Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q76-Q81):

NEW QUESTION # 76

CRM Analytics users at Cloud Kicks are granted access to an app with specific dashboards. When trying to download a specific widget, they are unable to do so.

What is causing the issue?

- A. The permission set for the users is missing the download data permission.
- B. The dashboard has been created for internal use and the users have a view only license.
- C. The users have access to the dashboard but not the dataset.

Answer: A

Explanation:

As in the previous question, the issue is related to permissions. Users can be granted access to dashboards and apps, but if their permission set does not explicitly allow the "Download Data" action, they will not be able to download the widget data. This is a common issue encountered when users have restricted permissions, especially in environments where security and data access are tightly controlled.

How should the consultant accomplish this?

- A. Create an XMD node in the recipe to change the label and color of the values in the fields.
- B. In the explorer's field panel, select the boolean fields and use the "edit values" option on the fields to change values and colors.
- C. Select the boolean fields in the explorer's field panel, select the boolean fields, then create a derived dimension.
