

# Pass Guaranteed Quiz 2026 SAP C\_TS422\_2023: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing High Hit-Rate Valid Exam Objectives

SAP C:  
S4CSV-2208 SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Service Implementation 2  
confidence to take the exam? It doesn't matter that you can use our 2Pass4sure dumps.

## SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Service Implementation Sample Questions (Q31-Q36):

### NEW QUESTION # 31

You want to use a product proposal in a service order.

Which actions support this requirement?

Note: There are 2 correct answers to this question.

- A. You create an equipment as a reference object and assign in to the service order.
- B. You create a bill of material (BOM), representing the components that can be selected in the service order.
- C. You activate the product proposal functionality in the item category used in the service order.
- D. You add the required service contract as a reference document to the service order on header level.

Answer: C

### NEW QUESTION # 32

Data Migration

53 of 80

What are characteristics of the SAP S/4HANA Migration Cockpit?

Note: There are 2 correct answers to this question.

- A. Mapping source values to SAP S/4HANA target values
- B. Combining the staging and file approaches into one migration project
- C. Guidance and simulation of the migration process
- D. Extensibility using the Legacy System Migration Workbench (LSMW)

Answer: A,C

### NEW QUESTION # 33

What is a feature that is available in the SAP S/4HANA Cloud system once scope item Procurement for Service Management (3NI) has been activated?

- A. A service order line item can create a purchase order directly, skipping the purchase requisition document.
- B. Goods receipts for purchase orders can be posted that update costs in a service order at line item level.
- C. A service order line item can create a purchase contract directly, skipping the purchase order document.
- D. Goods receipts for service order line items can be posted, updating costs in the purchase order sent to a vendor.

Pass Guaranteed Quiz The Best SAP - C-S4CSV-2208 - Dump SAP Certified Application Associate - SAP S/4HANA Cloud (public) - Service Implementation Check

P.S. Free 2026 SAP C\_TS422\_2023 dumps are available on Google Drive shared by Lead1Pass: <https://drive.google.com/open?id=1WRRiX0sco2I59BtzAOBRC9-vrbEv2IbC>

C\_TS422\_2023 Guide Quiz helped over 98 percent of exam candidates get the certificate. Before you really attend the C\_TS422\_2023 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a C\_TS422\_2023 certificate likes this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues.

## SAP C\_TS422\_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Production Orders in SAP S</li><li>• 4HANA: This section covers BOM item categorization, order status management, availability checks, routing selection, order type setup, and material handling processes.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Material Requirements Planning in SAP S</li> <li>• 4HANA: This part of the exam covers an examination of planning strategies, tools, and long-term planning concepts. Overview of MRP fundamentals and lot size procedures.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Advanced Planning in SAP S</li> <li>• 4HANA: This section includes an overview of advanced planning fundamentals and master data. Explanation of key tools and processes. Discussion of planning evaluation concepts.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Demand Management in SAP S</li> <li>• 4HANA: This section covers a comparison of production methods in various manufacturing environments.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Process Orders in SAP S</li> <li>• 4HANA: This section covers an introduction to process order components, processing, and relevant master data objects. Overview of Good Manufacturing Practices (GMP) features.</li> </ul>

## Top Valid C\_TS422\_2023 Exam Objectives Pass Certify | High Pass-Rate C\_TS422\_2023 PDF Questions: SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing

Many people worry about buying electronic products on Internet, like our C\_TS422\_2023 preparation quiz, because they think it is a kind of dangerous behavior which may bring some virus for their electronic product, especially for their computer which stores a great amount of privacy information. We must emphasize that our C\_TS422\_2023 simulating materials are absolutely safe without viruses, if there is any doubt about this after the pre-sale, we provide remote online guidance installation of our C\_TS422\_2023 exam practice.

### SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q15-Q20):

#### NEW QUESTION # 15

What does a line hierarchy in repetitive manufacturing represent?

- A. A production line with more than one work center
- B. A production line with an alternative sequence in the routing
- C. A production line with a parallel sequence in the routing
- D. A production line with prioritized work centers

**Answer: A**

Explanation:

A line hierarchy in repetitive manufacturing represents the structure of a production line that consists of multiple work centers. A line hierarchy is a master data object that defines the sequence and the relationship of the work centers that are involved in producing a material. A line hierarchy can be split into different levels, such as line segments, processing stations, or takt areas, to reflect the complexity and the variability of the production line. A line hierarchy can be used for planning and scheduling operations, controlling material flow, and monitoring production performance<sup>12</sup>.

The other options are not correct for the following reasons:

A production line with prioritized work centers (B): This is not correct. A line hierarchy does not define the priority of the work centers, but the order and the dependency of the work centers. The priority of the work centers can be determined by other factors, such as the capacity availability, the production rate, or the scheduling parameters.

A production line with a parallel sequence in the routing (C): This is not correct. A line hierarchy does not represent the parallel sequence in the routing, but the linear sequence of the work centers. A parallel sequence in the routing means that two or more operations can be performed simultaneously on different work centers for the same material. A parallel sequence in the routing can be modeled by using alternative sequences or parallel sequences in the line hierarchy<sup>3</sup>.

A production line with an alternative sequence in the routing (D): This is not correct. A line hierarchy does not represent the alternative sequence in the routing, but the main sequence of the work centers. An alternative sequence in the routing means that

there are different options for performing an operation on different work centers for the same material. An alternative sequence in the routing can be modeled by using alternative sequences or parallel sequences in the line hierarchy3.

### NEW QUESTION # 16

What are the prerequisites for a reporting point confirmation in repetitive manufacturing? Note: There are 2 correct answers to this question.

- A. Activating the reporting point backflush in the order-dependent parameters
- **B. Defining the operations as reporting points using the control key**
- **C. Activating the reporting point backflush in the work centers**
- D. Defining the relevant work centers in the routing

**Answer: B,C**

Explanation:

In SAP S/4HANA repetitive manufacturing, reporting point confirmation (e.g., via transaction MFBF) tracks progress at specific milestones. Prerequisites include:

\* Activating the reporting point backflush in the work centers (B): The work center (transaction CR02, Basic Data tab, field:

Backflush) must have backflushing activated (e.g., "Reporting Point Backflush" indicator). This enables goods movements (e.g., component consumption) at reporting points during confirmation, a key REM feature.

\* Defining the operations as reporting points using the control key (D): In the rate routing (CA21), operations designated as reporting points require a control key (field: Control Key) with the "Reporting Point" indicator checked (configured in OPJ8). This marks the operation as a confirmation milestone (e.g., RP01 control key).

Order-dependent parameters (A) apply to discrete manufacturing (OPL8), not REM, where the REM profile (OSP2) governs backflushing, not reporting points specifically. Defining work centers in the routing (C) is standard but insufficient without the control key specifying reporting points. This is per SAP's REM confirmation process.

### NEW QUESTION # 17

You want to create a production order.

What methods can you use?

Note: There are 2 correct answers to this question.

- A. Convert a purchase requisition
- **B. Create in Kanban process**
- **C. Create without material**
- D. Create by order release

**Answer: B,C**

### NEW QUESTION # 18

Advanced Planning uses master data from SAP S/4HANA Cloud Private Edition. In which data objects can you set the Advanced Planning flag? Note: There are 2 correct answers to this question.

- **A. Work center**
- **B. Material**
- C. Plant
- D. Production version

**Answer: A,B**

### NEW QUESTION # 19

You use planning strategy Finite Scheduling with Reverse and want to allow scheduling the past. How can you parameterize this in

the strategy profile?

- A. Specify a positive planning horizon.
- B. Specify a negative planning horizon.
- **C. Specify a negative offset time.**
- D. Specify a positive offset time.

**Answer: C**

Explanation:

The planning strategy Finite Scheduling with Reverse allows you to schedule production orders backwards from the requested delivery date, taking into account the available capacity and material constraints. To allow scheduling the past, you need to specify a negative offset time in the strategy profile. The offset time defines how far in the past the system can schedule the production order start date. For example, if you specify an offset time of -5 days, the system can schedule the production order start date up to 5 days before the current date. This can help you to avoid late deliveries and reduce lead times.

## NEW QUESTION # 20

.....

In order to meet different needs of our customers, we offer you three versions of C\_TS422\_2023 study materials for you. Each version has its own advantages, and you can choose the most suitable one according to your own needs. C\_TS422\_2023 PDF version is printable, and if you like paper one, you can choose this version. C\_TS422\_2023 soft test engine can stimulate the real exam environment, and you can build your confidence if you choose this version. C\_TS422\_2023 Online test engine can practice offline and can record the training process, if you have the needs like this, you can choose this version.
