## Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q33-Q38):

### NEW QUESTION # 33

A user has reported a network outage. After locating the user, you find that the switch interface facing the user is down but there is no alert in the Mist UI. You want to ensure that in the future, you receive an alert when a switch interface is down. You have already verified that the Critical Switch Port Down alarm is configured and enabled on the Alerts Configuration page.

In this scenario, which action in the Mist UI will satisfy the requirement?

- A. Disable the Critical Switch Port Down alarm on the Alerts Configuration page.
- B. Navigate to the switch in the Mist UI and modify the Port Profile configuration to enable Persistent (Sticky) MAC Learning for the Port Profile.
- C. Enable the Critical Switch Port Up alarm on the Alerts Configuration page.
- **D. Navigate to the switch in the Mist UI and modify the Port Configuration to enable the Up/Down Port Alerts setting for the interface.**

**Answer: D**

Explanation:

To ensure that you receive alerts when a switch interface goes down, you need to enable the Up/Down Port Alerts setting for the specific interface. This setting can be configured by navigating to the switch within the Mist UI and modifying the port configuration. Enabling this setting ensures that any changes in the port status, such as going down, will trigger an alert.

This is critical for proactive network monitoring and to promptly address any connectivity issues.

### NEW QUESTION # 34

Which Juniper Mist dashboard feature uses the ROAMINGOF element?

- A. Conversational Assistant
- **B. Marvis Query Language**
- C. Wireless SLE
- D. Marvis Minis

**Answer: B**

Explanation:

The ROAMINGOF element is part of the Marvis Query Language (MQL), which is the structured query syntax used by Marvis, Juniper's Virtual Network Assistant (VNA).

According to the Juniper Mist Marvis and MQL Technical Reference, Marvis Query Language provides advanced data query and automation capabilities that go beyond the conversational interface. It allows administrators to directly extract analytical insights, run network diagnostics, and perform queries related to user experience metrics and Service Level Expectations (SLEs).

The documentation specifies:

"MQL is the analytical engine of Marvis that uses elements such as ROAMINGOF, CONNECTIVITYOF, and PERFORMANCEOF to query Mist data and retrieve SLE metrics, performance trends, and device events."

The ROAMINGOF element specifically relates to the Wireless Roaming SLE category, enabling Marvis to evaluate client roaming performance across access points, identify failed transitions, and correlate signal quality or capacity-related issues.

While the Conversational Assistant (A) uses natural language queries, it translates them internally into MQL commands. Marvis Minis (C) runs synthetic tests, and Wireless SLE (D) displays performance metrics but does not directly use MQL syntax elements.

Thus, the correct answer is B. Marvis Query Language.

### NEW QUESTION # 35

Which SLE reports RF interference?

- **A. Capacity**
- B. Coverage
- C. AP Health
- D. Roaming

**Answer: A**

Explanation:

Use the Wireless Capacity SLE to track user experiences with RF channel capacity (bandwidth) on your wireless network.

#### **NEW QUESTION # 36**

Which unit of measurement is used for capacity, coverage, and throughput SLEs?

- **A. throughput in Mbps**
- B. signal strength in dBm
- C. percentage of user minutes
- D. percentage of channel utilization

**Answer: A**

Explanation:

For capacity, coverage, and throughput Service Level Expectations (SLEs) in Mist AI, throughput is measured in Mbps. This unit measures the rate at which data is successfully delivered over the wireless network, providing a clear indication of network performance and user experience. Mist AI tracks these metrics to ensure the network meets the required performance standards.

#### **NEW QUESTION # 37**

You want to determine where you have coverage issues in your network using Marvis Actions.

Which Marvis Action category should you use in this situation?

- A. Application
- B. Clients
- **C. AP**
- D. Connectivity

**Answer: C**

#### **NEW QUESTION # 38**
