Information-Technology-Management Latest Dumps Sheet - Pass Guaranteed Quiz Information-Technology-Management - WGU Information Technology Management QGC1 First-grade Pass Exam

Your life will take place great changes after obtaining the Information-Technology-Management certificate. Many companies like to employ versatile and comprehensive talents. What you have learnt on our Information-Technology-Management study materials will meet their requirements. So you will finally stand out from a group of candidates and get the desirable job. Also, learning our Information-Technology-Management Study Materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues.

As this new frontier of personalizing the online experience advances, our Information-Technology-Management exam guide is equipped with comprehensive after-sale online services. And we have customer service people 24 hours online to deal with your difficulties on our Information-Technology-Management exam questions. If you have any question or request for further assistance about the Information-Technology-Management study braindumps, you can leave us a message on the web page or email us. All in all, we take an approach to this market by prioritizing the customers first, and we believe the customer-focused vision will help our Information-Technology-Management test guide' growth.

Information-Technology-Management Pass Exam | Information-Technology-Management PDF VCE

Our Information-Technology-Management learning guide is for the world and users are very extensive. In order to give users a better experience, we have been constantly improving. The high quality and efficiency of Information-Technology-Management exam prep has been recognized by users. The high passing rate of our Information-Technology-Management test materials are its biggest feature. As long as you use Information-Technology-Management Exam Prep, you can certainly harvest what you want thing. Not only you can pass the Information-Technology-Management exam in the shortest time, but also you can otain the dreaming Information-Technology-Management certification to have a brighter future.

WGU Information Technology Management QGC1 Sample Questions (Q148-Q153):

NEW QUESTION # 148
Which risk do strategic chief information officers face?

- A. Falling behind on market trends
- B. Losing credibility with non-technical employees
- C. Organizational resistance to change
- D. Focusing too much on technical solutions

Answer: C

Explanation:
Strategic CIOs focus on innovation and aligning IT with business growth. A major risk they face is organizational resistance to change, as employees and departments may be reluctant to adopt new systems, processes, or technologies. Overcoming this resistance requires strong change management, communication, and leadership skills.
Option A: Incorrect-while staying updated is important, the larger challenge is adoption within the organization.
Option C: Incorrect-strategic CIOs emphasize business alignment, not just technical focus.
Option D: Incorrect-credibility risks exist but are not the primary challenge.
Therefore, the primary risk is organizational resistance to change.

NEW QUESTION # 149
Which two benefits does RFID tagging offer for supply chain management? Choose 2 answers.

- A. Automates the different activities of the supply chain
- B. Discards inconsistent, incorrect, or incomplete information
- C. Tracks a product's journey from manufacturing facility to store
- D. Serves as a unique product identifier

Answer: C,D

Explanation:
* RFID Tagging Benefits in Supply Chain Management:
* Unique Product Identifier:RFID tags provide a unique identifier for each product, enabling precise tracking and inventory management.
* Product Tracking:RFID tags allow continuous tracking of products throughout their journey in the supply chain, from manufacturing to delivery.
* Why Other Options Are Incorrect:
* Option A:While RFID can streamline certain activities, it does not automate the entire supply chain.
* Option D:RFID is not designed to discard incorrect or incomplete information but rather to provide accurate tracking.
References:
* RFID in Supply Chain Management - IEEE
* "Enhancing Supply Chain Visibility with RFID" - Gartner

NEW QUESTION # 150
Which type of network topology entirely shuts down if there is a break in the main cable?

- A. Wireless
- B. Ring
- C. Star
- D. Bus

Answer: D

Explanation:
In a bus topology, all devices share a single central cable (backbone). If this cable fails, the entire network becomes inoperable. This topology is simple and cost-effective but lacks redundancy.
:
Tanenbaum, A. S. (2011). Computer Networks. Pearson Education.

NEW QUESTION # 151
What is the purpose of the Internet Use portion of the IT ethics policy?

- A. To identify company branding for use in communications
- B. To improve worker productivity
- C. To specify which email messages may be read by others
- D. To specify what a user can and cannot do with company printers

Answer: B

Explanation:
* Purpose of Internet Use Policy in IT Ethics:
* An Internet Use Policy is a subset of an organization's IT ethics policy. It outlines acceptable use of the organization's internet resources by employees.
* By defining clear guidelines, the policy aims to minimize time wasted on personal browsing and ensure internet use aligns with business goals.
* Relation to Worker Productivity:
* The policy is designed to prevent misuse of the internet (e.g., excessive social media use or visiting non-work-related websites), which can negatively impact productivity.
* Encouraging responsible use fosters a professional environment and helps employees focus on work-related tasks.
* Why Other Options Are Incorrect:
* Option B:Email monitoring may be part of broader IT security policies but is not the focus of Internet Use policies.
* Option C:Branding guidelines apply to communication policies, not internet usage policies.
* Option D:Printer usage is covered under equipment policies, not internet use policies.
References:
* "Employee Internet Use Policy Guidelines" - SHRM
* IT Ethics and Acceptable Use Policies, ISO 27002

NEW QUESTION # 152
What is the goal of reviewing after deployment in the system development life cycle (SDLC)?

- A. To ensure users are properly trained
- B. To evaluate system success and identify improvements
- C. To plan the next phase of system upgrades
- D. To confirm the system meets original requirements

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The review conducted after deployment (often called a post-implementation review or post-deployment review) in the SDLC is intended to evaluate how successful the system is in the live environment and to identify opportunities for improvement. This review

looks at:

Whether the system is delivering expected business benefits

How well it performs in real operational conditions

Feedback from users about usability and effectiveness

Issues encountered during and after rollout

Lessons learned for future projects

The emphasis is on continuous improvement and learning from the implementation experience to refine the current system and improve future system development efforts.

Option A (To plan the next phase of system upgrades) may be a result of the review, but planning upgrades is not the primary goal of the review itself.

Option B (To ensure users are properly trained) is part of deployment and change management activities, not the main goal of a post-deployment review.

Option D (To confirm the system meets original requirements) is largely addressed during system and acceptance testing before deployment.

Therefore, the goal of reviewing after deployment is to evaluate system success and identify improvements.
