NEW QUESTION # 140

A company maintains a REST service using Amazon API Gateway and the API Gateway native API key validation. The company recently launched a new registration page, which allows users to sign up for the service. The registration page creates a new API key using CreateApiKey and sends the new key to the user.

When the user attempts to call the API using this key, the user receives a 403 Forbidden error. Existing users are unaffected and can still call the API.

What code updates will grant these new users access to the API?

- A. The createUsagePlanKey method must be called to associate the newly created API key with the correct usage plan.
- B. The createDeployment method must be called so the API can be redeployed to include the newly created API key.
- C. The importApiKeys method must be called to import all newly created API keys into the current stage of the API.
- D. The updateAuthorizer method must be called to update the API's authorizer to include the newly created API key.

Answer: C

NEW QUESTION # 141

When you create a table with a hash-and-range key, you must define one or more secondary indexes on that table.

- A. False, it is optional
- B. False, hash-range key is another name for secondary index
- C. True

- D. False, when you have Hash-Range key you cannot define Secondary index

Answer: A

Explanation:

When you create a table with a hash-and-range key in DynamoDB, you can also define one or more secondary indexes on that table.

NEW QUESTION # 142

How long can you keep your Amazon SQS messages in Amazon SQS queues?

- A. From 10 secs up to 7 days
- **B. From 60 secs up to 2 weeks**
- C. From 120 secs up to 4 weeks
- D. From 30 secs up to 1 week

Answer: B

Explanation:

The SQS message retention period is configurable and can be set anywhere from 1 minute to 2 weeks. The default is 4 days and once the message retention limit is reached your messages will be automatically deleted. The option for longer message retention provides greater flexibility to allow for longer intervals between message production and consumption.
