Reliable PEGACPSA24V1 Exam Cram | PEGACPSA24V1 Valid Exam Experience

PEGACPSA24V1 exam and they all got help from real and updated Pegasystems PEGACPSA24V1 exam questions. You can also be the next successful candidate for the PEGACPSA24V1 certification exam. No doubt the Pegasystems PEGACPSA24V1 Certification Exam is one of the most difficult Pegasystems certification exams in the modern Pegasystems world. This PEGACPSA24V1 exam always gives a tough time to their candidates.

Pegasystems Certified Pega System Architect 24 Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which Pega feature allows storing reference data that does not change frequently?

- A. Case Dependency
- **B. Data Table**
- C. Value Group
- D. Data Page

Answer: B

Explanation:

A Data Table is used to store reference data, such as country codes or product lists, that do not frequently change. This allows fast

lookups without requiring repeated queries to external systems. Data Tables improve application efficiency by reducing system calls. They support read-heavy workloads efficiently.

NEW QUESTION # 116

Which tool provides effort estimates for case types and integrations in a Pega project?

- A. Work Queue Analyzer
- B. Case Lifecycle Mapper
- C. Estimator Tool
- D. SLA Deadline Calculator

Answer: C

Explanation:

The Estimator Tool helps determine project effort and resource needs by evaluating case types and integrations. This ensures accurate project planning. Work queues, SLAs, and case mapping do not provide effort estimation.

NEW QUESTION # 117

Which two best practices should be followed when creating an Insight report? (Choose Two)

- A. Assign work queues to reports
- B. Define SLA deadlines for reports
- C. Use appropriate visualization types
- D. Keep filters relevant to business needs

Answer: C,D

Explanation:

Keeping filters relevant ensures that users extract meaningful data without unnecessary complexity.

Using the correct visualization type makes reports easier to interpret and more actionable. Work queues and SLA deadlines do not impact Insight creation or reporting best practices.

NEW QUESTION # 118

Which two approval mechanisms can be used for hierarchical approvals? (Choose Two)

- A. Authority Matrix
- B. Round-Robin Distribution
- C. Cascading Approvals
- D. SLA Timeouts

Answer: A,C

Explanation:

Cascading Approvals allow sequential approvals based on hierarchy, while Authority Matrix assigns tasks based on defined permissions. These methods ensure structured decision-making in corporate governance. SLA timeouts and round-robin do not manage approval hierarchy. Both methods prevent unauthorized approvals.

NEW QUESTION # 119

Which tool allows developers to export and import translation files in Pega?

- A. Localization Wizard
- B. Work Queue Analyzer
- C. Case Status Tracker
- D. SLA Adjustment Panel

Answer: A

Explanation:

The Localization Wizard helps developers export application text for translation and import translated content back into Pega. This ensures that multilingual support is easily managed. SLA adjustments and work queue analyzers do not handle localization tasks.

NEW QUESTION # 120

.....

Will you feel nervous for your exam? If you do, you can choose us, we will help you reduce your nerves as well as increase your confidence for the exam.
