

# 1Z1-182 New Dumps Ppt - New 1Z1-182 Test Bootcamp

BTW, DOWNLOAD part of DumpsActual 1Z1-182 dumps from Cloud Storage: [https://drive.google.com/open?id=19\\_1q8exfwgz-DFCqBuKkkwl8pfV0E5QW](https://drive.google.com/open?id=19_1q8exfwgz-DFCqBuKkkwl8pfV0E5QW)

Our practice exams are designed solely to help you get your 1Z1-182 certification on your first try. A Oracle 1Z1-182 practice test will help you understand the exam inside out and you will get better marks overall. It is only because you have practical experience of the exam even before the exam itself. DumpsActual offers authentic and up-to-date study material that every candidate can rely on for good preparation. Our top priority is to help you pass the Oracle Database 23ai Administration Associate (1Z1-182) exam on the first try. The key to passing the 1Z1-182 exam on the first try is vigorous practice. And that's exactly what you'll get when you prepare from our material. Each format excels in its own way and helps you get success on the first attempt.

DumpsActual is a website engaged in the providing customer 1Z1-182 VCE Dumps and makes sure every candidates passing actual test easily and quickly. We have a team of IT workers who have rich experience in the study of Oracle dumps torrent and they check the updating of Oracle top questions everyday to ensure the accuracy of exam collection.

## Oracle 1Z1-182 New Dumps Ppt: Oracle Database 23ai Administration Associate - DumpsActual Offers you Valid New Test Bootcamp

DumpsActual play the key role for assuring your success in Private Cloud Monitoring and Operations with 1Z1-182 exam. We incline your interest towards professional way of learning; motivate you to execute your learned concepts in practical industry. No more exam phobia exists if you have devotedly prepared through our 1Z1-182 Exam products, certain boost comes in your confidence level that routes you towards success pathway.

### Oracle 1Z1-182 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Displaying Creating and Managing PDBs: This section assesses the knowledge of Cloud Database Architects in creating pluggable databases (PDBs) from seeds or other techniques. It also covers modifying PDB modes and attributes to meet specific application requirements.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Describe Managing Database Instances: This section tests the knowledge of Database Administrators in performing essential tasks for managing database instances. It includes starting and shutting down databases, utilizing dynamic performance views, managing initialization parameter files, and using the Automatic Diagnostic Repository (ADR) for troubleshooting.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Employ Oracle-Supplied Database Tools: This section evaluates the abilities of Database Engineers and Support Specialists in identifying and using Oracle-supplied tools for managing databases. It focuses on leveraging tools to monitor, troubleshoot, and optimize database performance effectively.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Introduction to Auditing: This domain tests the abilities of Compliance Specialists in implementing database auditing practices. It includes creating, modifying, and maintaining auditing policies while applying value-based auditing techniques like Fine-Grained Auditing (FGA).</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.</li> </ul>

## Oracle Database 23ai Administration Associate Sample Questions (Q35-Q40):

### NEW QUESTION # 35

Which resource plan is used to manage the resources for the predefined maintenance window?

- A. The resources used by the predefined maintenance window can only be adjusted if you create a new resource plan in Resource Manager ...
- B. The predefined maintenance window starts automatically with 20% of the system resources ...
- C. By default, all predefined maintenance windows use the DEFAULT\_MAINTENANCE\_PLAN resource plan, and automated maintenance tasks run under subplan called ORA\$AUTOTASK.**
- D. The SYS\_GROUP consumer resource group policies define the resources assigned ...

**Answer: C**

Explanation:

A .True. Oracle 23ai uses DEFAULT\_MAINTENANCE\_PLAN with ORA\$AUTOTASK subplan for maintenance tasks (e.g., stats gathering). Others are incorrect or speculative.

### NEW QUESTION # 36

You want to apply the principle of least privilege in all your live databases. One of your requirements is to revoke unnecessary privileges from all users who have them using Privilege Analysis. Which two types of analyses can be done using the DBMS\_PRIVILEGE\_CAPTURE package?

- A. Analysis of privileges that a user has on other schemas' objects.
- B. Analysis of privileges granted indirectly to a role that are then used by a user who has been granted that role.**
- C. Analysis of privileges granted directly to a role that are then used by a user who has been granted that role.**

- D. Analysis of privileges that a user has on their own schema objects.
- E. Analysis of all privileges used by the SYS user.

**Answer: B,C**

Explanation:

A .False. Limited to captured privileges, not all schema objects.  
 B .False. SYS is excluded from capture.  
 C .True. Captures indirect role privileges used.  
 D .True. Captures direct role privileges used.  
 E .False. Focus is on roles, not self-owned objects broadly.

### NEW QUESTION # 37

Which two are benefits of external tables?

- A. They support DELETEs, which transparently deletes records in the file system as if they were table rows.
- B. They can be queried, transformed, and joined with other tables without having to load the data first.
- C. The results of a complex join or aggregating function or both can be unloaded to a file for transportation to other systems.
- D. They support UPDATEs, which transparently updates records in the file system as if they were table rows.
- E. They can be queried while the database is in the MOUNT state like dynamic performance views.

**Answer: B,C**

Explanation:

A .False. External tables are read-only; no DELETE.  
 B .False. Require OPEN state, unlike V\$ views.  
 C .False. No UPDATE support; read-only.  
 D .True. Queryable like regular tables without loading.  
 E .True. Data Pump can unload query results to files.

### NEW QUESTION # 38

Which two statements are true about User Authentication in an Oracle Database?

- A. Password File authentication must be used for system-privileged administrative users.
- B. REMOTE\_LOGIN\_PASSWORDFILE must be set to EXCLUSIVE to permit password changes for system-privileged administrative users.
- C. Password File authentication is supported for any type of database user.
- D. Operating System authentication may be used for system-privileged administrative users.
- E. Password authentication must be used for system-privileged administrative users.

**Answer: A,D**

Explanation:

User authentication in Oracle 23ai determines how users (especially administrative ones) connect to the database. Let's analyze each option with extensive detail:

A . Operating System authentication may be used for system-privileged administrative users.

True. OS authentication allows users mapped to OS accounts (e.g., ops\$oracle) to connect without a password, often used for administrative users like SYS or SYSTEM. This is configured by creating an externally authenticated user (e.g., CREATE USER "OPS\$ORACLE" IDENTIFIED EXTERNALLY) and relies on the OS to verify identity.

Mechanics: When a user logs in via sqlplus / as sysdba, Oracle checks the OS user against the dba group (Unix) or ORA\_DBA (Windows). If matched, no password is needed, leveraging OS security.

Practical Use: Common for DBAs managing local instances, reducing password management overhead.

Edge Case: Requires REMOTE\_LOGIN\_PASSWORDFILE=NONE for exclusive OS auth, but this isn't mandatory if a password file exists alongside.

Historical Note: Introduced in early Oracle versions, this remains a robust option in 23ai for local admin access.

B . Password authentication must be used for system-privileged administrative users.

False. "Must" is incorrect; password authentication (e.g., sqlplus sys/password) is an option, not a requirement. OS authentication or password file authentication can also be used for users like SYS. This option overstates the necessity of password-based login.

Why Incorrect: Oracle's flexibility allows multiple methods, contradicting the absolute phrasing here.

C . Password File authentication is supported for any type of database user.

False. Password file authentication is restricted to users with SYSDBA, SYSOPER, or similar system privileges (e.g., SYSBACKUP). Regular users (e.g., HR) can't use the password file (orapw<sid>); they rely on database authentication (passwords stored in the DB) or external methods.

Mechanics: The password file stores hashed credentials for privileged users, checked during remote AS SYSDBA logins.

Why Incorrect: Extending this to "any user" ignores Oracle's security model limiting password file usage.

D . REMOTE\_LOGIN\_PASSWORDFILE must be set to EXCLUSIVE to permit password changes for system-privileged administrative users.

False. REMOTE\_LOGIN\_PASSWORDFILE=EXCLUSIVE allows a dedicated password file for one instance, enabling password changes via ALTER USER SYS IDENTIFIED BY newpass. However, SHARED mode also permits changes for SYS, though not for other users added to the file. The "must" overstates the requirement; it's sufficient, not necessary.

Mechanics: EXCLUSIVE locks the file to one DB, while SHARED allows multiple DBs to use it, with restrictions on non-SYS users.

E . Password File authentication must be used for system-privileged administrative users.

True. For remote administrative access (e.g., sqlplus sys/password@orcl as sysdba), a password file is mandatory when REMOTE\_LOGIN\_PASSWORDFILE is EXCLUSIVE or SHARED. Local OS authentication is an alternative, but for network-based admin tasks, the password file is required, making this statement true in that context.

Mechanics: Set via orapwd (e.g., orapwd file=orapworcl password=oracle entries=10), enabling remote SYSDBA logins.

Edge Case: If REMOTE\_LOGIN\_PASSWORDFILE=NONE, only OS auth works locally, but this isn't the default or typical setup.

## NEW QUESTION # 39

What services does the Automatic Workload Repository (AWR) provide for the database self-tuning functionality?

- A. Creates a new PDB by plugging in a previously unplugged Non-CDB.
- B. Creates a new PDB with the original SID of the Non-CDB.
- C. Simplifies the process of migrating Non-CDB databases to the cloud.
- D. Enables the creation of a Non-CDB from a CDB.

**Answer: C**

Explanation:

A .False. AWR doesn't create PDBs.

B .True. AWR stats aid migration planning (e.g., performance baselines).

C .False. AWR doesn't convert CDB to Non-CDB.

D .False. SID management isn't AWR's role.

## NEW QUESTION # 40

.....

The Oracle 1Z1-182 exam practice questions are being offered in three different formats. These formats are Oracle 1Z1-182 web-based practice test software, desktop practice test software, and PDF dumps files. All these three Oracle 1Z1-182 exam questions format are important and play a crucial role in your Oracle Database 23ai Administration Associate (1Z1-182) exam preparation. With the Oracle 1Z1-182 exam questions you will get updated and error-free Oracle Database 23ai Administration Associate (1Z1-182) exam questions all the time. In this way, you cannot miss a single DumpsActual Oracle 1Z1-182 exam question without an answer.
