The passing score for the exam is 70%, and candidates who pass the exam receive a certificate that is valid for three years.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q20-Q25):

NEW QUESTION # 20

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Heating
- B. Electrolysis
- C. Lighting
- D. Turning a motor

Answer: B

Explanation:
Explanation

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 21

Which one of the following uses sensors such as laser beams or touch sensor?

- A. CCTV

CDCS-001 Test Questions | Training CDCS-001 Materials

If you are finding a study material to prepare your exam, our material will end your search. Our CDCS-001 exam torrent has a high

quality that you can't expect. I think our CDCS-001 prep torrent will help you save much time, and you will have more free time to do what you like to do. I can guarantee that you will have no regrets about using our CDCS-001 Test Braindumps When the time for action arrives, stop thinking and go in, try our CDCS-001 exam torrent, you will find our products will be a very good choice for you to pass your CDCS-001 exam and get you certificate in a short time.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q54-Q59):

NEW QUESTION # 54

True or False: Human error is a major cause of data center downtime

- A. False
- **B. True**

Answer: B

Explanation:

Human error is a major cause of data center downtime. Human mistakes are one of the top causes of data center outages, accounting for around one-third of all downtime incidents. Common causes of human error in data centers include misconfiguration, inadequate maintenance, and improper security practices. To reduce the risk of human error, it is important to ensure that data center staff receive proper training, have adequate access control measures in place, and are familiar with best practices for data center operations.

NEW QUESTION # 55

If a waveform period is determined to be 10 microseconds in duration, what is the frequency of the signal?

- A. 100 Hz
- B. 1000 Hz
- **C. 100 kHz**
- D. 10 kHz

Answer: C

Explanation:

Explanation

Frequency is the inverse of period, so to calculate the frequency of a signal with a period of 10 microseconds, you would divide 1 by the period, which is equal to 100 kHz.

NEW QUESTION # 56

A _____ generator system is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment.

- A. software
- **B. active**
- C. passive
- D. standby

Answer: B

Explanation:

A Standby Generator System is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment. The generator provides power to essential appliances and equipment in the event of a power outage. Standby Generator Systems are usually powered by gasoline, diesel, natural gas, or propane, and they are designed to be able to be activated quickly in the event of an emergency.

NEW QUESTION # 57

What is the term for the distance a signal propagates during one cycle?

- A. frequency
- **B. wavelength**
- C. period
- D. amplitude

Answer: B

NEW QUESTION # 58

A _____ generator system is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment.

- A. software
- **B. standby**
- C. active
- D. passive

Answer: B

Explanation:

Explanation

A Standby Generator System is a combination of an electrical generator and a mechanical engine mounted together to form a single piece of equipment. The generator provides power to essential appliances and equipment in the event of a power outage. Standby Generator Systems are usually powered by gasoline, diesel, natural gas, or propane, and they are designed to be able to be activated quickly in the event of an emergency.

NEW QUESTION # 59

.....
