

# CCSFP New Exam Braindumps - Latest CCSFP Exam Pass4sure

DOWNLOAD the newest DumpsTorrent CCSFP PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1pjtC-QwRxNWQyq\\_brPJvWgTVmCt0t1nJ](https://drive.google.com/open?id=1pjtC-QwRxNWQyq_brPJvWgTVmCt0t1nJ)

Our career is inextricably linked with your development at least in the CCSFP practice exam’s perspective. So we try to emulate with the best from the start until we are now. So as the most professional company of CCSFP study dumps in this area, we are dependable and reliable. We maintain the tenet of customer’s orientation. If you hold any questions about our CCSFP Exam Prep, our staff will solve them for you 24/7. It is our duty and honor to offer help.

## HITRUST CCSFP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Understanding assessor roles and responsibilities: This section of the exam measures skills of Information Security Managers and clarifies the responsibilities of assessors during the HITRUST certification process. It emphasizes the importance of independence, objectivity, and professional conduct when evaluating compliance.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Considerations for scoping an assessment: This section of the exam measures skills of Information Security Managers and explains how to properly define the scope of an assessment. Candidates learn how organizational size, systems, and regulatory requirements affect the scoping process, ensuring the assessment is accurate and relevant to business needs.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Applying the HITRUST scoring approach to assess framework compliance: This section of the exam measures skills of Compliance Analysts and focuses on applying the HITRUST scoring methodology. It demonstrates how scoring is used to evaluate compliance maturity levels and helps professionals interpret results consistently across assessments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Introduction to the HITRUST Framework (HITRUST CSF) and assessment types: This section of the exam measures skills of Compliance Analysts and covers the fundamentals of the HITRUST CSF, its role as a certifiable framework, and the different assessment types that organizations may use. It ensures that candidates understand how the framework standardizes compliance and risk management processes.</li> </ul>

## Highly Authoritative CCSFP Learning Question Will Help You Pass Your Exam - DumpsTorrent

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our CCSFP real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the CCSFP prep guide in 5-10 minutes, so you can get our CCSFP Exam Questions at first time. And then you can start your study after downloading the CCSFP exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our CCSFP real study dumps we guarantee that you won't be regret of your decision.

### HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q135-Q140):

#### NEW QUESTION # 135

How many domains are there in an assessment?

#### Answer:

Explanation:

19

Explanation:

The HITRUST CSF is structured into 19 domains that provide comprehensive coverage of information security and privacy practices. These domains represent major categories of controls such as Information Security Management, Endpoint Protection, Network Security, Access Control, Configuration Management, Incident Management, and Data Protection. Each domain contains multiple control references mapped to requirement statements, which are tailored to organizational and regulatory factors. This domain structure ensures that assessments address administrative, technical, and organizational safeguards consistently across industries. All assessment types—whether e1, i1, or r2—utilize these 19 domains, although the number of requirement statements varies depending on the scope. The domain-based structure also supports HITRUST's mapping to authoritative sources like NIST, HIPAA, and ISO, ensuring consistency across compliance obligations.

#### NEW QUESTION # 136

What type of scoping boundary includes the relevant IT platforms and supporting infrastructure used by one or more business units? [0155]

- A. Follow-the-data
- B. Enterprise
- C. Shared IT services
- D. Enclave-focused

#### Answer: C

Explanation:

HITRUST scoping boundaries help organizations define how their environments are assessed. The Shared IT services boundary is used when scoping common technology services and supporting infrastructure (e.g., hosting platforms, networks, identity services) that serve one or more business units. This contrasts with Follow-the-data (traces data flows across processes/units), Enclave-focused (a discrete segmented environment), and Enterprise (the entire organization).

"Shared IT services boundaries encompass the common IT platforms and supporting infrastructure leveraged by one or more business units." [CCSFP Study Guide - Scoping Boundaries, 0155]

#### NEW QUESTION # 137

An i1 Control Reference that scores a 37 would yield what result?

- A. No Gap
- B. HITRUST Certification
- C. Required CAP

- D. Risk Acceptance
- E. Function Gap

**Answer: C**

Explanation:

In anil assessment, scoring below threshold levels (generally 83 for certification-critical controls) results in a required Corrective Action Plan (CAP). A score of 37 falls into the "Somewhat Compliant" category and indicates major deficiencies. Because il assessments emphasize cybersecurity hygiene, HITRUST does not allow "risk acceptance" at such low scores. Instead, CAPs are required to ensure remediation is planned and tracked. This approach guarantees that organizations address weaknesses that could leave them vulnerable to common threats. Unlike r2 assessments, where some flexibility exists based on risk tailoring, il is structured to enforce mandatory remediation for below-threshold results. Therefore, a Control Reference score of 37 in il unequivocally requires a CAP.

### NEW QUESTION # 138

Gaps with required CAPs must be remediated within six months.

- A. True
- B. False

**Answer: B**

Explanation:

HITRUST does not mandate that all required CAPs be remediated within a strict six-month deadline. Instead, CAPs must include a realistic remediation plan with target dates, owners, and milestones. Some CAPs may be resolved quickly, while others (such as large-scale encryption rollouts) may take longer. HITRUST requires that CAPs are tracked and updated until completion, and progress is reviewed at interim assessments. While assessors may encourage timely remediation (often aiming for six months where feasible), HITRUST does not impose a universal time limit. What matters is that CAPs are properly documented, tracked, and eventually closed. Therefore, the statement that all required CAPs must be remediated within six months is False.

### NEW QUESTION # 139

During HITRUST's QA phase of a Validated Assessment, HITRUST picks a sample of Control Objectives to review the assessor's validation and testing procedures.

- A. True
- B. False

**Answer: A**

Explanation:

HITRUST conducts a QA review of every validated assessment to confirm that assessors followed the methodology and applied consistent testing. QA does not re-test every control; instead, HITRUST selects a sample of Control Objectives across the assessment. For each sample, HITRUST reviews assessor notes, evidence, and testing procedures to ensure accuracy and completeness. This sampling approach balances efficiency with assurance, allowing HITRUST to evaluate the assessor's work without duplicating the entire validation process. If issues are found, QA may expand its review or return the assessment for clarification.

This process ensures that validated assessments meet HITRUST's quality standards before reports or certifications are issued.
