Test Amazon AWS-Advanced-Networking-Specialty Testking, Latest AWS-Advanced-Networking-Specialty Test Cost

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test AWS-Advanced-Networking-Specialty exam can make you achieve those goals and prove that you are competent. Buying our AWS-Advanced-Networking-Specialty practice test can help you pass the exam fluently and the learning costs you little time and energy. The questions and answers of our AWS-Advanced-Networking-Specialty Test Question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

The Amazon AWS-Advanced-Networking-Specialty exam is suitable for professionals who work with various AWS networking services such as Amazon VPC, Amazon Route53, Amazon Direct Connect, and AWS Global Accelerator, among others. Candidates are expected to have a deep knowledge of network architectures for different application use cases, migration strategies, and security best practices in cloud infrastructure environments. AWS Certified Advanced Networking Specialty (ANS-C00) Exam certification exam is a comprehensive test of AWS networking concepts and practices, and passing it can be a significant boost to one's career opportunities in the cloud computing industry.

Amazon AWS-Advanced-Networking-Specialty (ANS-C00) exam is designed to validate the skills and knowledge of professionals who work in advanced networking roles. AWS Certified Advanced Networking Specialty (ANS-C00) Exam certification is ideal for network engineers, solutions architects, and other IT professionals who are responsible for designing, deploying, and managing complex networking architectures in the AWS cloud.

Amazon AWS Certified Advanced Networking Specialty (ANS-C00) Exam Sample Questions (Q80-Q85):

NEW QUESTION # 80
A company has an application running on Amazon EC2 instances in a private subnet that connects to a third-party service provider's public HTTP endpoint through a NAT gateway. As request rates increase, new connections are starting to fail. At the same time, the ErrorPortAllocation Amazon CloudWatch metric count for the NAT gateway is increasing.
Which of the following actions should improve the connectivity issues? (Choose two.)

- A. Allocate additional elastic IP addresses to the NAT gateway.
- B. Create additional NAT gateways and update the private subnet route table to introduce the new NAT gateways.
- C. Request that the third-party service provider implement HTTP keepalive.
- D. Create additional NAT gateways in the public subnet and split client instances into multiple private subnets, each with a route to a different NAT gateway.
- E. Implement TCP keepalive on the client instances.

Answer: D,E

NEW QUESTION # 81
A company has established an AWS Direct Connect connection between its customer gateway at its on-premises data center and a virtual private gateway m the AWS Cloud The BGP routing protocol configuration includes the Autonomous System Number {ASN) of 7224 on the AWS end of the connection and the BGP ASN of 65004 on the company end of the connection The company's IT administrators report that servers that run at the on-premises data center are not able to communicate with the company's web application that runs on a fleet of Amazon EC2 Instances A network engineer performs initial troubleshooting The network engineer finds that the private VIF is operational and that there is a fully established BGP peering session However, the company still cannot route traffic over the private VIF Which of the following is a possible cause of this connectivity issue?

- A. The provider is advertising 50 prefixes for private VIFs
- B. Peer IP addresses for both sides of the BGP peering session are not configured correctly.
- C. VPC route tables am lacking prefixes that point to the virtual private gateway to which the private VIF is connected
- D. Firewall or ACL rules are blocking TCP pod 179 or are blocking high-numbered ephemeral TCP pons

Answer: D

NEW QUESTION # 82
Your company has signed up to trial AWS WorkSpaces. You aren't sure you're going to keep it, but you want to try it out to see if it works for your organization of 112 users. You need to deploy it with as little work and up-front expense as possible while still allowing access to your Active Directory for authentication. What two things should you do? Choose the 2 correct answers:

- A. Create a VPN connection.
- B. Setup AWS hosted Microsoft AD
- C. Create a Direct Connect connection to AWS.
- D. Create an AD connector

Answer: A,D

Explanation:
A VPN connection and an AD connector will allow you to get up and running without having to migrate users, setup expensive equipment or pay for another directory service.

NEW QUESTION # 83
You are preparing to launch Amazon WorkSpaces and need to configure the appropriate networking resources. What must be configured to meet this requirement?

- A. A dedicated VPC with Active Directory Services.
- B. Network address translation for outbound traffic.
- C. An IPsec VPN to on-premises Active Directory

- **D. At least two subnets in different Availability Zones.**

Answer: B,D

Explanation:
Explanation/Reference:
