

Quiz VMware - Newest Valid 2V0-13.25 Study Materials

What's more, part of that PassTestking 2V0-13.25 dumps now are free: https://drive.google.com/open?id=1pq-IPV7J3nhD-PklyBh27dG8-TCHi_SW

If you think you can face unique challenges in your career, you should pass the VMware 2V0-13.25 exam. PassTestking is a site that comprehensively understand the VMware 2V0-13.25 exam. Using our exclusive online VMware 2V0-13.25 exam questions and answers, will become very easy to pass the exam. PassTestking guarantee 100% success. PassTestking is recognized as the leader of a professional certification exam, it provides the most comprehensive certification standard industry training methods. You will find that PassTestking VMware 2V0-13.25 Exam Questions And Answers are most thorough and the most accurate questions on the market and up-to-date practice test. When you have PassTestking VMware 2V0-13.25 questions and answers, it will allow you to have confidence in passing the exam the first time.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.
Topic 2	<ul style="list-style-type: none">Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.

Topic 3	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 4	<ul style="list-style-type: none"> Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 5	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.

100% Pass Quiz 2026 VMware High Pass-Rate Valid 2V0-13.25 Study Materials

The PassTestking 2V0-13.25 exam questions are checked and verified by experienced and qualified VMware Cloud Foundation 9.0 Architect exam trainers. So you can trust on the validity and top standard of PassTestking 2V0-13.25 exam practice test questions. With the PassTestking 2V0-13.25 exam questions you will get everything that you need to prepare and pass the challenging VMware 2V0-13.25 Exam with good scores. The PassTestking 2V0-13.25 exam questions will give you an idea about the final 2V0-13.25 exam format and you will get experience about 2V0-13.25 exam format before the final exam.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which Broadcom solutions are critical for improving VMware storage performance?

- A. Broadcom NVMe SSD
- B. Broadcom RAID Controller
- C. Fibre Channel HBA
- D. vSAN

Answer: A,B,D

Explanation:

Broadcom NVMe SSDs, RAID controllers, and vSAN are crucial for improving storage performance in VMware environments.

NEW QUESTION # 38

Which Broadcom hardware solutions can optimize VMware Cloud Foundation for better performance?

- A. Broadcom RAID storage controllers
- B. Broadcom Ethernet network adapters
- C. Broadcom NVMe storage solutions
- D. Broadcom GPUs

Answer: A,B,C

Explanation:

Broadcom's hardware solutions like Ethernet adapters, NVMe storage, and RAID controllers are integral to optimizing performance in VMware Cloud Foundation.

NEW QUESTION # 39

Which type of storage is used by VKS pods to store non-persistent data?

- A. vSphere local storage
- B. Object storage
- C. Container image storage
- **D. Ephemeral storage**

Answer: D

Explanation:

According to the VMware Cloud Foundation 9.0.4 Architecture and Design Guide, vSphere Pods (which support VMware Kubernetes Service or VKS clusters) use three types of storage: ephemeral VMDKs, persistent volume VMDKs, and container image VMDKs.

The document explicitly states:

> "A vSphere Pod requires ephemeral storage to store such Kubernetes objects as logs, emptyDir volumes, and ConfigMaps during its operations. This ephemeral, or transient, storage lasts as long as the pod continues to exist." Ephemeral storage is non-persistent by design and is deleted once the pod lifecycle ends. It provides temporary space for data that doesn't need to persist beyond the pod's lifespan, such as application logs, temporary caches, or transient compute data. This aligns with Kubernetes' ephemeral storage model integrated into vSphere infrastructure.

Persistent workloads, by contrast, utilize storage policies and vSphere CNS-backed persistent volumes.

Therefore, ephemeral storage is the correct type for non-persistent pod data.

References (VMware Cloud Foundation documents):

VMware Cloud Foundation 9.0.4 - "Storage Policies for a Supervisor" (p. 5632-5633) VMware Cloud Foundation 9.0.4 - "vSphere Pod Storage Types: Ephemeral, Persistent, and Container Image VMDKs."

NEW QUESTION # 40

When troubleshooting slow network performance with Broadcom 25GbE Ethernet adapters in VMware, what should be checked first?

- **A. Network speed settings**
- B. Network cable type
- **C. Adapter firmware and driver versions**
- **D. Jumbo frame configuration**

Answer: A,C,D

Explanation:

Checking speed settings, firmware, and Jumbo Frame configuration can resolve network performance problems.

NEW QUESTION # 41

A design requirement has been specified for a new VMware Cloud Foundation (VCF) instance.

All managed workload resources must be lifecycle managed with the following criteria:

* Development resources must be automatically reclaimed after two weeks

* Production resources will be reviewed yearly for reclamation

* Resources identified for reclamation must allow time for review and possible extension What capability will satisfy the requirements?

- A. Aria Operations Rightsizing Recommendations
- B. Aria Suite Lifecycle Content Management
- C. Aria Automation Project Membership

- **D. Aria Automation Lease Policy**

Answer: D

Explanation:

Lifecycle management of resources in VCF 5.2 involves automation tools like Aria Automation.

Option C, "Aria Automation Lease Policy," allows setting expiration dates for resources (e.g., 2 weeks for dev, 1 year for prod), automatically reclaiming them unless extended during a review period, directly meeting all criteria.

Option A (Aria Suite Lifecycle) manages software deployment, not resource lifecycles.

Option B (Aria Operations Rightsizing) provides sizing insights, not reclamation automation.

Option D (Project Membership) controls access, not lifecycles. Aria Automation's lease policies are designed for this exact purpose in VCF, integrating with cloud zones and projects.

Reference: VMware Aria Automation 8.10 Administration Guide, Section on Lease Policies; VMware Cloud Foundation 5.2 Architect Study Guide, Automation Features.

NEW QUESTION # 42

.....

Our 2V0-13.25 study materials are very popular in the international market and enjoy wide praise by the people in and outside the circle. We have shaped our 2V0-13.25 exam questions into a famous and top-ranking brand and we enjoy well-deserved reputation among the clients. Our 2V0-13.25 learning guide boasts many outstanding and superior advantages which other same kinds of exam materials don't have. And we are very reliable in every aspect no matter on the quality or the according service.
