## Dumps AZ-800 Download - Latest Microsoft AZ-800 New Braindumps Ebook: Administering Windows Server Hybrid Core Infrastructure

It is the best choice to accelerate your career by getting qualified by AZ-800 certification. Pass4cram provides the most updated and accurate AZ-800 study pdf for clearing your actual test. The quality of AZ-800 practice training torrent is checked by our professional experts. The high pass rate and high hit rate of Microsoft pdf vce can ensure you 100% pass in the first attempt. What's more, if you fail the AZ-800 test unfortunately, we will give you full refund without any hesitation.

## Microsoft Administering Windows Server Hybrid Core Infrastructure Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Your network contains three Active Directory Domain Services (AD DS) forest as shown in the following exhibit.

The network contains the users shown in the following table.

Name	Domain
User1	east.contoso.com
User2	fabrikam.com

The network contains the security groups shown in the following table.

Name	Type	Domain
Group1	Domain local	west.adatum.com
Group2	Universal	contoso.com
Group3	Universal	fabrikam.com

For each of the following statements, select Yes if the statement is true, Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

**Microsoft Statements**

You can add User1 to Group1.  Yes  No

You can add User2 to Group3.  Yes  No

You can grant Group2 permissions to the resources in the fabrikam.com domain.  Yes  No

**Answer:**

Explanation:

Answer Area

**Statements**

You can add User1 to Group1.  Yes  No

You can add User2 to Group3.  Yes  No

You can grant Group2 permissions to the resources in the fabrikam.com domain.  Yes  No

Explanation:

Answer Area

**Statements**

You can add User1 to Group1.  Yes  No

You can add User2 to Group3.  Yes  No

You can grant Group2 permissions to the resources in the fabrikam.com domain.  Yes  No

**NEW QUESTION # 42**

You have a server named Server1 that runs Windows Server and has the Hyper-V server role installed.

You need to limit which Hyper-V module cmdlets helpdesk users can use when administering Server 1 remotely.

You configure Just Enough Administration (JEA) and successfully build the role capabilities and session configuration files.

How should you complete the PowerShell command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Enter-PSSession  
New-PSSessionConfigurationFile  
Register-PSSessionConfiguration  
-Path .\HyperVJeaConfig  
-Name 'HyperVJeaHelpDesk' -Force  
.ps1  
.psm1  
.psrc  
.pssc

Answer:

Explanation:

Answer Area

Enter-PSSession  
New-PSSessionConfigurationFile  
Register-PSSessionConfiguration  
-Path .\HyperVJeaConfig  
-Name 'HyperVJeaHelpDesk' -Force  
.ps1  
.psm1  
.psrc  
.pssc

Explanation

Graphical user interface, text, application, email Description automatically generated

Enter-PSSession  
New-PSSessionConfigurationFile  
Register-PSSessionConfiguration

-Path .\HyperVJeaConfig

.ps1  
.psm1  
.psrc  
.pssc

-Name 'HyperVJeaHelpDesk' -Force

### NEW QUESTION # 43

Which two languages can you use for Task1? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Python
- B. Bicep
- C. PowerShell
- D. JavaScript
- E. Java

Answer: A,C

### NEW QUESTION # 44

Your network contains an Active Directory Domain Services (AD DS) domain named adatum.com

The domain contains a 'He server named Server1 and three users named User1, User2 and User3, Server1 contains a shared folder named Share1 that has the following configurations:

ShareState	: Online
AvailabilityType	: Full Share
FolderEnumerationMode	: AccessBased
CachingMode	: Manual
LeasingMode	: Full
SmbInstance	: Default
CompressData	: False
ContinuouslyAvailable	: False
EncryptData	: False
Name	: Share1
Path	: E:\Share1
ShadowCopy	: False

The share permissions for Share1 are configured as shown in the Share Permissions exhibit. (Click the Share Permissions tab.) Share1 contains a file named File1.txt. The advanced security settings for File1.txt are configured as shown in the File Permissions exhibit. (Click the File Permissions tab.) For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area
Microsoft

**Statements**

When User1 connects to \\Server1.adatum.com\Share1\, the user can take ownership of File1.txt.	<input type="radio"/> Yes	<input type="radio"/> No
When User2 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input type="radio"/> Yes	<input type="radio"/> No
When User3 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input type="radio"/> Yes	<input type="radio"/> No

**Answer:**

Explanation:

Answer Area
Microsoft

**Statements**

When User1 connects to \\Server1.adatum.com\Share1\, the user can take ownership of File1.txt.	<input type="radio"/> Yes	<input checked="" type="radio"/> No
When User2 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input checked="" type="radio"/> Yes	<input type="radio"/> No
When User3 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input type="radio"/> Yes	<input type="radio"/> No

Explanation:

Answer Area
Microsoft

**Statements**

When User1 connects to \\Server1.adatum.com\Share1\, the user can take ownership of File1.txt.	<input type="radio"/> Yes	<input checked="" type="radio"/> No
When User2 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input checked="" type="radio"/> Yes	<input type="radio"/> No
When User3 connects to \\Server1.adatum.com\Share1\, File1.txt is visible.	<input checked="" type="radio"/> Yes	<input type="radio"/> No

#### NEW QUESTION # 45

Your network contains a single domain Active Directory Domain Services (AD DS) forest named contoso.com. The forest contains a single Active Directory site.

You plan to deploy a read only domain controller (RODC) to a new datacenter on a server named Server1. A user named User1 is a member of the local Administrators group on Server1.

You need to recommend a deployment plan that meets the following requirements:

- \* Ensures that a user named User1 can perform the RODC installation on Server1
- \* Ensures that you can control the AD DS replication schedule to the Server1
- \* Ensures that Server1 is in a new site named RemoteSite1
- \* Uses the principle of least privilege

Which three actions should you recommend performing in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Instruct User1 to run the Active Directory Domain Services installation Wizard on Server1.

Create a site and a subnet.

Create a site link.

Pre-create an RODC account.

Add User1 to the Contoso\Administrators group.

**Answer Area**

**Answer:**

Explanation:

**Actions**

Instruct User1 to run the Active Directory Domain Services installation Wizard on Server1.

Create a site and a subnet.

Create a site link.

Pre-create an RODC account.

Add User1 to the Contoso\Administrators group.

**Answer Area**

Create a site and a subnet.

Pre-create an RODC account.

Instruct User1 to run the Active Directory Domain Services installation Wizard on Server1.

Explanation:

Create a site and a subnet.

Pre-create an RODC account.

Instruct User1 to run the Active Directory Domain Services installation Wizard on Server1.

Box 1.

We need to create a site and subnet for the remote site. The new site will be added to the Default IP Site Link so we don't need to create a new site link. You configure the replication schedule on the site link.

Box 2.

When we pre-create an RODC account, we can specify who is allowed to attach the server to the prestaged account. This means that the User1 does not need to be added to the Domain Admins group.

Box 3.

User1 can connect the RODC to the prestaged account by running the AD DS installation wizard.
