The TestPassKing is a leading platform that has been offering top-rated and real Google Cloud Certified - Professional Cloud Database Engineer (Professional-Cloud-Database-Engineer) exam questions for quick Google Cloud Certified - Professional Cloud Database Engineer Certification Exam. The Professional-Cloud-Database-Engineer exam questions are designed and verified by experienced and certified Professional-Cloud-Database-Engineer Exam trainers. They work collectively and put all their efforts, experience, and knowledge and ensure the top standard of Professional-Cloud-Database-Engineer exam questions all the time.

To pass the certification exam, candidates must demonstrate their ability to design, implement, and manage databases on the Google Cloud Platform. They must also show proficiency in monitoring, troubleshooting, and optimizing database performance. Professional-Cloud-Database-Engineer exam covers a range of topics, including database migration, data modeling, backup and recovery, and security. Google Cloud Certified - Professional Cloud Database Engineer certification exam is designed to help employers identify qualified professionals who have the expertise needed to develop and maintain efficient, scalable, and secure databases on the Google Cloud Platform.

Google Professional-Cloud-Database-Engineer Certification Exam consists of multiple choice and scenario-based questions, and you will have two hours to complete the exam. Professional-Cloud-Database-Engineer exam covers a wide range of topics, including designing and implementing databases, managing database operations and maintenance, optimizing database performance, and ensuring data security and compliance. Professional-Cloud-Database-Engineer exam is designed to test your practical skills and knowledge in handling real-world scenarios related to database management on Google Cloud.

## Free Professional-Cloud-Database-Engineer Braindumps - Test Professional-Cloud-Database-Engineer Answers

The pressure is not terrible, and what is terrible is that you choose to evade it. You clearly have seen your own shortcomings, and you know that you really should change. Then, be determined to act! Buying our Professional-Cloud-Database-Engineer exam questions is the first step you need to take. And as long as you study with our Professional-Cloud-Database-Engineer Practice Guide, you will find that the exam is just a piece of cake and the certification is easy to get. With the certification, you will find your future is much brighter.

## Google Cloud Certified - Professional Cloud Database Engineer Sample

## Questions (Q53-Q58):

### NEW QUESTION # 53

You are running a large, highly transactional application on Oracle Real Application Cluster (RAC) that is multi-tenant and uses shared storage. You need a solution that ensures high-performance throughput and a low-latency connection between applications and databases. The solution must also support existing Oracle features and provide ease of migration to Google Cloud. What should you do?

- A. Migrate to Bare Metal Solution for Oracle.
- B. Migrate to Google Kubernetes Engine (GKE)
- **C. Migrate to Compute Engine.**
- D. Migrate to Google Cloud VMware Engine

**Answer: C**

### NEW QUESTION # 54

You are the database administrator of a Cloud SQL for PostgreSQL instance that has pgaudit disabled. Users are complaining that their queries are taking longer to execute and performance has degraded over the past few months. You need to collect and analyze query performance data to help identify slow-running queries. What should you do?

- A. Review application logs to identify database calls.
- B. Write a Logs Explorer query to identify database queries with high execution times.
- C. View Cloud SQL operations to view historical query information.
- **D. Use the Query Insights dashboard to identify high execution times.**

**Answer: D**

### NEW QUESTION # 55

You are configuring a brand new Cloud SQL for PostgreSQL database instance in Google Cloud. Your application team wants you to deploy one primary instance, one standby instance, and one read replica instance. You need to ensure that you are following Google-recommended practices for high availability. What should you do?

- A. Configure the primary instance in one region, the standby instance in a second region, and the read replica in a third region.
- **B. Configure the primary instance in zone A, the standby instance in zone C, and the read replica in zone B, all in the same region.**
- C. Configure the primary and standby instances in zone A and the read replica in zone B, all in the same region.
- D. Configure the primary, standby, and read replica instances in zone A, all in the same region.

**Answer: B**

Explanation:

<https://cloud.google.com/sql/docs/postgres/high-availability#failover-overview>

### NEW QUESTION # 56

You are migrating an on-premises application to Compute Engine and Cloud SQL. The application VMs will live in their own project, separate from the Cloud SQL instances which have their own project. What should you do to configure the networks?

- A. Use the default networks, and leverage Cloud VPN to connect the two together.
- B. Create a new VPC network in each project, and use VPC Network Peering to connect the two together.
- **C. Create a Shared VPC that both the application VMs and Cloud SQL instances will use.**
- D. Place both the application VMs and the Cloud SQL instances in the default network of each project.

**Answer: C**

Explanation:

### NEW QUESTION # 57

Your company wants to move to Google Cloud. Your current data center is closing in six months. You are running a large, highly transactional Oracle application footprint on VMWare. You need to design a solution with minimal disruption to the current architecture and provide ease of migration to Google Cloud. What should you do?

- A. Migrate applications and Oracle databases to Google Kubernetes Engine (GKE).
- **B. Migrate applications and Oracle databases to Google Cloud VMware Engine (VMware Engine).**
- C. Migrate applications to Cloud SQL.
- D. Migrate applications and Oracle databases to Compute Engine.

**Answer: B**

### NEW QUESTION # 58
