Also included in the file are some learning tools and options to make the process smoother and effective.

## APICS Certified Supply Chain Professional Sample Questions (Q122-Q127):

### NEW QUESTION # 122

Which of the following formulas calculates "Perfect Order Fulfillment"?

- A. total perfect orders divided by total number of orders
- B. order fulfillment process time divided by order fulfillment dwell time
- C. total number of orders divided by total perfect orders
- D. order fulfillment dwell time divided by order fulfillment process time
- E. total perfect orders divided by order fulfillment process time

Answer: A

### NEW QUESTION # 123

To handle a dispute over damage to goods shipped between two countries, which international standard should be applied?

- A. United Nations (UN) Global Compact
- B. Omnibus Foreign Trade and Competitiveness Act
- C. Export Trading Company (ETC) Act
- D. Incoterms

Answer: D

Explanation:

To handle disputes over damage to goods shipped between two countries, Incoterms (International Commercial Terms) should be applied:

- \* Standardized Terms: Incoterms provide internationally recognized standard terms that define the responsibilities of buyers and sellers in international transactions.
- \* Risk Management: They clarify at which point the risk and responsibility for the goods transfer from the seller to the buyer, helping to resolve disputes regarding damage during transit.
- \* Legal Clarity: Using Incoterms ensures that both parties have a clear understanding of their obligations, reducing the potential for conflicts.
- \* Global Acceptance: Incoterms are widely used and accepted across different countries and legal systems, making them a reliable reference in international trade disputes.

:

International Chamber of Commerce (2020). Incoterms 2020: ICC rules for the use of domestic and international trade terms. ICC Publication.

Schmitthoff, C. M., & Goode, R. (2007). Schmitthoff's Export Trade: The Law and Practice of International Trade. Sweet & Maxwell.

#### NEW QUESTION # 124

Which of the following outcomes occurs when direct shipping is used instead of a distribution network?

- A. Inventory obsolescence is reduced.
- B. Outbound transportation cost is reduced.
- C. Order-fill rates are reduced.
- D. Inventory velocity is reduced.

**Answer: A**

Explanation:

Direct shipping from the manufacturer to the customer, bypassing distribution centers or warehouses, reduces inventory obsolescence. This is because products spend less time in storage and are delivered more quickly to customers, minimizing the risk of inventory becoming outdated or unsellable. Direct shipping can also improve inventory velocity, as products are moved directly to their end destination without intermediate storage, thus reducing the time they spend in the supply chain.
