NEW QUESTION # 78

Where, in a protocol analyzer, would you find an indication that a frame was transmitted as part of an A-MPDU?

- A. A-MPDU flag in the Frame Control Field

- B. The HT Operation Element
- **C. The Aggregation flag in the Radio Tap Header**
- D. A-MPDU flag in the QoS Control Field

Answer: C

Explanation:

In a protocol analyzer, you would find an indication that a frame was transmitted as part of an A-MPDU by looking at the Aggregation flag in the Radio Tap Header. The Radio Tap Header is a pseudo-header that is added by some wireless capture devices to provide additional information about the physical layer characteristics of a frame. The Aggregation flag is one of the fields in this header, and it indicates whether the frame belongs to an A-MPDU or not. If the flag is set to 1, it means that the frame is part of an A-MPDU; if it is set to 0, it means that the frame is not part of an A-MPDU.
