

# Pass Guaranteed Quiz 2026 High Hit-Rate Fortinet FCSS\_LED\_AR-7.6: Test FCSS - LAN Edge 7.6 Architect Topics Pdf

BONUS!!! Download part of PracticeVCE FCSS\_LED\_AR-7.6 dumps for free: <https://drive.google.com/open?id=1uCaQyyETaicZccxmNfa8PKaJ7Ms-Pvod>

The Fortinet FCSS\_LED\_AR-7.6 certification exam is without a doubt a terrific and quick way to develop your profession in your field. These advantages include the opportunity to develop new, in-demand skills, advantages in the marketplace, professional credibility, and the opening up of new job opportunities. FCSS - LAN Edge 7.6 Architect FCSS\_LED\_AR-7.6 real reliable test cram and test book help you pass the FCSS - LAN Edge 7.6 Architect exam successfully.

## Fortinet FCSS\_LED\_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Central Management:</b> This section addresses managing FortiSwitch via FortiManager over FortiLink, implementing zero-touch provisioning, configuring VLANs, ports, and trunks, and setting up FortiExtender and FortiAP devices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Zero-Trust LAN Access:</b> This domain covers machine authentication, MAC Authentication Bypass, NAC policies for wireless security, guest portal deployment, and advanced solutions like FortiLink NAC, dynamic VLAN, and VLAN pooling.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>Monitoring and Troubleshooting: This section covers configuring quarantine mechanisms, managing FortiAIOPS, troubleshooting FortiGate communication with FortiSwitch and FortiAP, and using monitoring tools for wireless connectivity.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Authentication: This domain covers advanced user authentication using RADIUS and LDAP, two-factor authentication with digital certificates, and configuring syslog and RADIUS single sign-on on FortiAuthenticator.</li> </ul>

## Regualer FCSS\_LED\_AR-7.6 Update | FCSS\_LED\_AR-7.6 Practice Exam Online

Actually we eliminate the barriers blocking you from our FCSS\_LED\_AR-7.6 practice materials. All types of our FCSS\_LED\_AR-7.6 exam questions are priced favorably on your wishes. Obtaining our FCSS\_LED\_AR-7.6 study guide in the palm of your hand, you can achieve a higher rate of success. Besides, there are free demos for your careful consideration to satisfy individual needs on our FCSS\_LED\_AR-7.6 learning prep. You can free download them to check if it is the exact one that you want.

### Fortinet FCSS - LAN Edge 7.6 Architect Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

APs have been manually configured to connect to FortiGate over an IPsec network, and FortiGate successfully detects and authorizes them. However, the APs remain unmanaged because FortiGate is unable to establish a CAPWAP tunnel with them. What configuration change can resolve this issue and enable FortiGate to establish the CAPWAP tunnel over the IPsec connection?

- A. Decrease the CAPWAP tunnel MTU size for APs to prevent fragmentation.
- B. Assign a custom AP profile for the remote APs with the set mpls-connection option enabled.
- C. Upgrade the FortiAP firmware image to ensure compatibility with the FortiOS version.
- D. Configure a static route on FortiGate to reach the APs over the IPsec tunnel.

**Answer: B**

Explanation:

When FortiAPs connect to FortiGate over IPsec tunnels, this is treated similarly to WAN/MPLS deployments.

In these scenarios, FortiGate must know that CAPWAP must traverse anon-L2 transport.

FortiAP profiles include:

set mpls-connection enable

This setting is required so that:

\* FortiGate can encapsulate CAPWAP inside the transport tunnel

\* Remote FortiAPs can establish CAPWAP even when behind routed/IPsec networks Without this option, the FortiGate detects the AP but cannot bring CAPWAP UP, leaving the AP in "discovered/unauthorized" or "offline" state.

Why others are wrong

\* A. Static route# Discovery already succeeds, so routing is not the issue.

\* C. Reduce MTU# Sometimes useful for IPsec, but not required for CAPWAP establishment.

\* D. Firmware upgrade# Firmware mismatch would show "Managed (upgrade required)," not CAPWAP tunnel failure.

Therefore, set mpls-connection enable is the required fix.

#### NEW QUESTION # 17

Your office wants to set up a Wi-Fi network for visitors. Your company would like to require them to log in for tracking purposes. Which two types of captive portals could be enabled on an interface? (Choose two.)

- A. Email Notification Only
- B. Terms Acknowledgment Without Authentication
- C. Authentication
- D. Guest Pass Access

- E. Disclaimer + Authentication

Answer: C,E

#### NEW QUESTION # 18

What is the primary function of a captive portal in guest Wi-Fi onboarding?

Response:

- A. Allow access only after user authentication or acceptance
- B. Encrypt all packets using SSL
- C. Automatically redirect traffic to DNS
- D. Force client to use VPN

Answer: A

#### NEW QUESTION # 19

What is the primary outcome when a device is quarantined on a FortiGate-managed network?

Response:

- A. The device is forced to reauthenticate using 802.1X
- B. The device is redirected to a captive portal for login
- C. The device's MAC address is blocked by DNS filter
- D. The device is denied access to the network through policy enforcement

Answer: D

#### NEW QUESTION # 20

Refer to the exhibits.

☐

Which include debug output and SSL VPN configuration details.

An SSL VPN has been configured on FortiGate. To enhance security, the administrator enabled Required Client Certificate in the SSL VPN settings. However, when a user attempts to connect, authentication fails.

Which configuration change is needed to fix the issue and allow the user to connect?

- A. Import the CA that signed the user certificate to FortiGate.
- B. Set the user certificate as the Server Certificate on the SSL VPN configuration page.
- C. Enable Redirect HTTP to SSL-VPN on the SSL VPN configuration page.
- D. Import the CA that signed the SSL VPN Server Certificate to FortiGate.

Answer: A

Explanation:

The SSL-VPN configuration has Require Client Certificate enabled. When this is enabled, FortiOS performs two checks:

Normal user authentication (username/password or PKI user)

Additional client certificate check- the client certificate must be signed by a CA that FortiGate trusts FortiOS documentation for "SSL VPN with certificate authentication" states:

"The client certificate only needs to be signed by a known CA in order to pass authentication."

"The CA certificate is the certificate that signed both the server certificate and the user certificate... The CA certificate is available to be imported on the FortiGate." The debug output shows key lines:

\_\_quick\_check\_peer-CA does not match.

Issuer of cert depth 0 is not detected in CMDB.

This tells us:

FortiGate does see the user's certificate,

But cannot find the issuing CA in its local CA certificate store ("CMDB" = configuration database).

This means the CA that signed the user certificate has not been imported into FortiGate.

Now evaluate the options:

A). Enable Redirect HTTP to SSL-VPN- affects only redirection from HTTP to HTTPS; it has nothing to do with certificate validation.

- B). Import the CA that signed the SSL VPN Server Certificate- the server certificate is already working (the portal comes up) and its CA is not what the debug complains about; the error is about the peer (user) certificate. Often the same CA signs both, but the failing check specifically says the issuer of the client cert is not in CMDB.
- C). Set the user certificate as the Server Certificate- incorrect; server and client certificates serve different roles.
- D). Import the CA that signed the user certificate to FortiGate- this directly addresses the debug error and aligns with the documented requirement that the CA which issued the user certificate must be known to FortiGate.

## NEW QUESTION # 21

.....

In the era of informational globalization, the world has witnessed climax of science and technology development, and has enjoyed the prosperity of various scientific blooms. In 21st century, every country had entered the period of talent competition, therefore, we must begin to extend our FCSS\_LED\_AR-7.6 personal skills, only by this can we become the pioneer among our competitors. We here tell you that there is no need to worry about. Our FCSS\_LED\_AR-7.6 Actual Questions are updated in a high speed. Since the date you pay successfully, you will enjoy the FCSS\_LED\_AR-7.6 test guide freely for one year, which can save your time and money. We will send you the latest FCSS\_LED\_AR-7.6 study dumps through your email, so please check your email then.
