## Quiz High Pass-Rate Microsoft - Reliable SC-300 Test Pattern

SC-300 test guide is an examination material written by many industry experts based on the examination outlines of the calendar year and industry development trends. Its main purpose is to help students who want to obtain the certification of SC-300 to successfully pass the exam. Compared with other materials available on the market, the main feature of SC-300 Exam Materials doesn't like other materials simply list knowledge points. According to our statistics on the data so far, the passing rate of the students who have purchased one exam exceeds 99%, which is enough to see that SC-300 test guide is a high-quality product that can help you to realize your dream.

To pass the Microsoft SC-300 exam, candidates must demonstrate their ability to implement and manage Azure Active Directory, configure access management for Azure resources, and implement multi-factor authentication. They must also be able to monitor and troubleshoot identity and access solutions, as well as implement conditional access policies in Azure. SC-300 Exam consists of multiple-choice questions and requires a passing score of 700 out of 1000. Passing the Microsoft SC-300 exam is a great way to demonstrate your expertise in identity and access management in Azure, and can help you advance your career in this field.

## Microsoft Identity and Access Administrator Sample Questions (Q320-Q325):

### NEW QUESTION # 320

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

You configure Microsoft Entra Internet Access. Which users can manage Microsoft Entra Internet Access?

- A. User1 only
- B. User1, User2, and User3
- C. User3only

- D. User1 and User2 only
- E. User2only

**Answer: D**

Explanation:

In Microsoft Entra Internet Access and Private Access, administrative permissions are controlled through specific Microsoft Entra roles. The SC-300 exam content (module "Manage Microsoft Entra Global Secure Access") identifies that management of Global Secure Access features requires either of these roles:

- \* Global Administrator, or
- \* Network Access Administrator

These roles can configure, deploy, and manage settings for both Microsoft Entra Internet Access and Microsoft Entra Private Access in the Microsoft Entra admin center.

From Microsoft Learn:

"To configure and manage Microsoft Entra Internet Access or Private Access, you must be assigned either the Global Administrator or the Network Access Administrator role." Thus, if:

- \* User1 = Global Administrator
- \* User2 = Network Access Administrator
- \* User3 = (Any other role)

Then only User1 and User2 can manage Microsoft Entra Internet Access.

### NEW QUESTION # 321

You have a Microsoft Entra tenant that contains the users shown in the following table.

Name	Member of
Admin1	Group1
Admin2	Group2
Admin3	Group1, Group2

You add the following assignment for the User Administrator role:

- \* Scope type: Directory
- \* Selected members: Group1
- \* Assignment type: Active
- \* Assignments starts August 15, 2022
- \* Assignment ends: December 15, 2022

You add the following assignment for the Exchange Administrator role:

- \* Scope type: Directory
- \* Selected members: Group2
- \* Assignment type: Eligible
- \* Assignments starts: October 15, 2022
- \* Assignment ends: January 15, 2023

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
On November 15, 2022, Admin1 can reset the password of Admin2.	<input type="radio"/>	<input type="radio"/>
On October 15, 2022, Admin2 signs in and can administer Exchange Online.	<input type="radio"/>	<input type="radio"/>
On September 1, 2022, Admin3 can reset the password of Admin1.	<input type="radio"/>	<input type="radio"/>

**Answer:**

Explanation:

Statements	Yes	No
On November 15, 2022, Admin1 can reset the password of Admin2.	<input type="radio"/>	<input checked="" type="radio"/>
On October 15, 2022, Admin2 signs in and can administer Exchange Online.	<input checked="" type="radio"/>	<input type="radio"/>
On September 1, 2022, Admin3 can reset the password of Admin1.	<input checked="" type="radio"/>	<input type="radio"/>

**NEW QUESTION # 322**

You have an Azure Active Directory (Azure AD) tenant that contains Azure AD Privileged Identity Management (PIM) role settings for the User administrator role as shown in the following exhibit.

... ContosoAzureAD > Identity Governance > Privileged Identity Management > ContosoAzureAD > User Administrator >

### Role setting details - User Administrator

Privileged Identity Management | Azure AD roles

Edit

---

**Activation**

SETTING	STATE
Activation maximum duration (hours)	8 hour(s)
Require justification on activation	Yes
Require ticket information on activation	No
On activation, require Azure MFA	Yes
Require approval to activate	Yes
Approvers	None

---

**Assignment**

SETTING	STATE
Allow permanent eligible assignment	No
Expire eligible assignments after	15 day(s)
Allow permanent active assignment	No
Expire active assignments after	1 month(s)
Require Azure Multi-Factor Authentication on active assignment	No
Require justification on active assignment	No

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the

graphic.

NOTE: Each correct selection is worth one point.

A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice].

- 8 hours
- 15 days
- 1 month

Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice].

- global administrator only
- global administrator or privileged role administrator
- permanently assigned user administrator
- privileged role administrator only

Answer:

Explanation:

A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice].

- 8 hours
- 15 days
- 1 month

Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice].

- global administrator only
- global administrator or privileged role administrator
- permanently assigned user administrator
- privileged role administrator only

Explanation

A user who requires access to the User administration role must perform multi-factor authentication (MFA) every [answer choice].

Before an eligible user can perform a task that requires the User administrator role, the activation must be approved by a [answer choice].

### NEW QUESTION # 323

You need to meet the technical requirements for license management by the helpdesk administrators.

What should you create first, and which tool should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Object to create for each branch office:

- An administrative unit
- A custom role
- A Dynamic User security group
- An OU

Tool to use:

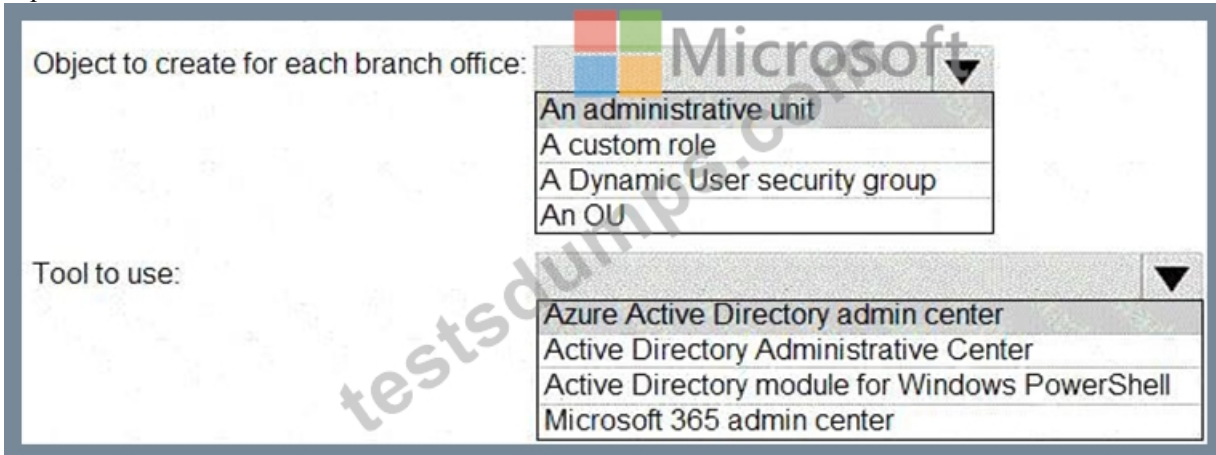

- Azure Active Directory admin center
- Active Directory Administrative Center
- Active Directory module for Windows PowerShell
- Microsoft 365 admin center

Answer:

Explanation:

Explanation:

As per the Microsoft SC-300: Identity and Access Administrator official study materials and Microsoft Learn documentation on "Manage administrative units in Azure Active Directory", Administrative Units (AUs) are designed to delegate administrative permissions within large organizations based on divisions such as geography or department. They provide scoped administrative control -allowing helpdesk or user administrators to manage users only within a specific subset of the directory, such as a branch office or department.

In this scenario, Contoso's technical requirement states:

"The helpdesk administrators must be able to manage licenses for only the users in their respective office." To fulfill this, you must create an administrative unit for each branch office (e.g., Montreal, London, Seattle) and assign helpdesk administrators scoped to those AUs. This ensures that each helpdesk admin can only manage licenses for the users within their respective office, enforcing the principle of least privilege.

The Azure Active Directory admin center is the correct tool for creating and managing administrative units.

SC-300 guidance clarifies that administrative units are Azure AD objects, not on-premises Active Directory objects like Organizational Units (OUs). Therefore, they are created and managed exclusively through the Azure portal, Microsoft Graph, or PowerShell for Azure AD, but the most straightforward interface for exam purposes is the Azure AD admin center.

#### NEW QUESTION # 324

You need to configure the assignment of Azure AD licenses to the Litware users. The solution must meet the licensing requirements. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Azure AD Connect settings to modify:

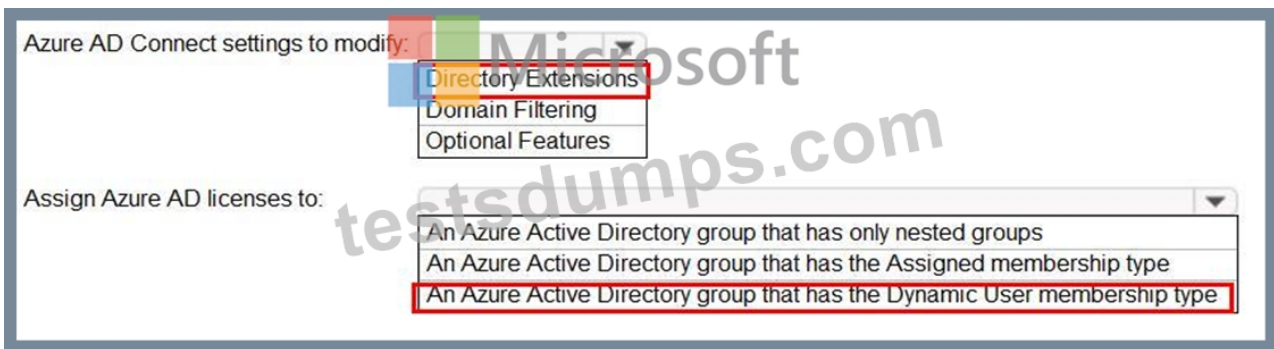

Assign Azure AD licenses to:

Answer:

Explanation:

Topic 2, Contoso, Ltd  
Existing Environment

The on-premises network of Contoso contains an Active Directory domain named contos.com. The domain contains an organizational unit (OU) named Contoso\_Resources. The Contoso\_Resources OU contains all users and computers. The Contoso.com Active Directory domain contains the users shown in the following table.

Name	Office	Department
Admin1	Montreal	Helpdesk
User1	Montreal	HR
User2	Montreal	HR
User3	Montreal	HR
Admin2	London	Helpdesk
User4	London	Finance
User5	London	Sales
User6	London	Sales
Admin3	Seattle	Helpdesk
User7	Seattle	Sales
User8	Seattle	Sales
User9	Seattle	Sales

Microsoft 365/Azure Environment

Contoso has an Azure AD tenant named Contoso.com that has the following associated licenses:

Microsoft Office 365 Enterprise E5

Enterprise Mobility + Security

Windows 10 Enterprise E5

Project Plan 3

Azure AD Connect is configured between azure AD and Active Directory Domain Serverless (AD DS). Only the Contoso Resources OU is synced.

Helpdesk administrators routinely use the Microsoft 365 admin center to manage user settings.

User administrators currently use the Microsoft 365 admin center to manually assign licenses, All user have all licenses assigned besides following exception:

The users in the London office have the Microsoft 365 admin center to manually assign licenses. All user have licenses assigned besides the following exceptions:

The users in the London office have the Microsoft 365 Phone System License unassigned.

The users in the Seattle office have the Yammer Enterprise License unassigned.

Security defaults are disabled for Contoso.com.

Contoso uses Azure AD Privileged identity Management (PIM) to project administrator roles.

Problem Statements

Contoso identifies the following issues:

- \* Currently, all the helpdesk administrators can manage user licenses throughout the entire Microsoft 365 tenant.
- \* The user administrators report that it is tedious to manually configure the different license requirements for each Contoso office.
- \* The helpdesk administrators spend too much time provisioning internal and guest access to the required Microsoft 365 services and apps.
- \* Currently, the helpdesk administrators can perform tasks by using the: User administrator role without justification or approval.
- \* When the Logs node is selected in Azure AD, an error message appears stating that Log Analytics integration is not enabled.

Planned Changes

Contoso plans to implement the following changes.

Implement self-service password reset (SSPR). Analyze Azure audit activity logs by using Azure Monitor-Simplify license allocation for new users added to the tenant. Collaborate with the users at Fabrikam on a joint marketing campaign. Configure the User administrator role to require justification and approval to activate.

Implement a custom line-of-business Azure web app named App1. App1 will be accessible from the internet and authenticated by using Azure AD accounts.

For new users in the marketing department, implement an automated approval workflow to provide access to a Microsoft SharePoint Online site, group, and app.

Contoso plans to acquire a company named Corporation. One hundred new A Datum users will be created in an Active Directory OU named Adatum. The users will be located in London and Seattle.

Technical Requirements

Contoso identifies the following technical requirements:

- \* AH users must be synced from AD DS to the contoso.com Azure AD tenant.
- \* App1 must have a redirect URI pointed to <https://contoso.com/auth-response>.
- \* License allocation for new users must be assigned automatically based on the location of the user.
- \* Fabrikam users must have access to the marketing department's SharePoint site for a maximum of 90 days.
- \* Administrative actions performed in Azure AD must be audited. Audit logs must be retained for one year.
- \* The helpdesk administrators must be able to manage licenses for only the users in their respective office.
- \* Users must be forced to change their password if there is a probability that the users' identity was compromised.
