You are going to find the online version of our C-CPI-2506 exam prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our C-CPI-2506 Study Materials, you don't need to worry about no network.

### SAP Certified Associate - Integration Developer Sample Questions (Q11-Q16):

#### NEW QUESTION # 11

You have created an API provider of the type Internet. What http response code indicates success?

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

The http response code that indicates success is 200. The 200 response code means that the request was successfully processed and the response contains the expected data. Other response codes in the 2xx range also indicate success, but with some variations. For example, 201 means that a resource was created, 202 means that a request was accepted but not completed yet, and 204 means that there is no content in the response. #### NEW QUESTION # 12

What are the maturity levels of the SAP Integration Solution Advisory Method-ology? Note: There are 2 answers to this question.

- A. Implement your integration architectural strategy.
- **B. Assess your integration strategy**
- **C. Design your hybrid integration platform**
- D. Enable your integration structure.

**Answer: B,C**

Explanation:

The maturity levels of the SAP Integration Solution Advisory Methodology are as follows:

Assess your integration strategy. This level helps you evaluate your current integration landscape and identify the gaps and challenges that need to be addressed.

Design your hybrid integration platform. This level helps you define your target integration architecture and select the best-fit integration technologies and tools for your scenarios.

Implement your integration architectural strategy. This level helps you execute your integration projects and deliver value to your business.

Enable your integration structure. This level helps you establish a governance model and best practices for your integration operations and maintenance. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 13

How do you configure a SOAP adapter for asynchronous processing?

- A. Message Exchange Pattern: Request-Reply Process Settings Robust
- B. Message Exchange Pattern: One-Way Process Settings: Robust
- C. Message Exchange Pattern: Request-Reply Process Settings WS Standard
- **D. Message Exchange Pattern: One-Way Process Settings: WS Standard**

**Answer: D**

Explanation:

To configure a SOAP adapter for asynchronous processing, you must set the message exchange pattern to one-way and the process settings to WS standard. The message exchange pattern defines how the sender and receiver communicate with each other using SOAP messages. The one-way pattern means that the sender sends a message to the receiver without expecting a response. The process settings define how the SOAP adapter handles errors and acknowledgements during message processing. The WS standard setting means that the SOAP adapter uses WS-ReliableMessaging protocol to ensure reliable delivery of messages and WS-Addressing protocol to identify the endpoints and actions of messages. #### NEW QUESTION # 14

What are the key capabilities of the SAP BTP Integration Suite? Note: There are 2 correct answers to this question.

- A. API Management
- B. Connectivity Service
- C. Open Connectors
- D. SAP Business Application Studio

Answer: A,B

Explanation:

The key capabilities of the SAP BTP Integration Suite include API Management and Connectivity Service. API Management allows you to create, publish, monitor, and secure APIs across different environments and platforms. Connectivity Service enables you to establish secure and reliable connections between cloud applications and on-premise systems using various protocols and adapters. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

#### NEW QUESTION # 15

What are some aspects of "holistic integration" of the SAP Integration Suite? Note: 3 answers are correct.

- A. Event Integration
- B. Data Integration
- C. Domain Integration
- D. Process Integration
- E. Cloud Integration

Answer: A,B,D

Explanation:

Some aspects of "holistic integration" of the SAP Integration Suite are process integration, event integration, and data integration. Process integration refers to the orchestration and automation of business processes across different systems and applications. Event integration refers to the communication and coordination of events between different sources and consumers. Data integration refers to the extraction, transformation, and loading of data between different sources and targets.
