders to accept the test plan, as disagreements are inevitable. However, it must be accepted by the project manager.
- C. Test planning involves estimating the required test resources such as test staff, tools and environment resources then allocating them to the test activities.
- D. Test planning activities start once all product risks have been identified and analyzed. Test planning then selects the risk treatment approaches.

Answer: C

Explanation:

Test planning involves identifying resources, responsibilities, scheduling, estimating efforts, and allocating resources. It is an early phase activity, not something that waits until all risks are identified.

"Test planning activities include defining the objectives of testing, the scope of the test effort, the risks, the resources required, test levels to be applied, and the schedule of testing activities." (Source: ISTQB Advanced Level Test Manager Syllabus 2012, Section 2.2) Thus, Option A correctly summarizes test planning.

NEW QUESTION # 74

.....
