HPE Aruba Networking Switching Professional Exam Sample Questions (Q128-Q133):

NEW QUESTION # 128

Which QoS methods are supported by Aruba switches?

(Select two.)

Response:

- A. FIFO
- **B. DSCP**
- **C. WRR**
- D. VRRP

Answer: B,C

NEW QUESTION # 129

An administrator of a company has concerns about upgrading the access layer switches. The users rely heavily on wireless and VoIP telephony. Which is the best recommendation to ensure a short downtime for the users during upgrading the access layer switches?

- A. Implement VSX on the AOS-CX access switches
- **B. Install AOS-CX 6300 or 6400 switches with always-on POE**
- C. Implement VSF on the AOS-CX access switches
- D. Install the in-service software upgrade (ISSU) feature with clustering enabled

Answer: B

Explanation:

The key is to reduce the impact. VSF or not will have same impact when the switch reboots. But if the switch support always on poe then at least the POE clients will be ready before the switch finish booting up. If you dont have always on POE, then the poe clients will reboot AFTER the switch boots up.

NEW QUESTION # 130

What are valid NAE agent actions? (Select two)

- A. Create a new TAC case
- **B. Generate a local system log**
- C. Generate an SNMP trap
- **D. Run a CLI command**
- E. Start/stop a packet capture

Answer: B,D

Explanation:

Valid Network Analytics Engine (NAE) agent actions include:

Running CLI commands (Option A), allowing automated command execution for remediation or data collection.

Generating local system logs (Option C) for event tracking and audit purposes.

Other options:

Generating SNMP traps (B) and starting/stopping packet captures (D) are not typical NAE actions.

Creating a new TAC case (E) is an external process, not an automated NAE action.

NEW QUESTION # 131

While troubleshooting a scenario in which the customer has added two new line cards on an HPE Aruba Networking CX 6400 switch, the LEDs on the line card do not show light on the first card.
Which troubleshooting methodology should you use to isolate the problem?

- A. Replace the configuration using the previous checkpoint on the switch.
- B. Follow the path and check the connectivity from the access switch to the CX 6400.
- C. Spot the difference by comparing the switch configurations.
- **D. Divide and conquer by swapping the line cards in their slot.**

Answer: D

NEW QUESTION # 132

An administrator implements interim accounting for guest users so that ClearPass can track the amount of bandwidth that guests upload and download. Guests that abuse bandwidth consumption should be disconnected from the network. The administrator configures the following on the AOS-CX access switches:

After performing this configuration, the administrator notices that guest users that have exceeded the guest bandwidth limit are not being disconnected. Upon further investigation, Access Tracker in ClearPass indicates a disconnect CoA message is being sent to the AOS-CX switch.

What is causing this issue?

- A. NTP is not configured on the AOS-CX switch.
- B. There is a time discrepancy between the AOS-CX switch and ClearPass.
- **C. RADIUS change of authorization is not enabled on the AOS-CX switch.**
- D. Bandwidth consumption of the guests is not being reported by the AOS-CX switch.

Answer: C

NEW QUESTION # 133

.....

All these three HPE7-A08 exam question formats contain the real, updated, and error-free HPE7-A08 exam practice test. These HP HPE7-A08 exam questions give you an idea about the final HP HPE7-A08 exam questions formats, exam question structures, and best possible answers, and you will also enhance your exam time management skills.
