CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q119-Q124):

NEW QUESTION # 119

Which statement concerning Network Feeds is most correct?

- A. Network Feeds are generated on external HTTP/HTTPS servers that provides an ability to add custom cyber intelligence feeds into the Access Control engine
- B. Network Feeds are external services like Zoom, Office365. Ips are maintained on the Check Point Cloud and objects are automatically synced with the cloud at regular intervals
- C. Network Feeds are generated on external HTTP/HTTPS servers that are fetched by Security Gateways
- D. Network Feeds are the objects manually created in the SmartConsole with a name but no IP address. They are used in

security policies and resolve to an IP address locally on each Security Gateway

Answer: C

Explanation:

Network Feeds are dynamically updated lists hosted on external HTTP or HTTPS servers that Security Gateways periodically fetch to automatically retrieve IP addresses or networks, allowing these external threat intelligence feeds to be used directly in policy enforcement.

NEW QUESTION # 120

During the policy installation, the CPM process needs to make a decision for Full Installation Policy or Fast Installation Policy. Depending on the decision the CPM process decides what kind of dump will be used. Which statement is true for the Fast Installation Policy?

- A. Modern Dump always combines the Legacy Dump in which the pre-verified and pre-generated code is included
- B. Modern Dump files are sent to the FWM (Firewall) process, which is responsible for code generation and compilation
- **C. Modern Dump files already include the pre-verified and pre-generated code**
- D. Modern Dump files never include the pre-verified and pre-generated code

Answer: C

Explanation:

For a Fast Installation Policy, Modern Dump is used and it already contains pre-verified and pre-generated compiled policy code, allowing the gateway to load the policy directly without additional compilation, which significantly speeds up installation.

NEW QUESTION # 121

When installing policy, which process is responsible for Verification / conversion?

- A. FWD
- **B. FWM**
- C. CPM
- D. CPD

Answer: B

Explanation:

The Firewall Management process performs policy verification and conversion on the Management Server by compiling the security policy into the executable format that gateways can enforce during installation.

NEW QUESTION # 122

Which of the following is NOT a method used by Identity Awareness for acquiring identity?

- A. Active Directory Query
- B. Remote Access
- C. RADIUS
- **D. Cloud IdP (Identity Provider)**

Answer: D

NEW QUESTION # 123

In the SmartConsole, where can the administrator adjust the timing of the Security Management High Availability (HA) automatic synchronization?

- A. Synchronization settings are preconfigured and cannot be changed by the administrator.
- B. Edit the Primary SMS object and click on Other > Management HA.
- C. Automatic synchronization is not available in Security Management HA and must be done manually.
- **D. Global Properties > Advanced > Management High Availability.**

Answer: D

Explanation:

In SmartConsole, the timing for automatic synchronization in Security Management High Availability can be adjusted under Global Properties → Advanced → Management High Availability, allowing administrators to configure the frequency of automatic updates between active and standby servers.

NEW QUESTION # 124

.....

A certificate may be a threshold for many corporations, it can decide that if you can enter a good company. There are 156-315.82 test dumps in our company with high quality, if you choose us pass guarantee and money back guarantee, if you indeed fail the exam, your money will be returned to your account. You can take easy to use the 156-315.82 Test Dumps, since we have the first-hand information, we will ensure that you will get the latest information.
