

Dynatrace-Associate 최신 업데이트 인증 시험자료, Dynatrace-Associate 최신 버전 인기 시험자료

최근 Dynatrace인증 Dynatrace-Associate시험이 IT업계에서 제일 높은 인지도를 가지고 있습니다.바라만 보지 마시고 Dynatrace인증 Dynatrace-Associate시험에 도전해보세요. ITDumpsKR 의 Dynatrace인증 Dynatrace-Associate덤프로 시험 준비공부를 하시면 한방에 시험패스 가능합니다. Dynatrace인증 Dynatrace-Associate덤프로 자격증취득에 가까워지고 나아가서는 IT업계에서 인정을 받는 열쇠를 소유한것과 같다고 할수 있습니다.

Dynatrace Dynatrace-Associate 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.
주제 2	<ul style="list-style-type: none"> Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
주제 3	<ul style="list-style-type: none"> Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.
주제 4	<ul style="list-style-type: none"> Reporting and Analysis: Covers tools and methods for analyzing observability data and generating insights to support performance and operational decisions.

주제 5	<ul style="list-style-type: none"> • User Experience Monitoring: Covers real user monitoring (RUM) to track and analyze how end users interact with and experience web and mobile applications.
주제 6	<ul style="list-style-type: none"> • Security: Covers vulnerability detection, security alerting, and how Dynatrace identifies and prioritizes security risks across the environment.
주제 7	<ul style="list-style-type: none"> • Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.
주제 8	<ul style="list-style-type: none"> • Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.
주제 9	<ul style="list-style-type: none"> • Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.

Dynatrace-Associate 최신 버전 인기 시험자료, Dynatrace-Associate 시험패스 인증덤프문제

IT인증자격증은 국제적으로 승인받는 자격증이기에 많이 취득해두시면 취업이나 승진이나 이직이나 모두 편해집니다. 다른 사람이 없는 자격증을 내가 가지고 있다는 것은 실력을 증명해주는 수단입니다. Dynatrace인증 Dynatrace-Associate 시험은 널리 승인받는 자격증의 시험과목입니다. Dynatrace인증 Dynatrace-Associate덤프로Dynatrace인증 Dynatrace-Associate 시험공부를 하시면 시험패스 난이도가 낮아지고 자격증 취득율이 높아 올라갑니다. 자격증을 많이 취득하여 취업이나 승진의 문을 두드려 보시면 빈틈없이 닫힌 문도 활짝 열릴것입니다.

최신 Dynatrace Associate Certification Dynatrace-Associate 무료 샘플문제 (Q50-Q55):

질문 # 50

I want to use Dynatrace's global network of Synthetic Monitoring locations to monitor my application, which capability provides this?

- A. Public Synthetics
- B. Dynatrace Apps
- C. Private Synthetics
- D. Synthetic On-demand execution

정답: A

설명:

Public Synthetics use Dynatrace's global network of locations to test applications from various geographic regions.

* Ideal for global availability testing

* No infrastructure setup required

Private Synthetics are for internal environments.

Reference: Based on official Dynatrace University training materials on Synthetic Monitoring.

질문 # 51

Which Dashboard Tiles visualize the status of your entities using Red and Green Hexagons?

- A. Web applications
- B. Application health
- C. Service health
- D. Synthetic monitor health
- E. Problems

정답: B,C

설명:

Dynatrace uses hexagon-style health tiles with green and red indicators to visualize the health status of monitored entities. These are specifically used in:

- * Service health tiles - showing health of services
- * Application health tiles - showing overall application health

These tiles provide a quick visual overview of system health using color-coded hexagons.

Other options:

- * Synthetic monitor health uses different visualization styles
- * Web applications is not a tile type
- * Problems shows problem cards, not hexagon visualization

Reference: Based on official Dynatrace University training materials covering dashboards and visualization types.

질문 # 52

At which environment levels can log ingestion rules be configured?

- A. ActiveGate
- B. Host Group
- **C. Environment**
- D. Host
- E. Process Group

정답: C

설명:

Log ingestion rules in Dynatrace are configured at the environment level .

This ensures:

- * Centralized control of log ingestion
- * Consistent processing and filtering across all monitored entities
- * Unified configuration for all logs entering the platform

Other options are not valid configuration levels:

- * ActiveGate handles routing, not rule configuration
 - * Host, Process Group, and Host Group are entity levels, not ingestion rule scopes
- Reference: Based on official Dynatrace University training materials on log monitoring and ingestion configuration.

질문 # 53

Which capability provides a single view of multiple hyperscalers' resources?

- A. Kubernetes App
- B. Dynatrace Extensions v2
- C. Dynatrace RUM
- **D. Clouds App**

정답: D

설명:

The Clouds App in Dynatrace provides a unified, single-pane view across multiple cloud providers (hyperscalers), such as AWS, Azure, and Google Cloud. It aggregates cloud services, resources, and their relationships into one centralized interface.

This capability allows users to:

- * Monitor multi-cloud environments in one place
- * Analyze dependencies across different cloud providers
- * Gain visibility into cloud services, costs, and performance

Other options do not serve this purpose:

- * Extensions v2 extend monitoring capabilities
- * RUM focuses on end-user experience
- * Kubernetes App focuses specifically on Kubernetes environments

Reference: Based on official Dynatrace University training materials covering cloud platform monitoring and multi-cloud visibility.
