AZ-800 Pass-Sure Materials: Administering Windows Server Hybrid Core Infrastructure - AZ-800 Training Guide & AZ-800 Quiz Torrent

It's universally acknowledged that passing the exam is a good wish for all candidates, if you choose AZ-800 study materials of us, we can ensure you that you can pass the exam just one time. We have the professional team to search for and study the latest information for exam, therefore you can get the latest information. Furthermore, the quality and accuracy for AZ-800 Exam briandumps are pretty good. We also pass guarantee and money back guarantee for you fail to pass the exam. Or if you have other exam to attend, we will replace other 2 valid exam dumps for you freely.

Exam Content

The next point for you to know is the exam content. The AZ-800 test consists of five topics in which you should be proficient. The first topic is the most extensive one and is dedicated to deploying and managing AD DS in on-premises and cloud environments. In this domain, you should have a good understanding of how to deploy and operate AD DS domain controllers, work in multi-domain, multi-forest, and multi-site environments, apply hybrid identities. In addition, your skills to create and operate AD DS security principals, manage Windows Server will be assessed as well.

The second topic refers to managing Windows Server and workloads in a hybrid environment. This implies that you are competent in dealing with Windows Server in a hybrid environment and Azure services to operate Windows Servers and workloads. Thus, you can demonstrate your skills to configure CredSSP, PowerShell Remoting, JEA, operate updates for Windows machines, manage Windows Servers, integrate Windows Servers with Azure Security Center or Log Analytics.

The third domain focuses on managing virtual machines and containers. The aim of this domain is to measure your abilities in working with VM memory, VM Resource Groups, VM CPU Groups, VM Checkpoints, Integration Services, NIC teaming, and Hyper-V switch. This subject area also includes the ability to create and operate containers, and operate Azure Virtual Machines based on Windows Server.

The fourth domain aims to check your skills in applying and operating an on-premises and hybrid networking infrastructure. In this domain you are expected competency in utilizing on-premises and hybrid name resolution, operating IP addressing in hybrid and on-premises scenarios, applying on-premises and hybrid network connectivity. Thus, you should possess top-notch skills to apply DNSSEC, integrate DNS with AD DS, configure DNS forwarding, operate IPAM, create IP reservations, apply Azure Network Adapter, Web App Proxy, Azure Replay.

The fifth topic refers to managing storage and file services. This part evaluates your skills in operating Azure File Sync, operating Windows Server files shares, and Windows Server storage. To deal with the questions from this domain, you need to be able to create Azure File Sync service, monitor File Sync, create cloud endpoints, BranchCache, apply DFS, configure volumes, disks, and Data Deduplication.

Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q263-Q268):

NEW QUESTION # 263

You have on-premises Windows devices.

You have an Azure subscription that contains a virtual network named VNet1.

You need to create a Site-to-Site (S2S) VPN between the on-premises network and VNet1.

Which three resources should you create? Each correct answer present part of the solution.

NOTE; Each correct selection is worth one point.

- A. a network security group (NSG)
- B. a VPN connection
- C. a virtual network gateway
- D. an Azure Route Server
- E. a local network gateway
- F. an Azure NAT gateway

Answer: B,C,E

NEW QUESTION # 264

Your network contains an Active Directory Domain Services (AD DS) domain named contoso.com. The domain contains the servers shown in the following table.

Name	Role
Server1	DFS Namespaces
Server2	DFS Replication
Server3	DFS Namespaces, DFS Replication
Server4	Microsoft

You need to create a Distributed File System (DFS) namespace that will contain the following:

- * A domain-based namespace named \\contoso.com\Public
- * A folder named Finance

Which servers can you configure as folder targets for the Finance folder?

- A. Server1, Server2, Server3, and Server4
- **B. Server2 and Servers only**
- C. Server1 and Server3 only
- D. Setver3 only
- E. Server1, Server2, and Server 3 only

Answer: B

NEW QUESTION # 265

Your network contains an Active Directory Domain Services (AD DS) domain. The domain contains the domain controllers shown in the following table.

Name	Description
DC1	Has the schema master, infrastructure master, and domain naming master roles
DC2	Has the PDC emulator and RID master roles and is a global catalog server
DC3	None

You need to configure DC3 to be the authoritative time server for the domain.

Which operations master role should you transfer to DC3, and which console should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Role:

- Domain naming master
- Infrastructure master
- PDC emulator**
- RID master
- Schema master

Console:

- Active Directory Admir
- Active Directory Doma
- Active Directory Sites and Services
- Active Directory Users and Computers**

Answer:

Explanation:

Answer Area  Microsoft

Role:

- Domain naming master
- Infrastructure master
- PDC emulator**
- RID master
- Schema master

Console:

- Active Directory Admin
- Active Directory Doma
- Active Directory Sites and Services
- Active Directory Users and Computers**

Explanation:

Answer Area  Microsoft

Role:
These are the selections for Role:

Console:

NEW QUESTION # 266

You have an on-premises server named Server1 that runs Windows Server and has internet connectivity.

You have an Azure subscription.

You need to monitor Server1 by using Azure Monitor.

Which resources should you create in the subscription, and what should you install on Server1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

In the subscription, create:

- An Azure Files storage account
- A Log Analytics workspace
- An Azure SQL database and a data collection rule
- An Azure Blob Storage account and a data collection rule

On Server1, install:

- The Azure Monitor agent
- The Analytics gateway
- The Device Health Attestation server role

Answer:

Explanation:

In the subscription, create:

- An Azure Files storage account
- A Log Analytics workspace
- An Azure SQL database and a data collection rule
- An Azure Blob Storage account and a data collection rule

On Server1, install:

- The Azure Monitor agent
- The Analytics gateway
- The Device Health Attestation server role
