

100% Pass 2026 The Best HP HPE7-A08: Valid HPE Aruba Networking Switching Professional Exam Exam Labs

What's more, part of that FreePdfDump HPE7-A08 dumps now are free: <https://drive.google.com/open?id=1RZsPCAd3kJzvCTSQRxw4QT0042fZRtWtE>

As old saying goes, no pains, no gains. You must depend on yourself to acquire what you want. No one can substitute you with the process. Of course, life has shortcut, which can ensure you have a bright future. Our HPE7-A08 training quiz will become your new hope. As the most popular exam provider in the market, we are warmly praised and we can receive thousands of the grateful feedbacks from our worthy customers on HPE7-A08 Exam Questions. please trust and buy our HPE7-A08 study materials!

The privacy protection of users is an eternal issue in the internet age. Many illegal websites will sell users' privacy to third parties, resulting in many buyers are reluctant to believe strange websites. But you don't need to worry about it at all when buying our HPE7-A08 Learning Engine. We assure you that we will never sell users' information on the HPE7-A08 exam questions because it is damaging our own reputation. And we will help you on the HPE7-A08 study materials if you have any question.

HPE7-A08 Study Group - New HPE7-A08 Test Answers

You can choose the most suitable and convenient one for you. The web-based HPE7-A08 practice exam is compatible with all operating systems. It is a browser-based HP HPE7-A08 Practice Exam that works on all major browsers. This means that you won't have to worry about installing any complicated software or plug-ins.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

You have applied the following OSPF configuration but are seeing the output from the command below. What is the reason for this?

```

Agg-1 Config
vrf orange
router ospf 1 vrf orange
area 0
interface loopback 10
vrf attach orange
ip address 10.3.10.2/32
ip ospf 1 area 0
interface vlan101
ip address 10.3.101.2/24
ip ospf 1 area 0

Agg-2 Config
vrf orange
router ospf 2 vrf orange
area 0
interface vlan101
vrf attach orange
ip address 10.3.101.3/24
ip ospf 2 area 0
Agg-1# show ip ospf neighbors all-vrfs
No OSPF neighbors found on any VRF.

```

- A. OSPF interfaces are passive by default
- B. A loopback interface hasn't been configured on Agg-2
- C. A different OSPF process ID is used on each switch
- **D. A Layer-3 interface has not been associated with a VRF**

Answer: D

NEW QUESTION # 14

You are monitoring the traffic across the physical members of a LAG between two switches and have noticed that traffic is unevenly distributed. Using sFlow, you have determined that the majority of the traffic is between one client and one server on multiple transport layer destination ports. Based on this information, which hash algorithm should you configure?

- A. L2-src-dst
- B. B-src-dst
- **C. L4-src-dst**
- D. L1-src-dst

Answer: C

Explanation:

Using the L4 source-destination hash algorithm considers both transport layer ports, which balances traffic more effectively when multiple connections exist between the same client and server over different ports.

NEW QUESTION # 15

After enabling 802.1X authentication on all switch ports connected to AOS10 access points, users joining SSIDs in bridge mode no longer receive an IP address. Users of tunnel mode SSIDs are unaffected. What should be done to resolve the issue?

- A. Configure 802.1X on all client devices.
- B. Enable MAC authentication on all switch ports.
- C. Increase the client-limit value on all ports to 99.
- **D. Enable device auth-mode for the assigned AP role.**

Answer: D

Explanation:

This scenario highlights a common conflict between Port Access Control and WLAN architectures in AOS10.

* Tunnel Mode vs. Bridge Mode: * In Tunnel Mode , client traffic is encapsulated (GRE/IPsec) from the AP to the Gateway. The switch port only sees the MAC address of the AP itself. Once the AP authenticates via 802.1X, all tunneled client traffic passes through the authenticated " tunnel " unnoticed by the switch ' s port security.

* In Bridge Mode , the AP bridges wireless client traffic directly onto the local VLAN. The switch port now sees the MAC addresses of the wireless clients.

* The Conflict: By default, an 802.1X port expects only one authenticated device. When the AP authenticates, the port is " open " for the AP ' s MAC. However, when a wireless client's bridged MAC appears on the same port, the switch treats it as an unauthenticated intruder and drops its DHCP requests.

* The Solution (Device Mode): You must configure the User Role assigned to the AP (after it authenticates) with device-mode

(often referred to as dev-conf-mode or device auth-mode in exam contexts). This tells the switch: "The device that just authenticated is a trusted infrastructure device (an AP). Please allow all subsequent MAC addresses seen on this port to pass without requiring individual authentication. "

NEW QUESTION # 16

Which protocol is essential for preventing loops in Layer 2 networks?

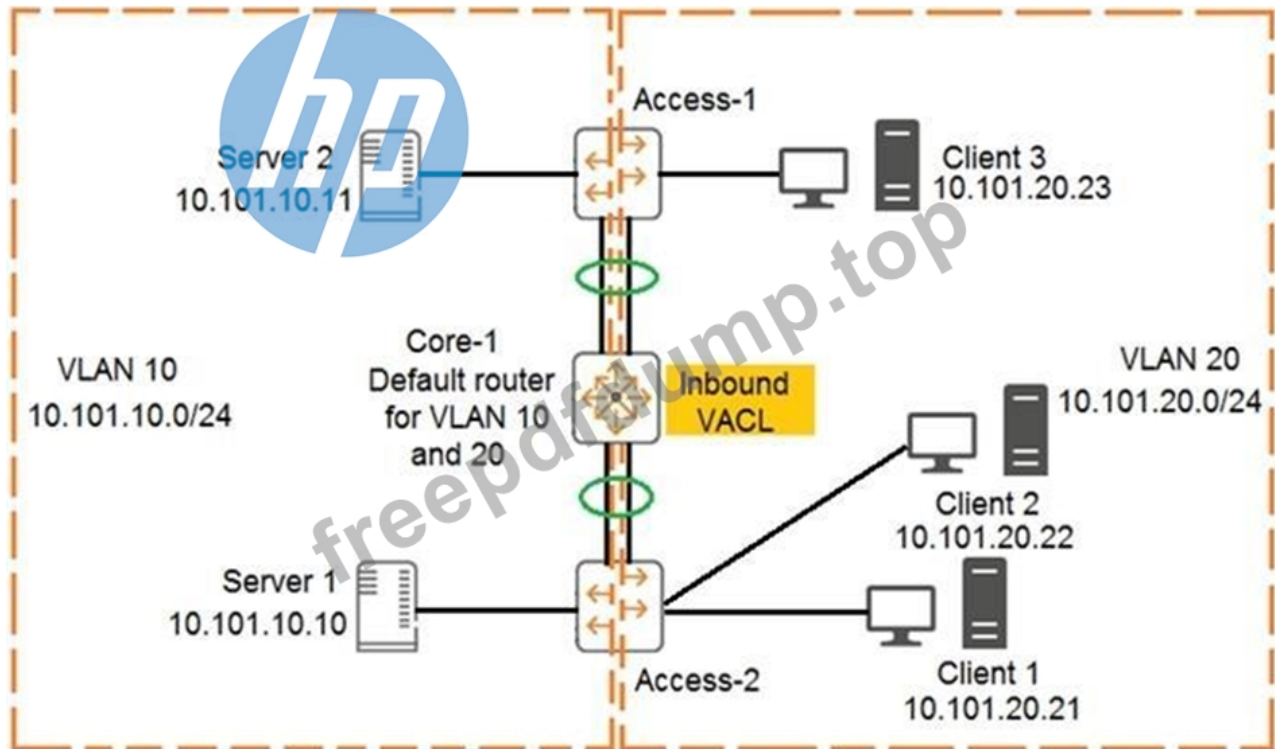

Response:

- A. VRRP
- B. OSPF
- C. RIP
- **D. STP**

Answer: D

NEW QUESTION # 17

Examine the network exhibit:

The ACL configuration defined on Core-1 is as follows:

```
Core-1(config)# access-list ip example
Core-1(config-acl-ip)# permit ip 10.101.20.21/32 any eq 23
Core-1(config-acl-ip)# permit ip 10.101.20.21/32 eq 23 any
Core-1(config-acl-ip)# exit
Core-1(config)# vlan 20
Core-1(config-if)# apply access-list example in
```

If telnet was being used, which device connection would be permitted and functional in both directions? (Choose two.)

- **A. Client 1 to Client 2**
- B. Client 1 to Client 3
- C. Client 3 to Client 2
- D. Server 2 to Client 2
- **E. Server 1 to Client 1**

Answer: A,E

Explanation:

B is correct because the traffic never crosses the core so the VACL is not used.

D is correct because the server is inbound to VLAN 10 so VACL is not used and return traffic is permitted by VACL.

NEW QUESTION # 18

.....

Our web-based practice test is accessible from anywhere with an internet connection, which means you can take it at your convenience. This HP HPE7-A08 Practice Test is designed to simulate the actual exam and help you become familiar with the test format. You can access the web-based practice exam from anywhere with an internet connection to study on the go or from the comfort of your own home. You can receive your mock exam result instantly.
